THE PRESIDENT’S ROUND TABLES

The President of Roane State Community College periodically schedules an “open hour” for student organization officers and any other interested members of the student body. The student round table is scheduled weekly in the student center.

An “open hour” for faculty to discuss matters of concern is scheduled weekly, also. The President’s Round Table for Faculty is scheduled in the faculty office areas.
Groundskeeper Nancy Rennie discusses types of cuttings and their possible use with her landscape architecture class.

Admissions and registration procedures have been simplified for the convenience of the student.
GENERAL INFORMATION
COLLEGE HISTORY

In 1957 the Pierce-Albright report on higher education in Tennessee was submitted to the Tennessee Legislative Council. This report emphasized the need for additional higher education to be available to the typical Tennessee resident.

In 1963 the Tennessee General Assembly appropriated $200,000 for use over a two-year period to implement the Pierce-Albright report. The State Department of Education, under the leadership of Commissioner J. Howard Warf, developed plans for the establishment of community colleges to service areas without access to higher education.

The 1965 Tennessee General Assembly authorized the establishment of the first three community colleges, one to be located in each of the State's three grand divisions. Sites of these institutions were Columbia, Cleveland, and Jackson. The cities of Dyersburg and Tullahoma were the locations of additional community colleges opened in 1969. In 1970 Morristown was the location of the sixth community college.

Acting upon the recommendation of Governor Buford Ellington and the State Department of Education, the 1969 Tennessee General Assembly authorized the establishment of three additional community colleges. These colleges were to be located in Sumner, Roane, and Shelby counties. In July 1969, Commissioner J. Howard Warf and other State Department of Education officials visited various sites proposed for the new college in Roane County. After appropriate studies were made, a site on Patton Lane was chosen for the location of the institution.

In May of 1970, Dr. Cuyler A. Dunbar was selected as the first president of the College; and in the late summer, temporary offices were opened on Ruritan Road in South Harriman.

When bids for construction were opened in August 1970, the low bid was approximately $700,000 higher than the amount of available funds. Subsequently, a decision was made by State Department of Education officials and College administrative personnel to open in temporary quarters in the fall of 1971.

Bids for construction were opened again in June 1971, and construction was begun in July 1971. The building was occupied in August 1973.

Groundbreaking for the second building on the Roane State campus was held in January 1977. This three-story Technologies Building, which houses the college's expanding career education programs and personnel, was occupied in December 1978.

Construction on an additional package of buildings was begun in June 1978. This package, called Campus Expansion Phase II, consists of a Library/Learning Resources Center and a Maintenance Building/Central Heating Plant. Both of the buildings included in the Campus Expansion Phase II project are scheduled to be completed during 1979. This second expansion project, like the Technologies Building, will greatly improve the services which the college can offer to both students and the community.

These new facilities at Roane State are becoming increasingly important due to the tremendous growth of the college. The Fall Quarter 1978 enrollment was up again for the seventh straight year. During this Fall Quarter, 3,223 students were enrolled for credit courses, with more than 800 students enrolled in non-credit courses and workshops. This made over 4,000 persons who were served at RSCC during the Fall Quarter.
Location

The campus of Roane State Community College consists of 104 acres located between the cities of Harriman, Kingston, and Rockwood in Roane County, Tennessee. The permanent site is near the intersection of Patton Lane and U.S. Highway 70. The campus is easily accessible from Interstate 40 and U.S. Highways 27 and 70.

PURPOSE

The educational offerings of Roane State Community College are based upon the belief that development of the individual for a useful and productive life in a democratic society is a primary obligation of the public educational system.

Roane State Community College accepts as its purpose the development of the cultural, intellectual, physical and vocational resources of the people of the surrounding area through qualified teaching, professional counseling and guidance and supplementary services offered to students and community.

Roane State Community College offers day and evening programs combining general education and technical education sufficiently flexible to provide for the changing educational needs of the community. The program is fourfold:

1. To serve those who wish to transfer and complete a four-year college education;
2. To serve those who wish to complete their formal education upon graduation from Roane State Community College;
3. To serve the entire community through a program based on community needs and demands; and
4. To offer remedial programs for those students in need of intensive preparation for college level work.

Specifically, Roane State Community College attempts to fulfill its role in the educational process by:

1. Promoting a liberal admissions policy;
2. Developing and maintaining a broad curriculum of superior quality;
3. Supporting a position of low fees for its students;
4. Maintaining a fundamental awareness of the area it serves;
5. Establishing adequate articulation with four-year institutions;
6. Developing reasonable vocational and occupational objectives; and
7. Encouraging more effective use of leisure time.

Roane State Community College accepts the philosophy that a community college is not merely two years of continuing high school or just the first two years of college but is a separate entity. Roane State Community College recognizes that students have differing learning characteristics which require varied instructional techniques, and the College endeavors to provide the leadership which will enable each individual to develop and mature toward the realization of his/her potential. Thus, students are encouraged to participate actively in the social, cultural and intellectual activities of the College and the community.
Individualized instruction and personal attention to each student's needs make developmental studies classes useful to many Roane State students.
ADMISSIONS AND RECORDS
Admissions

Roane State Community College subscribes to the "open-door" policy for admission. Prospective students seeking admission to complete courses for college credit must meet the following requirements.

ADMISSION REQUIREMENTS

1. Graduate from high school or receive a GED high school equivalency diploma and file with the Office of Admissions an official high school transcript or an official copy of GED scores.
2. File an application for admission and submit a non-refundable application fee of $5.00. The application form must have all appropriate spaces completed. Failure to complete accurately all appropriate spaces may result in expulsion from the college.
3. File the signed Health Information Report and/or evidence of a recent physical examination. Students who have special health problems must file this information with the college clinic. Part-time students shall have the option of signing the medical waiver, and students who enroll only in courses taught at off-campus locations are exempt from any health information requirement.
4. All freshmen applicants are strongly urged to take the American College Testing Program (ACT) battery and have their scores certified directly to the Admissions and Records Office, Roane State Community College, Harriman, Tennessee 37748. This test should be taken preferably on one of the fall testing dates during the senior year of high school. Information on the ACT may be obtained from the high school counselor, the Counseling Office at RSCC or by writing to American College Testing Inc., P.O. Box 168, Iowa City, Iowa 52242. Roane State Community College's ACT Code Number is 3985. This number should be used when requesting that scores be sent to RSCC. Students may enter without having taken the ACT, but they may be required to take the ACT battery during their first quarter of attendance. The sole purpose of these tests is to assist the student in choosing the best academic schedule.
5. Students who have graduated from a Tennessee high school and who have not earned one credit in American History while in the high school program are required to complete 9 quarter hours of American History during their first 45 hours of enrollment at Roane State. This requirement does not affect the student who enters the college with a G.E.D. certificate.

ADMISSION POLICIES FOR ALLIED HEALTH PROGRAMS

There are special admission policies for Allied Health programs, which include Dietetic, Medical Laboratory Technology, Medical Records Technology, Radiologic Technology, and Respiratory Therapy.

1. The applicant must be a high school graduate, ranking in the upper half of the graduating class or attaining a G.E.D. score above the 50th percentile.
2. The applicant must attain a composite score of 18 or above on the American College Testing Program (A.C.T.) or attain a composite score at or above the 50th percentile on the College Qualification Test (C.Q.T.).
3. A student who does not meet the above requirements may be considered after completion of 12 hours of general education courses required in the program with a GPA of 2.5 or better.
4. The applicant must be interviewed by the Program Director of the specific program or a designated representative.

5. A history and physical examination is required prior to beginning the clinical education. Forms are available from the college nurse or from the Coordinator of Health Occupations.

6. Respiratory therapy applicants may be required to take additional preadmission testing.

7. Final selections of students will be made by the Health Occupations Admissions Committee.

TRANSFER STUDENTS FROM OTHER COLLEGES AND UNIVERSITIES

1. Degree seeking applicants who have attended another college or university will be considered transfer students and will be required to furnish transcripts of all previous college work from each institution they have attended.

2. Transcripts are not accepted from students. A certified copy must be mailed directly to the Office of Admissions, Roane State Community College.

3. Transfer students will be admitted if they meet the minimum scholastic standards required by the College. Special cases will be evaluated by the Admissions Office.

4. In special cases an applicant who wishes to transfer to Roane State Community College may be allowed to register prior to the receipt of official transcripts. It is mandatory, however, that all transcripts be received during the first quarter of enrollment. No student may register for a second term if the admissions file is not complete.

5. Credits for courses not corresponding with the curriculum at Roane State will be entered on the transcript as elective credit.

6. If a transfer student has accumulated less than 24 quarter hours, an official high school transcript is also required.

When all requirements have been met, the applicant may be admitted to the College as a candidate for a degree and receive college credit for courses completed.

HOW TO APPLY FOR ADMISSION

All correspondence concerning admissions should be addressed to:

Director of Admissions and Records
Roane State Community College
Harriman, Tennessee 37748

A candidate for admission should request application blanks early enough to allow ample time for required materials to be forwarded to the Director of Admissions and Records.

When all admission papers have been received in the Office of Admissions and Records, the applicant will be sent a letter indicating that he/she has been accepted for admission, or he/she will be advised by letter that further action is necessary in order to establish eligibility for admission. Applicants will be advised when to appear for testing, counseling, pre-registration and registration.

READMISSION OF FORMER STUDENTS

Former students who wish to return to the College after an absence of one quarter or more must file a formal application for readmission. Application forms, available from the
Office of Admissions and Records, must be completed in ink or by typewriter and returned to the Director of Admissions and Records. If the student has enrolled at another college since last attending Roane State Community College, he/she must have a transcript from the other college submitted and approved before he/she may reenter. Applications will receive favorable consideration only if the applicant is eligible for readmission under all college regulations.

ENROLLMENT OF ELDERLY AND TOTALLY DISABLED PERSONS

Persons sixty years of age or older who are domiciled in Tennessee may audit courses without payment of course fees if space is available in the desired class.

Persons sixty five years of age or older and totally disabled persons who are domiciled in Tennessee, are eligible to enroll in courses for credit upon payment of service fees of $3.50 per quarter hour, not to exceed $30.00. Special fees will be assessed.

All students must complete the institutional application form and pay the application fee.

STUDENT CLASSIFICATION

Degree Student

A student who has fulfilled admission requirements and is pursuing an Associate Degree program is admitted as a degree student. For administrative purposes, a student will be classified as a freshman until the completion of 42 quarter hours; a student who has completed 42 quarter hours or more will be classified as a sophomore. Those not accepted as degree students will be classified as special students.

Special Student—Credit

Persons desiring college credit, but who are not working toward a degree at Roane State Community College, may be admitted as special students. These students must submit an application form, the required medical form, and evidence of high school graduation or a GED diploma. If such students have already earned a degree, or have completed some work toward a degree at another institution of higher education, a college transcript in lieu of the high school transcript or GED diploma may fulfill this requirement.

Special Student—Non-Credit

Persons desiring to take courses offered in the College program for audit, or who do not meet all of the admission requirements, will be admitted as special students. Students seeking admission to the College for the purpose of attending special courses, seminars, or other non-credit offerings will be admitted as special students.

Special Student—Adult

A student who has passed his/her twenty-first birthday and who does not meet requirements for a regular student may be admitted as an adult-special student subject to the following guidelines:

1. The applicant must submit an application for admission and a five dollar application fee.
2. The applicant may not enroll as a full-time student.
3. The applicant may not accumulate more than 24 hours of credit while enrolled as an adult-special student.
4. After 24 quarter hours have been attempted, if the student has a 2.00 GPA or better, the student may apply to the Director of Admissions for reclassification as a regular degree student. If the reclassification request is granted, up to 24 hours of credit may be applied toward a degree program at Roane State Community College. If, after attempting 24 credit hours, the adult-special student does not have a 2.00 average, the student may not enroll in additional courses until the GED test has been successfully completed.

5. If the student applies for reclassification to a regular degree student prior to the successful completion of 24 quarter hours (2.00 GPA or better), the student must submit evidence of high school graduation or successful GED scores (a composite score of 45 or better).

An adult who presents evidence of having passed his sixtieth birthday will be admitted as an adult-special student subject to the following guidelines:

1. The applicant must submit a completed application form and a five dollar application fee.
2. The student may be permitted to enroll in courses on an audit basis when class space permits. No course fees are required for Tennessee residents under these circumstances.
3. Regular fees must be paid for all community service courses.

Adult Special Veteran

Veterans and other eligible persons who are not high school graduates or who have not passed the high school level General Education Development test according to the standards set by the State of Tennessee, will be classified Adult Special Veteran.

Students classified as Adult Special Veteran will be required to take the College Qualification Tests and the Nelson-Denny Reading Test. The results of these tests, previous academic record, and the declared major (Associate of Science or Arts) of the student will be reviewed by a college counselor to determine which remedial courses he/she must complete satisfactorily before admission as a regular degree student. No credit toward an Associate degree will be earned while the student is classified as Adult Special Veteran.

Transfer Student

Admission as a transfer student will be based upon the student's high school record and his/her success in college. Critical consideration will be given to the conditions under which he/she is withdrawing or has withdrawn from another institution. Normally, transfer students will be admitted who can show evidence of honorable withdrawal or dismissal. These students must be eligible for readmission at the institution or be recommended for admission by the institution where they matriculated. Special cases will be evaluated by the Admissions Office.

Transfer students who are residents of Tennessee will be given first consideration. Out-of-state transfer students will be considered if space is available. The conditions resulting in their request for transfer will be studied and recommendation made by the appropriate committee.

Transient Student

The person seeking to be admitted as a transient student must complete the application form for transient students. The transient application is in addition to the
regular form. The form contains a provision for written approval and prior commitment from the student's college to accept the credit earned at Roane State Community College.

International Student

An applicant who is a citizen or a permanent resident of a country other than the United States is classified as an international student. The following are admissions requirements for international students in addition to those outlined for United States citizens and Tennessee residents:

1. All applicants whose native language is not English are required to furnish test results of the Test of English as a Foreign Language (TOEFL). A minimum score of 450 on this test is required.
2. In addition to satisfactory TOEFL scores, all international applicants are required to take an English placement test at Roane State Community College for the purpose of placement in English courses. This test is administered by the Humanities Division. A personal interview is also a part of the placement procedure.
3. All transcripts, test scores, and other credentials must be accompanied by an official English translation of these documents and must be on file in the Office of Admissions and Records at least sixty days prior to the beginning of the term in which the applicant wishes to enroll.
4. Evidence of financial resources adequate for all expenses for at least one year of enrollment. (A statement verifying these resources from a bank in the United States will fill this requirement).
5. The international student must be familiar with the regulations of the Immigration and Naturalization Service and assume responsibility for complying with these regulations.

ADVANCED STUDIES
(for seniors in high school)

Upon completion of the junior year in high school a student may enroll in courses under the Advanced Studies plan. Conditions of this plan are as follows:

1. The student must have a cumulative average of "B" or above or rank in the upper 25% of the class, and the student must be nominated by the high school principal and/or counselor.
2. The course load may not exceed 10 quarter hours except in cases where a sequence may be 12 quarter hours.

Exceptions to the above policy must be approved by the high school principal concerned and the Dean of Instruction at Roane State Community College.

Courses satisfactorily completed will count as credit for those who submit a high school transcript showing evidence of high school graduation.

Exceptionally qualified students may continue in advanced studies during their senior year of high school if recommended by the high school principal. Courses for such students should be selected by the College, and the student given released time from the high school to attend classes of the College.

ADVANCED STANDING

Course Exemption

Advanced placement in foreign language classes will be based upon the student's previous studies. Those who have completed two years of a high school language with
"C" or better should enroll in the intermediate level of that language. They may, however, receive credit for the beginning level courses through departmental proficiency examinations.

In English, students with ACT scores of 25 or better may enroll for both English 1010 and 1020, attend English 1020, and receive six hours credit with the grade earned in English 1020.

**Advanced Placement**

Roane State also offers course credit for successful completion of Advanced Placement examinations administered by the College Entrance Examination Board to high school students. Course credit will be granted to students presenting Advanced Placement examination grades of three or higher. Inquiries concerning Advanced Placement should be forwarded to the Director of Admissions and Records.

**Departmental Examinations**

1. Students desiring to obtain credit by successfully completing departmentally designed examinations must apply to the appropriate department and arrange to take the examination.
2. Students registering for a course for which credit is granted as a result of a proficiency test must present approval for this registration from the appropriate department.

**CLEP General Examinations:**

Have official scores sent from CEEB to the Office of Admissions and Records. An evaluation for possible credit will be made, and a copy of this evaluation will be mailed to the student. Credit in each area of the General examinations will be limited to the first course in a course sequence.

**CLEP Subject Area Examinations:**

Have official scores sent from CEEB to the Office of Admissions and Records. An evaluation for possible credit will be made, and a copy of the evaluation will be mailed to the student.

TRANSFER OF CREDIT

Roane State Community College will accept credits transferred from accredited colleges. Certified transcripts of all previous records must be sent to the College at the time of application. Credits for courses not corresponding with the curriculum at Roane State Community College will be entered on the transcript as elective credits. Credit from an institution of higher education which is not fully accredited may be accepted provisionally if the institution is in the process of attaining accreditation.

No academic credit may be transferred to Roane State Community College from a non-accredited institution (an acceptable accrediting agency for an institution would be the Southern Association of Colleges and Schools).

Transfer grades have no bearing on the required average for graduation.
Veteran students who have more than one year of honorable military service may be awarded up to six hours of physical education activity credit and up to nine hours of Military Science credit. The veteran must present a copy of the DD 214 Form (if not on file) to the Office of Admissions and Records and file a petition for this credit.

**CORRESPONDENCE AND EXTENSION CREDIT**

A student may not be enrolled at another college for correspondence or extension work while enrolled at Roane State unless special permission has been granted. All extension or correspondence work in progress upon admission must be reported to the Office of Admissions and Records at the time of the student's first registration. A maximum of 25 quarter hours correspondence and/or extension work may be applied toward degree credit. All correspondence or extension work must have the documented approval of the Director of Admissions and Records.

**RECORDS**

Records of each student's grades are kept on permanent file in the Office of Admissions and Records. Since these records are permanent and are frequently referred to for the purpose of supplying information to legitimate sources, all students should be acutely conscious that they are building their future and that their good attitude and diligent study will stand them in good stead after graduation.

In all cases, student admission files must be complete prior to the end of the first quarter of enrollment. No student will receive grades or be permitted to reenroll until all necessary documents are received in the Office of Admissions and Records.

**SPECIAL STATE AND FEDERAL LEGISLATION FOR EDUCATIONAL PURPOSES**

Family Educational Rights and Privacy Act

This act provides for confidentiality of student records. No information contained in a student file may be released without the consent of the student. The only exception to this is information designated as directory information. This includes student name, address, telephone number, date and place of birth, major, dates of attendance, degree and awards, the most recent previous educational agency or institution attended, participation in school activities and sports, weight and height (for special activities). In addition, the act provides for student review under prescribed circumstances of his/her records.

Copies of the institutional policy are located in the Library and in the Office of the Dean of Students as well as the Office of Admissions and Records. Students may contact the Director of Admissions and Records for additional information or to request that Directory Information be withheld.

**TRANSCRIPT OF CREDITS**

In all cases, obligations to the College must be fulfilled before a transcript will be issued.

**REGISTRATION FOR COURSES**

A student whose application is filed before the application deadline for any given quarter should, prior to registration, receive notification of registration procedures. The student will be assigned an advisor who will continue to assist with his/her education program. Students are expected to complete registration on the dates announced. They must observe the procedure specified at the time. Students are not officially enrolled until they have completed all the requirements of registration. Registration after dates established on the calendar may be completed by presenting an acceptable reason for delay and by payment of the late registration fee. Registration delayed beyond the period
established as the last date to register or add a class requires special permission from the Director of Admissions and may result in reduction of course load for the quarter.

**CHANGE OF REGISTRATION**

A student is allowed to change registration during the "Drop-Add" period at the beginning of each quarter. The following procedures are to be followed in adding or dropping courses:

1. Prepare a schedule adjustment form from the Admissions and Records Office.
2. Obtain advisor's signature.
3. Present the completed form to the Business Office and pay appropriate fees.
4. Return two (2) copies of form to the Admissions and Records Office and receive one copy which must be shown to the instructor whose course is being added.

Failure to follow these procedures will result in an "F" in a course the student did not attend or the student taking a course without receiving credit.

**CANCELLATION OF SCHEDULED CLASSES**

Any scheduled class may be discontinued by the College. The right is reserved to cancel when the number enrolled is deemed insufficient.

**STUDENT LOAD**

The average quarter hour load for a student should be 16 quarter hours of credit per term. Individual programs may require more or fewer quarter hours load for a particular term. A full-time student is one who is carrying 12 or more quarter hours of credit.

Faculty advisors may approve overloads subject to the following guidelines:

1. Students with a 2.5 GPA may take up to 19 quarter hours credit.
2. Students with a 3.0 GPA or better may take up to 21 hours credit.
3. Students desiring to take 22 quarter hours credit or more should have the approval of both the faculty advisor and the Dean of Instruction.
4. Any exceptions to the above guidelines should have the approval of the Dean of Instruction.

**GRADING SYSTEM**

The following grading system is used at Roane State Community College:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points Awarded Per Quarter Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Outstanding</td>
<td>4</td>
</tr>
<tr>
<td>B Above average</td>
<td>3</td>
</tr>
<tr>
<td>C Average</td>
<td>2</td>
</tr>
<tr>
<td>D Passing but below average</td>
<td>1</td>
</tr>
<tr>
<td>F Failing</td>
<td>0</td>
</tr>
</tbody>
</table>

The scholastic standing of a student is expressed in terms of quality point ratio. A quality point ratio is the total number of quality points divided by the total number of quarter hours attempted, less the number of hours repeated. To meet degree requirements a student must maintain an over-all quality point average of 2.00.

Other markings which may appear on the grade report and/or transcript are as follows:
Incomplete
Audit: no grade or credit
No credit—no grade
In special cases, a grade of Pass may be used
Repeated
Withdraw
No grade reported

The grade "I" indicates that the student was passing at the end of the quarter but has not completed all the work of the course as required by the instructor. The student is thus on notice that he/she should contact the instructor immediately in an effort to complete course requirements. This "incomplete" must be removed during the succeeding quarter, with the exception of Summer Quarter. Courses attempted which are incomplete are reflected on the academic record as hours attempted for which there is no credit established. This in turn affects the quality point average in the same manner as a failing grade. Should the "incomplete" not be removed, the quality point average will continue to reflect the "I" as a failing mark and will be interpreted as such.

At the discretion of the Dean of Instruction, selected courses may be offered using a pass-fail grading system. A "P" indicates a passing grade in such cases. Students would receive 2.00 quality points per credit hour for a "P" and no quality points for an "F." In all cases, the student would have the option of being graded by pass-fail, or the standard "A, B, C, D, F" method.

Repeated Courses

A student may repeat a course upon approval of his/her faculty advisor. The grade received in repeating the course supersedes all previous grades and is credited in the quarter in which the course is repeated.

In order that grade point averages may be adjusted appropriately, the student repeating a course must file a course repeat form with the Office of Admissions and Records.

Veterans or other eligible persons repeating courses for which they have a passing grade (D or higher) and for which they have been paid are cautioned not to claim this course for pay the second time.

Course Substitutions

Course substitutions require the approval of the student's advisor, the Division Chairperson, and the Dean of Instruction. A form for this approval is available from the Office of Admissions and Records and must be processed prior to registering for the course in question.

GRADUATION

All students must complete the general requirements as prescribed by the College and specific requirements set forth for the Associate Degree sought. Each student must file an Intention to Graduate form in the Office of Admissions and Records before the beginning of the quarter in which the student expects to graduate.

Graduation exercises are held only at the end of the spring quarter. Students who anticipate completing their work during the current calendar year, whose grade point average is sufficient for graduation, and whose names appear on the official graduation roster, may take part in graduation exercises.
DEFERRED GRADUATION

A student is permitted to graduate under a catalog under which he/she entered a program or under the catalog in effect at the time of graduation, provided that not more than five years have elapsed in the interim. If more than five years have elapsed, then the student must meet the requirements of the catalog in effect at the time of graduation.

GRADUATION WITH DISTINCTION

Students who have fulfilled all graduation requirements, who have completed a minimum of forty-five quarter hours at Roane State Community College prior to their final quarter, and who have been in residence for a minimum of three quarters prior to their final quarter are eligible for designation as honor graduates. Those who have a quality point average of 3.25 and less than 3.50 will be graduated Cum Laude; those who have a quality point average of 3.50 and less than 3.80 will be graduated Magna Cum Laude; those who have a quality point average of 3.80 or above will be graduated Summa Cum Laude.

A transfer student, in order to be eligible, must have made the required average on all work taken at Roane State Community College and must, in addition, have an overall average which meets the honors requirements; the final average may in no instance be higher than that made at Roane State Community College. All grades for courses accepted for credit must be averaged in the grade point average to determine the honors graduation eligibility.

DEAN’S LIST

The Dean’s List is the official medium for the institution to recognize outstanding academic accomplishment by students. Provision is made for recognizing full-time students who obtain the required quality point average for this honor. Full-Time—12 Credit Hours or more with 3.25-4.00 average.

PROBATION AND RETENTION STANDARDS

A minimum quality point average of 2.00 is required for graduation from Roane State Community College.

Academic Deficiency

A student who fails during any term to attain a cumulative GPA at or above the level indicated below for the credit hours attempted will be placed on academic probation for the subsequent term.

<table>
<thead>
<tr>
<th>Quarter Hour Attempted</th>
<th>Minimum Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 21</td>
<td>No minimum</td>
</tr>
<tr>
<td>21.1 - 39.0</td>
<td>1.0</td>
</tr>
<tr>
<td>39.1 - 60.0</td>
<td>1.4</td>
</tr>
<tr>
<td>60.1 - 72.0</td>
<td>1.7</td>
</tr>
<tr>
<td>72.1 - 84.0</td>
<td>1.9</td>
</tr>
<tr>
<td>84.1 - and above</td>
<td>2.0</td>
</tr>
</tbody>
</table>

In order to remain in a health occupation program, the student has to obtain a grade of C or better in specialty courses. A “C” average must be maintained in related science courses.
Academic Suspension

At the end of the next term of enrollment, a student on academic probation who has failed to attain either the above cumulative standard or a 2.0 GPA for that term will be suspended for one term.

Each student who is placed on academic suspension will be notified by the Admissions Office. Any student has the right to appeal to the Admissions and Retentions Committee (composed of faculty, staff, and student representatives) for reinstatement. The student should notify the Admissions Office if he/she wishes to process an appeal.

If the Committee grants the reinstatement, the conditions of the reinstatement imposed by the committee must be clearly stated. These may include reduced course load, a review of program objectives with the Director of Academic Advisement, regular meetings with a college counselor, and/or regular progress reports to the academic adviser.

Grounds for Dismissal

A student may be dismissed from the College for any one or more of the following reasons:

1. Failure to meet minimum academic standards as stated in the above section.
2. Conduct of an unacceptable nature (see student handbook).

WITHDRAWALS AND HONORABLE DISMISSELS

Students finding it necessary to withdraw from the College should do so officially to maintain good standing and to assure readmission or honorable dismissal. Withdrawal procedures are as follows:

1. Initiate form in Admissions and Records Office.
2. Secure clearance signatures (in sequence) from (1) Advisor (2) Instructor of any laboratory science course from which a student is withdrawing (3) Library (4) Admissions Office and (5) Business Office.
3. Return forms to Admissions Office.

After the drop deadline date, no student will be permitted to withdraw from the College and receive the grade of "W" unless documented proof of one of the following conditions exists, verifying that the mitigating circumstances developed after the drop deadline:

1. Illness or injury of the student as verified by the RSCC student health service or the attending physician.
2. Serious personal problems as verified in writing by the student's parents, spouse, minister or physician.
3. Necessary change in work schedule verified in writing by the student's employer.
4. New employment as verified in writing by the employer.

All equipment belonging to the College must be accounted for or paid for and all financial obligations met. If it is impossible for the student to take these steps in person, they should be taken by a parent or a person acting as an agent for the student. The student may withdraw from the College with the grade of "W" through the dates specified on pages 6 and 7 with the grade of "W." Withdrawal after this date must be approved by the Director of Admissions. A student who stops attending classes and fails to follow the proper withdrawal procedure will be carried on the roll until the end of the quarter and a grade of "F" assigned.

SOCIAL SECURITY ADMINISTRATION

The Admissions and Records Office cooperates with the Social Security Administration by certifying that students eligible to receive Social Security benefits are enrolled at Roane State.
The college bookstore sells t-shirts and sweaters in addition to school supplies.
BUSINESS INFORMATION
AND EXPENSES
BUSINESS REGULATIONS

Tuition and fees are assessed and payable at the beginning of each quarter. Registration is not considered to have been completed until all assessed tuition and fees have been paid. Tuition and fees paid by check are not considered to have been paid until the check has cleared the bank. Students who have not met all financial obligations to the College will not be permitted to attend classes. No student will be permitted to re-enroll, graduate, or receive a transcript until all financial obligations to the College have been satisfied. All tuition and fees are subject to change by direction of the Tennessee State Board of Regents.

TUITION

Tuition is free to all residents of the state of Tennessee. Students classified as non-residents will be assessed tuition at the rate of $28.00 per quarter hour, not to exceed $334.00 per quarter. The definition of residency as determined by the State Board of Regents will apply. Information concerning residence classifications may be obtained from the Director of Admissions and Records. Non-resident students will be accepted, if space permits.

MAINTENANCE FEE

All students, both resident and non-resident, will be assessed a maintenance fee of eight dollars per quarter hour, not to exceed $90.00 per quarter.

ELDERLY AND DISABLED PERSONS

Disabled persons and persons sixty years of age or older, who are domiciled in Tennessee, are eligible to enroll in courses for AUDIT without payment of tuition, maintenance, student activity or registration fees.

Disabled persons and persons sixty-five years of age or older, who are domiciled in Tennessee, are eligible to enroll in courses for CREDIT at the rate of $3.50 per quarter hour up to a maximum of $30.00.

Special fees (such as laboratory fees, graduation fees, parking fees, etc.) will be assessed at the regular rate. Arrangements should be made well in advance of registration day to provide documented evidence of disability or advanced age.

Enrollment of disabled or elderly students will be made on a space availability basis.

VIETNAM CONFLICT VETERANS DEPENDENTS

All tuition, maintenance, activity and other fees are waived for the children of Vietnam conflict veterans if the conflict veteran died while serving in Vietnam or as a result of injury sustained while serving in Vietnam, or was officially declared missing in action or declared a prisoner of war in Vietnam. Documented evidence will be required.

AUDIT FEE

Fees for courses being audited are the same as those taken for credit. Auditors are not required to take examinations and receive no credit.

COMMUNITY SERVICE COURSE FEES

Fees for Community Service courses will vary with length of the course, cost of materials provided, equipment, or miscellaneous resources. Students enrolling for Community Service courses are not required to pay an application fee or late registration fee.

SUMMER QUARTER FEES

The Summer Quarter consists of a full-quarter term, two separate terms of approximately five weeks each, or three triple accelerated terms.
Students may register for the entire quarter, for the two separate terms, for three triple accelerated terms, or any combination thereof. Tuition and fees for the entire Summer Quarter are the same as for other quarters. Students are required to indicate at the initial enrollment for the Summer Quarter if they wish to be assessed for the full quarter at the rate of $8.00 per quarter hour, not to exceed $90.00, or if they wish to be assessed at the rate of $8.00 per hour in which case a student taking a total of more than 12 quarter hours during the two separate terms would be required to pay more than the maximum of $90.00. Once the student has indicated his/her election, he/she may not shift from one plan to the other. The Business Office will assist a student in selecting a plan that is to the advantage of the student.

OTHER FEES

Application Fee—Each student applying for admission to the College for credit courses for the first time will be assessed a $5.00 application fee. This fee is a one-time only fee, is not applicable to the maintenance fee, and is not refundable.

Change of Schedule Fee—Students changing schedules after registration day will be assessed a fee of $5.00. This fee is not refundable. Students withdrawing from school entirely are not required to pay this fee. The fee is not charged for changes that are necessary because of institutional action.

Graduation Fee—Graduating students are assessed a fee of $20.00 to cover the cost of a diploma and other related costs. This fee must be paid at the beginning of the quarter in which a student is scheduled to graduate. This fee is not applicable to certificate graduates. This is a one time fee and is not refundable.

I.D. Card—There is no charge for the original I.D. card issued a student. A charge of $1.00 will be made for replacing a lost I.D. card.

Individual Instruction in Music—Quarterly fees for individual instruction in music are assessed as follows:

- Full-time students: 1 lesson per week $20.00
- Full-time students: 2 lessons per week $30.00
- Part-time students: 1 lesson per week $30.00
- Part-time students: 2 lessons per week $60.00

Late Registration Fee—Students failing to complete the registration requirements on the appointed registration day will be assessed a late registration fee of $10.00. This fee is not refundable.

Liability Insurance Fee—A yearly liability insurance fee will be required for students in the health occupation programs. The liability insurance will be purchased at a reduced group rate.

Lock or Key Replacement Fee—$3.00

Miscellaneous Fees—A fee will be charged for courses utilizing some off-campus facilities. This fee will be based on the cost to the college for the rental of the facility. A fee may also be charged for some field trips. This fee is not refundable.

Motor Vehicle Registration Fee—Faculty, staff, and students enrolled for over six hours registering vehicles during the fall or winter quarter will pay a fee of $4.00 for each vehicle registered. Part-time students with six hours or less registering vehicles during the fall or winter quarter will pay a fee of $2.00 for each vehicle registered. The decal(s) issued will be valid through the entire registration period. Faculty, staff and students enrolled for over six hours registering vehicles during the spring or summer quarter will pay a fee of $2.00 for each vehicle registered. Part-time students with six hours or less registering vehicles during the spring or summer quarter will pay a fee of $1.00 for each vehicle registered. The decal(s) issued will be valid through the entire registration period.
Faculty, staff and students engaged in Community Service/Continuing Education (non-credit) courses only, will pay a fee of $1.00 each quarter for each vehicle registered.

**Musical Instrument Rental Fee**—$5.00 per quarter.

** Returned Check Fee**—A fee of $5.00 is assessed for each check returned to the College by the bank. A student may contest this fee successfully by presenting a letter from the bank in which it is clearly indicated that the check was returned through error by the bank. The College reserves the right to refuse to accept a check for any purpose from persons who have developed a record of presenting checks that have subsequently been returned by their bank.

**Student Activity Fee**—$1.00 per quarter for Fall, Winter, and Spring Quarters for each credit student enrolled in classes at Roane State-Harriman and Roane State-Oak Ridge.

**Transcripts**—There is no charge for a transcript. However, the college has the right to limit transcripts provided at any one time to a reasonable number.

**REFUNDS**

**Regular Sessions**—Students withdrawing from school entirely or dropping one or more classes may be entitled to a refund as follows:

75% of fees will be refunded for drops or withdrawals within 14 calendar days after the first official day of classes. The first official day of classes is determined by the official college calendar listed in the catalog as the day “classes begin.”

100% of fees will be refunded for classes cancelled by the institution.

100% of fees will be refunded for drops or withdrawals prior to official registration.

100% refund in case of death of the registered student.

**Summer Sessions**—Summer session refunds will be based on the above with short terms being prorated as a percentage of a regular term.

**Community Service Courses**—Fees charged for Community Service courses are refundable in the following manner: (1) 100% refund if the class is dropped prior to the first class meeting, (2) 70% refund if the class is dropped after the first class meeting, but prior to the second class meeting, and (3) no refund is made after the second class meeting, for individual classes missed, or for programs of fewer than 10 contact hours. All refunds will be made promptly.

**General Refund Policy**—No refund is due on courses which are dropped unless the sum of the remaining hours calculated at the hourly rate is less than the total amount paid for tuition and or maintenance fees.

Refunds are calculated from the date that appears on the official change of schedule form completed by the Office of Admissions and Records. Students should be careful to complete the official change of schedule in the Office of Admissions and Records promptly. Failure to do so will result in the forfeiting of all rights to a refund.

Refunds can be expected approximately six to eight weeks into the quarter.

**BOOKS AND SUPPLIES**

The cost of books and supplies will vary from one program to another. The College Bookstore sells both new and used books. Students are encouraged to take advantage of
savings which result when purchasing used books. The cost of books and supplies will probably range from $35-$70 per quarter.

**Book Buy Backs**—The College Bookstore will buy back used books in good usable condition in quantities limited to the anticipated needs for ensuing quarters. Book buy back periods are announced at the end of each quarter.

Students selling books back to the bookstore will be required to furnish suitable identification, such as a Roane State Community College ID card, a valid Tennessee driver's permit, or a Social Security card.

Coach Landers and Coach Brownlee discuss game strategy with Cindy Guinn, Teresa Duncan, and Bernadette Locke.

Student Government Association President Mike McDaniel talks with a service club president about an upcoming event.
SCHOLARSHIPS, LOANS, GRANTS

SCHOLARSHIPS, FINANCIAL AID, AND VETERANS AFFAIRS
STUDENT FINANCIAL AID

The Student Financial Aid Program at Roane State Community College is designed to aid students who would find it difficult or impossible to attend college without financial assistance. Roane State offers a comprehensive program of financial aid in the form of scholarships, part-time employment, grants, and loans. Major emphasis is placed upon financial need, academic achievement, character and promise of future success.

When determining financial aid, the evaluating committee will consider the financial resources of the family as well as any unusual financial problems. The college will assist all qualified students as resources permit on a first-come, first-served basis. Therefore it is important for students to apply for financial aid as early as possible after January of each year.

SCHOLARSHIPS

State Board Work Scholarships are authorized by the Tennessee State Board of Regents, the governing body of the State University and Community College System. These scholarships are in the amount of maintenance fees for the academic year and are awarded on the basis of achievement and needs of the student. Students ranking in the upper 5% of their high school graduating class will be given priority in the awards of these scholarships. Students recognized as having exceptional promise are also eligible to apply. They must maintain a grade point average of 2.8 to remain eligible for renewal.

The State Board Scholarship recipients are required to work approximately 95 hours per academic year. An effort is made to give recipients work assignments related to their academic interest. Residents of the State of Tennessee who believe they are qualified should submit an application after the first semester of their senior year in high school and before the following May 1st.

PRIVATE SCHOLARSHIPS

Roane State has a limited number of private scholarships. In selecting recipients for these scholarships, emphasis is placed upon scholastic achievement, character, future promise, and financial need.

Additional scholarships will be established as interested groups and individuals desire. Those wishing to establish a scholarship fund are urged to contact the Director of Scholarships and Financial Aid at the college.

Available scholarships are:

- American Contract Bridge League Scholarship
- Annakusa Junior Women League Scholarship
- Bank of Oak Ridge Scholarship
- Bernard Scholarship Award
- Burlington Scholarship
- Charles Bacon Scholarship
- Clarice Bunch Scholarship
- DKG-Buckner Scholarship
- Harriman Business and Professional Women's Club Scholarship
- Harriman Kiwanis Club Scholarship
- Harriman Music Club Scholarship
- Harriman Rotary Club Scholarship
- Insurers of Anderson County and Oak Ridge Scholarship
- Kingston Business and Professional Women Scholarship
- Kingston Lions Club Scholarship
- Loudon Memorial Hospital Fund
- Maryville-Alcoa Jaycees Scholarships
ATHLETIC SCHOLARSHIPS

The College annually awards a number of athletic scholarships. For detailed information contact the Director of Athletics.

ARMY ROTC SCHOLARSHIPS

The Army ROTC Scholarship program offers financial assistance to outstanding young men and women in the Army ROTC program who are interested in the Army as a career. Each scholarship provides for free tuition, textbooks, and laboratory fees in addition to a subsistence allowance of $100 per month for the period that the scholarship is in effect. Scholarships may be awarded for either one, two, three or four years. High school seniors should contact their guidance counselors early in November or December of their senior year to apply for the four-year scholarship. One, two and three year scholarship applicants should contact the Director of Scholarships and Financial Aid or the ROTC Instructor for further information. Certain other privately financed scholarships and grants are available to ROTC cadets.

BASIC EDUCATIONAL OPPORTUNITY GRANTS

This is a direct grant (no repayment or work requirement) from the federal government based primarily on the family's financial situation. The amount of the grant ranges between $226 and $888 for the school year and must be used for expenses related to attending Roane State. Such expenses include fees, books, transportation, room and board, and other related expenses.

Application forms are available from the College or from high school guidance offices.

SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS

Federal funds are available to colleges and universities for the purpose of providing grant assistance to undergraduate students of exceptional financial need who would not, except for the grant, be financially able to attend college. Supplemental Educational Opportunity Grants must be matched in equal amounts by other financial aid provided by the college such as other scholarship aid, loans, or student employment.

Applicants for Supplemental Educational Opportunity Grants must be enrolled or accepted for enrollment and show evidence of academic or creative promise and capability of maintaining good standing.

Grants may be renewed from year to year for the first four years of undergraduate study provided the student continues to make satisfactory academic progress. All students who apply for financial assistance are automatically considered to determine if they meet the requirements to receive a Supplemental Educational Opportunity Grant.
TENNESSEE STUDENT ASSISTANCE AWARD

In 1971, the Tennessee Student Assistance Corporation was created to administer the Tennessee Student Assistance Award Program. Under this program, Tennessee residents who need financial assistance may receive a grant to cover tuition and fees at the college of their choice in the state.

Application forms may be obtained from high school guidance offices, college financial aid offices, or by contacting:

Tennessee Student Assistance Corporation
707 Main Street
Nashville, TN 37206

LOANS

NATIONAL DIRECT STUDENT LOANS

National Direct Student Loans, previously known as National Defense Loans, are available to students through funds provided jointly by Roane State Community College and the Federal Government.

These are long-term, low-interest loans on which repayment does not begin and interest does not accrue while the borrower is enrolled as a student, on at least a one-half time basis, at a college or university. Repayment of principal and 3% annual interest begins 9 months after the student leaves college. There are cancellation provisions of the National Direct Student Loan under which a student may have up to the total amount of the loan cancelled by teaching in special education, in certain schools with a high enrollment of students from low-income families, or in Head Start programs.

FEDERAL INSURED STUDENT LOANS

Under this program, sponsored jointly by the Federal Government and the State of Tennessee, a Tennessee resident may receive long-term, low-interest loans from a participating bank or other lending institution to apply toward expenses related to education. Repayment, at 7% simple interest, begins 9 months after graduation or withdrawal from school. While the recipient remains enrolled, any interest is paid by the federal government.

Loans are usually made by the student's hometown bank or any other lending institution where the student or family is known. Application forms and information concerning the names of participating institutions are available in the Roane State Office of Financial Aid.

PART-TIME EMPLOYMENT

COLLEGE WORK-STUDY PROGRAM

Under the College Work-Study Program, funded jointly by college and federal funds, students may work on a part-time basis in order to help finance their education. Students who qualify for participation in this program may work up to 20 hours per week during the academic year when classes are in session or up to 40 hours per week when classes are not in session. During summer quarters, students may work up to 40 hours per week if they intend to enroll in the following fall quarter. Minimum rate of pay is the prevailing minimum wage (currently $2.65 per hour). The type of employment varies depending upon the skills and the department in which the student is working. An effort is made to assign students jobs in areas in which they are interested such as faculty and
administrative offices, various laboratories, the library, maintenance and security, and other areas which can effectively supervise and utilize students' help. The college regards this work experience not only as a source of supplementary income but especially as an opportunity for the student to learn dependability, initiative, and the importance of a good work record.

**HOW TO APPLY FOR FINANCIAL AID**

All federal financial aid programs require the assessment of financial need, which is based on parental ability to contribute toward educational expenses. In addition to the College's application, a student should complete either the Parents' Confidential Statement of College Scholarship Service or the Family Financial Statement of the American College Testing Program. These two forms are available from the College or from high school guidance offices. Students may use the ACT or PCS form to apply for the Tennessee Student Assistance Award and the Basic Educational Opportunity Grant but the application must be submitted on or before May 15th of each year. June 1 is the priority date for applying for aid. After this day aid will be awarded on a first-come, first-served basis as long as there is money available. A student must be fully admitted to the College before aid will be awarded although students may participate in the College Work Study Program during the summer prior to admission the following fall quarter.

Information regarding student financial aid may be obtained by contacting the Office of Scholarship and Financial Aid. Renewal of aid is not automatic. Each student must file a new application each year.

**VETERANS AFFAIRS**

Roane State Community College cooperates with the Veterans Administration in providing educational opportunities for veterans. The Director of Veterans Affairs at Roane State is available for help in determining eligibility, selection of a major, preparing the required form for VA benefits, or any other matters pertaining to college attendance under the "G. I. Bill." Veterans who have not completed high school or who do not have a high school equivalency diploma should contact the Director of Veterans Affairs for help in planning their program of study for admission to Roane State.

Veterans desiring to attend Roane State under any of the educational assistance laws administered by the Veterans Administration should contact:

<table>
<thead>
<tr>
<th>Director of Veterans Affairs</th>
<th>Veterans Administration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roane State Community College</td>
<td>Regional Office</td>
</tr>
<tr>
<td>Harriman, TN 37748</td>
<td>110 Ninth Avenue South</td>
</tr>
<tr>
<td></td>
<td>Nashville, TN 37203</td>
</tr>
</tbody>
</table>

Once enrolled, veterans and other eligible persons should maintain close contact with the Office of Veterans Affairs. Information important for personal and educational plans is frequently received from the Veterans Administration. Veterans and other eligible persons are eligible to receive educational benefits under Title 38, U.S.C., (the "G. I. Bill") only when classified as a regular degree student or an adult special-veteran. Other classifications, i.e., special student-credit and student non-credit (see pages 28 and 29), are not qualifying. The progress of each adult special veteran student will be evaluated at the end of each quarter. Those students making satisfactory progress as reflected by class attendance and participation, grades achieved, and the opinions of the respective teachers will be retained in the program. Those making unsatisfactory progress will be excluded from the program. Those who demonstrate ability to carry the college level courses required by their major may be admitted as regular degree students.
Current Veterans Administration regulations require that veterans classified as regular degree students maintain the prescribed cumulative GPA listed on page 36. In addition, the Veterans Administration limits the enrollment of a veteran to eight full-time quarters for those majors requiring 99 hours. Additional quarters are allowed for those majors requiring more than 99 hours. The Veterans Administration also requires those veterans who accumulate more than 12 hours of "F" grades to be reported for purpose of counseling. Benefits will be terminated until the veteran is counseled by a VA counselor and approval given for continuation of studies.

Courses for which the veteran and other eligible persons have received a passing grade, either at Roane State or transferred from another institution, may not be claimed for pay the second time. Courses in which the veteran and other eligible persons receive a grade of "F" may be repeated and claimed for pay. Elective hours beyond those allowed by the curriculum of the declared major or courses taken for audit may not be claimed for pay. Only those courses which count toward the veteran's declared major may be claimed for pay. A claim form for such courses must be completed each quarter and filed with the Veterans Affairs Office. Course substitution must be processed and approved as described on page 35 before the substituted course is claimed for payment.

Educational benefits will be terminated for those courses in which the veteran and other eligible persons have excessive, unexcused absences. This does not affect the right of the student to continue attending the course, provided he/she has been properly enrolled.

Veterans and other eligible persons desiring educational benefits under the "G.I. Bill" must file a claim form with the Veterans Affairs Office at the time of pre-registration each quarter. The claim form must be adjusted to reflect any further changes in the class schedule.

Further information is available at the Veterans Affairs Office.

**CETA CONSORTIUM**

In 1975, Roane State initiated a new program, funded under the Comprehensive Employment and Training Act (CETA), of training and offering financial assistance to a limited number of qualified students. The program provides academic training costs, part-time employment, and an allowance for travel to and from classes and work assignments. Based at Roane State, the program represents a consortium serving students in 42 counties at four community colleges across the state. The program is an integral part of the overall college experience and is coordinated through offices at the Roane State campus.
Student Services

Student Services comprise all the non-instructional services which Roane State Community College provides for its students. These services include academic, social, vocational and personal counseling, as well as financial aid, health services, and transfer assistance.

ORIENTATION FOR STUDENTS

All new students meet before Registration for Fall Quarter for the orientation program. One purpose of orientation is to introduce students to administrative officers and other student leaders. Another purpose is to help acquaint students with the campus and its facilities. The orientation activities are coordinated by the Student Personnel Services Office and are executed with the assistance of faculty members and Student Government Personnel.

COUNSELING AND TESTING CENTER

The Counseling Center was established to aid students in successfully completing their college work and establishing good foundations for future growth. The center is staffed by professionally trained counselors who provide services for a wide range of problems—educational, vocational and personal.

Confidentiality of counseling visits is assured so that students may feel free to discuss their concerns. Counselors also provide opportunities for students to develop interpersonal skills and to become more self-actualized using individual counseling, small group techniques, and courses in human development. Situations which cause students undue concern may disrupt their interpersonal relations and affect academic achievement. The Counseling Center provides the assistance and atmosphere to work through these problems.

Counseling may include aptitude, interest, achievement or personality tests as requested by the student. The Counseling Staff may also assist the student in securing services outside the College. A collection of occupational information materials and catalogs from various institutions is available in the center for student use.

GED TEST

Adults who have not received a high school diploma and wish to apply for a certificate of equivalency may take the General Educational Development Test at Roane State Community College, which has been established as an official center for this test. A counselor will explain requirements for taking the test and will assist applicants in the preparation of necessary application forms.

Satisfactory scores on the test enable the person to apply to his/her high school for an equivalency diploma. Persons who feel inadequately prepared to take the GED test can obtain assistance by taking a course entitled GED Preparation for High School Equivalency Diploma at the college.

ACT TEST

Roane State Community College serves as an area test center of The American College Testing Program (ACT). Tests are given on each of the national testing dates.

CLEP

The College-Level Examination Program (CLEP) gives students the opportunity to obtain college credit by examination. For information concerning CLEP at Roane State, contact the Counseling Center.
PLACEMENT SERVICE

The Placement Office provides assistance in securing positions for students and graduates of RSCC and maintains contact with alumni, business and industrial clients. Candidates for a degree are required to file a personal data sheet with the Placement Office prior to graduation. It is recommended that this be completed at the time an Intent to Graduate form is filed with the Office of Admissions and Records.

The Placement Office also aids students in finding full-time, part-time, or summer employment. Students who are seeking employment are encouraged to visit the office which is located in the Student Personnel Offices.

HEALTH SERVICES

The health and safety of students is a concern of the Student Personnel Services Office, and the requirement of a health examination prior to entrance is enforced. A clinic is maintained for student use in case of illness or accident occurring during the school day. A registered nurse is in charge to administer first aid and palliative treatment in minor illnesses. A local physician, designated as the college doctor, will be available for major problems. Since the College does not collect a medical fee, each student is responsible for his/her medical bills. Appointments with the director of the clinic can be made for interviews concerning special health problems. Instruction in personal health is given in appropriate health courses.

STUDENT ACCIDENT AND SICKNESS INSURANCE PLAN

This plan provides protection 24 hours per day during the term of the policy for each student insured. Students are covered on and off campus, at home, and while traveling between home and school during interim vacation periods. Coverage is extended to provide up to 48 hours of actual travel time while enroute between home and school prior to the opening of school.

Application and claim forms may be obtained in the office of the Dean of Student Personnel Services.

TRAFFIC REGULATIONS

Registration of vehicles. All motor vehicles operating on the Roane State Community College campus must be properly registered. Vehicle registration should be completed during the process of academic registration. This campus sticker must be displayed in the manner prescribed in the instructions given each registrant. If late registration is necessary, details may be obtained from the Office of the Dean of Students.

Detailed regulations are contained in the "Student Handbook." It shall be the student's responsibility to familiarize himself/herself with these regulations and to abide by them.

HOUSING

Under State Board of Regents policy, Roane State Community College assumes no responsibility for student housing. This institution is primarily a commuting college and has no dormitories, fraternity or sorority houses. The local news media and real estate agencies are able to provide comprehensive listings of rental housing available. Individual students are responsible for making arrangements to rent these facilities from owners or their agents.

Students are required to register local addresses in the Admissions and Records Office for location purposes. Any change of address must be reported to the Admissions and Records Office. Failure to report a change of address subjects the student to disciplinary action.
SOCIAL RETENTION STANDARDS

A student who fails to conduct himself/herself in an acceptable way may receive disciplinary dismissal; or, if the proper committee sees fit, he/she may be placed on disciplinary probation for an indefinite period of not less than one quarter. A student on disciplinary probation must meet stated requirements of his/her probation and be again reviewed by the committee before being removed from disciplinary probation standing.

The Raider baseball team warms up on the gym floor before practice.
Activities

A well-rounded, integrated program of student activities is provided through student organizations. Students may choose from a variety of organizations depending upon their individual interests. These organizations include scholastic honoraries, departmental groups, service organizations, and special interest groups.

FINE ARTS

Concerts, lectures and special cultural events are sponsored by the College and the community for the enrichment of the college and community.

CLUBS AND ORGANIZATIONS

State Supported Organizations

CIRCA—The college news magazine edited and published by students during the year for the expression of student opinions, to inform students and staff of upcoming events both on and off the campus, and to release other information pertaining to or of interest to the students. The magazine is published under the advisement of the College Publications Committee, with a faculty advisor working closely with the staff of the magazine. The Publications Committee selects the Editor and Assistant Editor from applicants desiring to work in those positions.

STUDENT GOVERNMENT ASSOCIATION—The SGA provides opportunities for students to offer constructive opinions, thereby promoting cooperation among students, faculty and administration and working for the common good of Roane State by assisting in the promotion of social activities and special projects on the campus.

Clubs

ALUMNI ASSOCIATION—The Alumni Association is an organization which aids RSCC in realizing its objectives by promoting the advancement of the educational, social, and economic interests of RSCC, its students, faculty, administration, friends, and alumni.

BSU—The BSU promotes interfaith as a way of life among college students. It provides a ministry to individuals in the campus community who have need for a personal relationship with Jesus Christ or who have a need for Christian growth.

CHESS CLUB—To meet together in friendship to play chess.

CIRCLE K—An international organization open to all students which promotes the adoption of high social, business, and professional standards through service to the campus and the community. It is affiliated with Kiwanis International.

COAL MINING TECHNOLOGIES OF AMERICA—CMTA combines the mutual efforts of students and staff in the advancement of educational knowledge about and employment opportunities in the fields of mining and reclamation technology.

DRAMA CLUB—The Drama Club is responsible for presenting plays on the Roane State campus.

FORENSIC CLUB—The Forensic Club promotes competition in areas of debate, impromptu, extemporaneous, and after-dinner speaking.

GAMMA BETA PHI—A national honor society which encourages scholastic effort and rewards academic merit, stands for and promotes worthy character and high ideals, and fosters, disseminates, and improves education through appropriate service projects.
LITERARY CLUB—The Literary Club organizes and assists financially a literary magazine and promotes interest in the literary efforts of the students of Roane State and the surrounding community.

PAC—The Political Awareness Club brings students into contact with various political philosophies to provide them an opportunity to find political expression and recognition as well as to gain insight as to how our political democracy operates, how to effectively work for change within the system, and how day-to-day operations of the system affects both foreign and domestic affairs.

PHI BETA LAMBDA—Phi Beta Lambda is a national organization open to all students enrolled in business office or teacher education programs at the college. Its aim is to help develop vocational competencies among those students who accept the purposes of the organization and subscribe to its creed.

ROTARACT CLUB—The Rotaract Club is an international organization open to all students to develop leadership and responsible citizenship through service to the community, and to advance the cause of international understanding and peace, and to promote recognition and acceptance of high ethical standards as a leadership quality and vocational responsibility.

VETERANS CLUB—The Veterans Club provides a means whereby veterans can meet for social purposes and keep abreast of current legislation and regulations affecting veterans’ educational benefits but, especially, to provide a means for veterans to continue serving their college, community, and nation.

INTRAMURALS

The Office of Student Activities conducts a diverse program of activities to provide students and staff the opportunity to participate in organized individual and team activities. The program does not require the intensified training and high degree of skill normally associated with varsity and/or professional competition. An individual’s playing ability is not considered as important as the desire to enter into the true spirit of competition for the purpose of fun and relaxation. Participants, however, are expected to display good sportsmanship at all times.

The intramural program includes physical activities such as volleyball, flag football, basketball, and softball as well as less strenuous pastimes like chess, spades, and other card and table games. The final authority on all matters concerning intramural competition is vested with the Intramural Director.

In order to be eligible each participant must (1) be a bonafide student or staff member at RSCC; (2) not be a member of any varsity team competing in that sport intercollegiately; (3) not have played that intramural sport either professionally or semi-professionally. Participants who have previously competed in intercollegiate varsity competition in that sport may be eligible under certain restrictions.

RSCC can not assume responsibility for any injury(ies) incurred during practice for or participation in any of its intramural/recreational activities beyond the coverage extended to all students by Health Services.

ATHLETICS

Roane State competes in men's and women's basketball and tennis and men's baseball and golf as a member of the Eastern Division of the Tennessee Junior College Athletic Association.

In order for a student to participate in athletics, eligibility requirements of the National Junior College Athletic Association must be met. Any inquiries about athletics should be directed to the Department of Athletics located in the gymnasium.

All RSCC students will be admitted to athletic contests upon presentation of a validated student identification card. An admission charge of $1.00 will be assessed all non-students.
PLANNING AN EDUCATIONAL PROGRAM

The responsibility for selecting an educational program rests with each student. The faculty and counselors take pride in assisting students in program planning and course selection. All students will be assigned an appropriate faculty advisor to assist them in their programs of study.

Students who are entering college for the first time and who will be full-time students (taking course loads of 12 quarter hours or more) are required to take a battery of placement tests before they register for their first quarter at Roane State. These tests, administered by the Counseling Center, are designed to be used by faculty advisors in helping students plan appropriate courses of study. Students who score below a tenth grade reading level on the Nelson-Denny Reading Test are required to take REA 1010 during their first quarter of enrollment at Roane State.

Some students may be required to meet further prerequisites to enter the program they select. In the best interests of the student, admission to a particular curriculum or to specific courses should be based upon evidence which would indicate a fair chance of satisfactory performance in the program or course.

Students who are planning to transfer from Roane State at the conclusion of two years' work to a four-year institution should secure a copy of that institution's catalog to use in planning their transfer program.

ATTENDANCE REGULATIONS

1. Attendance of classes and other official appointments is required.
2. An explanation of absences should be given to instructors. This information should be presented in advance if possible.
3. Absences are counted from the first scheduled meeting of the class.

IMPORTANT: Non-attendance does not constitute a withdrawal from classes or from the College. Procedures to follow to formally drop a course (see page 34) or to withdraw from the College (see page 37) must be followed. IT MAY PREVENT YOUR RECEIVING AN UNDESIRED "F" ON YOUR TRANSCRIPT.

OBJECTIVES OF THE CURRICULUMS

The two-year programs of study available at Roane State Community College are described in the following pages. The four objectives of the curriculums are (1) to prepare students for advanced standing in other colleges and universities after successfully pursuing a Roane State Community College program; (2) to prepare students for entrance to certain professional schools whose admission requires one or two years of college experience prior to enrollment; (3) to offer a continuity of courses to give students an opportunity to explore interests and abilities in several fields of study so that they may plan more realistically for the continuation of their education; and (4) to prepare students to enter technological areas which require additional education beyond high school.

Students planning to transfer into special programs at senior institutions should work with the faculty advisor, using the appropriate check sheet of the institution to which they will be transferring.

DEGREES OFFERED

Roane State Community College awards the Associate of Arts Degree and the Associate of Science Degree. (A Certificate of Proficiency may be awarded to a student who completes any prescribed program of less than an Associate Degree.)

GENERAL DEGREE REQUIREMENTS

The general requirements for an Associate Degree at Roane State Community College are as follows:
1. Not less than 99 quarter hours of credit.
2. A minimum of 36 of the final 48 quarter hours of coursework completed in residence at Roane State Community College.

3. A minimum over-all quality point average of 2.00 ("C") on all work attempted at Roane State Community College. In no case may transferred grades be used to raise the student's quality point average on courses taken at Roane State Community College; his/her average on all courses here must be "C" (2.00 or better).

4. Completion of specific course requirements as given in outlined Programs of Study. (Substitutions in programs must be approved by the Dean of Instruction.)

**CORE CURRICULUMS**

The general (transfer education) core curriculum below is for students primarily planning to transfer to senior institutions immediately upon graduation from Roane State Community College. The career education core curriculum below is primarily for students planning immediate employment upon graduation. The minimum expectation for graduation in a particular program is outlined on the following pages of the Degree and Certification Programs section.

The establishment of two core curriculums for Roane State Community College provides flexibility for the "undecided major" student to change course objectives and to redirect his/her academic pursuits without undue penalty and hardship. The two cores are as follows:

**GENERAL CORE CURRICULUM**

<table>
<thead>
<tr>
<th>Area of Study</th>
<th>Minimum Quarter Hours Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Composition</td>
<td>9</td>
</tr>
<tr>
<td>Humanities (To include six hours of literature)</td>
<td>12</td>
</tr>
<tr>
<td>American History</td>
<td>9</td>
</tr>
<tr>
<td>Natural/Physical Science¹</td>
<td>12</td>
</tr>
<tr>
<td>Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>Physical Education Activities²</td>
<td>3</td>
</tr>
</tbody>
</table>

¹Requirement must be met from the same sequence. Student may select Biology, Chemistry, Geology, Natural Science, or Physics.

²Students completing a majority of their courses in the evening or at off-campus locations other than Oak Ridge may substitute a three-hour health or recreation course (one not required by their degree program) to fulfill this requirement. A petition for substitution must be filed with the office of Admissions and Records.

**CAREER EDUCATION CORE CURRICULUM**

<table>

</tr>
</tbody>
</table>

¹Students completing a majority of their courses in the evening or at off-campus locations other than Oak Ridge may substitute a three-hour health or recreation course (one not required by their degree program) to fulfill this requirement. A petition for substitution must be filed with the office of Admissions and Records.

**LIBRARY**

The library serves, primarily, the students and faculty of the college and, secondarily, members of the surrounding communities. In its collection of books, periodicals,
microfilm, recordings, and other audio/visual material the library makes available resources to support the curriculum and to provide for recreational reading.

Hours are 7:45 a.m. to 10:00 p.m. Monday through Thursday and 7:45 a.m. to 5:00 p.m. on Friday. Special additional hours will be announced. Members of the library staff are available whenever assistance is needed.

The Library of Congress classification system is used and books are shelved in open stacks for self-service. Books may be checked out for a two-week period with renewal privilege. No fines are charged for overdue books, but all overdue books are subject to recall at any time by the Librarian. Borrowers are responsible for replacement of lost or damaged materials.

Interlibrary loan service is available to all patrons so that material not owned by the Roane State library may be borrowed from another library. Information is available from any member of the library staff.

Gifts to the library are welcomed. However, the library staff reserves the right to (1) evaluate the usefulness of the gift prior to its acceptance, (2) use the gift in any manner that will be most beneficial to the library and (3) at the discretion of the Librarian, discard any gift that is no longer useful. The Librarian welcomes recommendations on the purchase of new material from both students and faculty.

LEARNING LABORATORY

The main purpose of the Learning Lab is to personalize instruction by providing unique and individualized learning situations for all students. This room contains the latest equipment in audio-visual techniques including tape-recorders, slide viewers, film strip and film loop viewers and computer-assisted instruction. These resources are available for use by all Roane State students, faculty and staff.

The Learning Lab is located in C-225 next to the computer center. Hours are posted on the door each quarter.

CONTINUING EDUCATION PROGRAM

Roane State Community College is dedicated to the philosophy that education is a never-ending process; it continues throughout the lifetime of an individual. Thus, the college makes every effort to offer the advantages of at least part of its total program to every person in the community who can benefit from the experience. Continuing Education includes courses from the five divisions of instruction in the college and is an integral part of the total academic program of the college.

Evening Courses

The evening program at Roane State Community College is more than a separate series of night classes designed for students beyond the traditional college age. The College instead offers a full selection of courses from 8:00 a.m. until 9:15 p.m., enabling students of all ages to schedule classes at times convenient and suitable to their needs. Roane State Community College believes that the resulting association of older students, having a background of work and life experiences, with recent high school graduates is mutually beneficial.

Two full years of college training can be completed during the evening, and the requirements can be met for many of the Associate of Arts or Associate of Science Degrees. Evening students must meet the same degree requirements as those attending day classes (with the exception of physical education, which may be waived under certain conditions). Experienced advisors and counselors are available to those evening students desiring help in planning a degree or a certificate program.
Off-Campus Courses

Roane State Community College also offers both day and evening classes in many locations throughout its service area. Classes are offered in off-campus locations for the benefit and convenience of students in its large service area, giving many students a chance to continue their education who would otherwise be unable to because of time or travel restrictions. These classes are staffed by qualified instructors from the academic divisions of the college and are of equal quality to the same courses on campus. Nearly all courses offered on campus can also be offered off-campus, with the exception of certain courses requiring special equipment. Most of the requirements for many Associate of Arts or Associate of Science Degrees can be completed at off-campus locations. Experienced advisors and counselors are available to off-campus students desiring help in planning a degree or a certificate program.

COMMUNITY SERVICES PROGRAM

In addition to credit courses, special non-credit courses reflecting community interest may be organized at the request of a sufficient number of interested persons. Individuals may pursue these special offerings for personal enrichment, to comply with business or industrial opportunities and/or requirements, for specific technological information and for general cultural benefits. Students taking courses for non-credit are not required to follow the same admissions procedures as those students in degree courses.

The Community Service Program of the college includes a variety of activities which are offered in cooperation with community groups and agencies. The program offerings are in accord with the public's needs and interests and include such activities as lectures, clinics, short courses, conferences, forums, concerts, fine art festivals, workshops, institutes, community utilization of college facilities, self-development functions and community development functions. The college welcomes the opportunity to meet with representatives in our community (e.g. educational, governmental, industrial and business organizations) to plan special types of training or activities that might be beneficial to their organization or to our community.

All inquiries in the area of community service non-credit courses should be directed to:
Director of Community Services
Roane State Community College
Harriman, Tennessee 37748

Inquiries concerning credit courses should be directed to:
Director of Admissions and Records
Roane State Community College
Harriman, Tennessee 37748

COOPERATIVE EDUCATION PROGRAM

Cooperative education assumes the concept that work experience should be an integral part of the student's total education. The opportunity to engage in productive employment under the competitive conditions of life in a realistic adult environment can provide the student with insights that enrich the educational experiences. Practical experience offered at a time when the individual is at the peak of learning capacity adds relevance to education. Cooperative education integrates classroom learning and work experiences into a total learning program.

Cooperative education applies to both the transfer curricula and the Career Education curricula. The only difference is the time phasing of the work experiences into the learning program and some administrative details. In both cases the student must complete the same course work as the non-cooperative learning student and the work experiences are related as closely as possible to the student's curriculum.
TRANSFER PROGRAMS

College transfer curriculums are designed for students who intend to transfer to senior institutions. A student who is planning to transfer from Roane State Community College to a four-year institution should secure a copy of the catalog of the four-year institution selected and have it available during the registration period for use in planning his/her transfer program.

CAREER EDUCATION

The expanding economy and the increased emphasis upon scientific research and development have brought about an ever increasing demand for the well educated person to work with and under the supervision of the scientist, the engineer, the doctor, and the management of the business world. The responsibilities of this person, educated in the broad spectrum of the technologies, will continually be confronted with the acquisition of new competencies as this nation becomes more industrialized and new job classifications emerge. These new jobs are requiring education at the college level.

The gap between the skilled craftsperson and the professionally trained person has become more pronounced. Communication between these two areas is becoming more and more difficult. The semi-professional person, educated in the technologies, will bridge the existing gap. He/she may work with the scientist or engineer as a laboratory assistant or on some special assignment involving the skills of the skilled craftsperson. He/she may work with the medical profession as a technically trained person in the many areas that now exist in medical science. He/she may work as a specialist in the complex business areas.
The career education programs at Roane State Community College are in the areas of accounting technology, administration technology, coal mining technology, computer science technology, dietetic technology, electronics technology, engineering technology, fire science technology, general business administration, general clerical, management and supervision technology, medical record technology, police science, radiologic technology, recreation management, and secretarial science. The programs are constructed so that the student may seek employment at the completion of his/her program or transfer to a four year institution for upper level training.

DEGREE AND CERTIFICATION PROGRAMS
The following pages contain, in outline form, the degree and certificate programs of study and the summaries of required hours for all of the programs mentioned above.
DEGREE PROGRAMS
TRANSFER PROGRAMS

ASSOCIATE OF ARTS/SCIENCE

This program is designed for students who desire to transfer to a four-year institution. With the addition of one of the options listed, this program meets the requirements for the associate degree at Roane State Community College.

TOTAL 48

1If not specified in option selected, student may choose any courses offered in Humanities Division.
2If not specified in option selected, student may choose any course offered by the Mathematics Department.
3If not specified in option selected, student may choose any science sequence. Requirement must be met from the same sequence.
4Students completing the majority of their courses in the evening or at off-campus locations other than at Oak Ridge may substitute one three hour health or recreation course (one not required by their degree program) to fulfill this requirement. A petition for substitution must be filed with the Office of Admissions and Records.

ART OPTION

The art curriculum is designed primarily for the general enrichment of the student as well as providing professional art and liberal arts course work for transfer to a four-year institution. This program is designed to develop fundamental skills in technique and creative expression. An art major planning to transfer to a senior institution should plan a program to meet specific requirements of the lower division at the chosen institution. The art department reserves the right to retain student work for exhibition.

BIOLOGY OPTION

The biology curriculum is designed for the student planning to complete the baccalaureate degree at a four-year institution. This program generally meets the transfer requirements for students entering any one of the state's major universities. Before entering this plan of study, each student should become acquainted with any pre-transfer requirements the receiving institution may stipulate. The current job market gives highest priority to the graduate degree in biology.

TOTAL 99

*Students with at least two years of high school biology or satisfactory ACT scores may, with permission from the Math-Science Division, omit Biology 1110, 20, 30 and enter BIO 2610, 20, 30 directly (see course listings under Biology). If BIO 2610, 20, 30 are elected, CHE 2310, 20, 30 are recommended as electives.
Recommended electives might include additional biology or math, geography, physics, organic chemistry, economics, or psychology.

BUSINESS ADMINISTRATION OPTION

The business administration program includes professional studies and courses in the liberal arts. Upon completion of this two-year program, the student may then transfer to a senior institution to complete the requirements for the baccalaureate in accounting, business management, or related fields.

This curriculum is designed to provide an alternative in required course work for elementary education and provide a student with a terminal degree. This program will, in part, meet the lower division requirements for transfer to a four-year institution granting the baccalaureate degree in elementary education. All of the courses should benefit the student who desires employment as an elementary teacher aide.

NOTE: Each student in this program will be required to select one physical education activity course from each of the following areas: team activity, individual activity, and dance activity.

### GENERAL OPTION

With an appropriate choice of electives, a student can, by following this general program, earn an associate degree from RSCC and also complete the lower division requirements for the baccalaureate at a four-year institution. Students who are interested in a profession such as law, agriculture, architecture, advertising, etc. should select this option.
HEALTH, PHYSICAL EDUCATION AND RECREATION OPTION

The health, physical education, and recreation curriculum is designed to meet the needs of a student who desires to transfer to a senior institution and complete a baccalaureate degree with a major or minor in this area. This program is also designed to help a student maintain the best possible physical, mental, and social well-being. The degree program will be planned by subject area advisor in line with the state certification and the catalog requirements of the senior institution.

### MUSIC OPTION

A music major planning to transfer to a senior institution should become familiar with the specific lower division requirements at that individual senior institution. The curriculum in this degree is designed to give the performing music major a sound basis for continuing music study at a senior institution.

**NOTE:** All music majors must have a major applied area at the college level; all music majors must pass a piano proficiency examination equivalent to two years of college piano; all music majors must attend all solo classes and other selected performances.

### PRE-MEDICINE, PRE-DENTISTRY, PRE-PHARMACY OPTION

This unified basic curriculum in pre-medicine, pre-dentistry, and pre-pharmacy is designed to prepare a student for entrance into a professional school, such as The University of Tennessee or a similar institution, where admission requirements are two years of college experience. Medical college usually requires three or four years of college experience. A student at Roane State Community College should consult the catalog of the university of his/her choice to determine specific requirements for admission.

---

\(^1\)Students with at least two years of high school biology or satisfactory ACT scores may, with permission from the Math-Science Division, omit Biology 1110, 20, 30 and enter Biology 2610, 20, 30 directly (see course listings under Biology). If Biology 1110, 20, 30 are elected, Biology 2610, 20 are recommended as electives. If BIO 2610, 20 are elected, one year of foreign language is also recommended.
PRE-NURSING OPTION

The pre-nursing curriculum is designed for the student planning to complete the baccalaureate degree at a four-year institution. This program meets the transfer requirements of students entering the junior year of study at the University of Tennessee at Knoxville. Before entering this plan of study, the student should become knowledgeable of specific pre-transfer requirements of other transfer institutions. Since many programs accept a limited number of applicants early in the school year for the next year's class, application should be made at the conclusion of the freshman year at Roane State.

SECONDARY EDUCATION OPTION

The secondary education curriculum is designed for the student who wishes to take the first two years of a program toward certification. This option will meet the lower division requirements for transfer to a four-year institution granting the baccalaureate degree in secondary education. A student may transfer to a senior college and complete requirements for state certification.

TOTAL 99

\(^1\)MUS 1010 may be substituted for ART 1010.
\(^2\)Students planning to teach mathematics should take a higher mathematics sequence.
\(^3\)Electives should be concentrated in the area of certification.

SOCIAL SCIENCE OPTION

The social science curriculum is designed to assist students planning to complete the baccalaureate degree at a four year institution in any one of the following areas: geography, history, political science, psychology, and sociology. In order to meet lower division requirements for transfer to any one of the state's major universities, students should select social science courses from their choice of emphasis and related social science disciplines. Students should also follow the advice of their social science faculty advisor and become acquainted with any pre-transfer requirements the receiving institution may stipulate.

TOTAL 99

\(^1\)Students planning to pursue a Bachelor of Arts degree should take one year of foreign language instead of 3 hours in sophomore literature, 3 hours in humanities electives, and 3 hours general electives.

SPECIAL EDUCATION OPTION

The special education curriculum is designed for a student who wishes to take the first two years of a program toward certification. This curriculum will meet the lower division requirements for transfer to a four-year institution granting the baccalaureate degree in special education. A student may transfer to a senior college and complete requirements for state certification.

COMPUTER SCIENCE TECHNOLOGY

The technical society of today is in a state of constant change brought about by automation and technological innovations. The computer is one of the greatest contributors to automation of this decade and also one of the decade's most significant technological achievements. The growth and development of the electronic computer in this decade has created many new jobs in the scientific, engineering, and business fields. The Computer Science Technology curriculum is designed to prepare students to enter into any of these computer related fields.

Two options are offered in Computer Science Technology at Roane State Community College: (1) a scientific computer option, and (2) a business computer option. The scientific option is designed for students interested in scientific and engineering applications of the computer, while the business option is designed for students interested in business data processing.

The Computer Science Technology curriculum has as its primary objectives:

(1) The task of qualifying the student for a successful career as a programmer, systems analyst, or assistant computer center manager if his/her respective option is business, through the orderly presentation of programming languages, business, and managerial courses.

(2) The task of qualifying a student for transferring to a four-year school which has a major in computer science, if he/she chooses the scientific option.

DIETETIC TECHNOLOGY

The Associate of Science degree program in Dietetic Technology and Food Service Management provides students with an opportunity to study dietetics at the college level. The curriculum combines general education and technical courses with supervised field work. This program is six quarters in length and is designed to train dietetic technicians who can promote nutritional care and improve food service in hospitals, nursing homes, restaurants, and a variety of other settings. The concept of a two-year training program for dietetic technicians is fully endorsed by the American Dietetic Association.

ELECTRICAL AND ELECTRONICS TECHNOLOGY

The Electrical and Electronics Technology program is intended to prepare the student to meet the needs of and to be ready for advancement in construction, manufacturing, installation and service as it applies particularly to industrial, residential and commercial activities. This course is not intended to prepare the graduate to be an engineering technician.

TOTAL HOURS 100
THE PRIMARY OBJECTIVES OF THE ENGINEERING TECHNOLOGY PROGRAM ARE TO PROVIDE STUDENTS WITH: (1) THE BASIC BACKGROUND INFORMATION TO UNDERSTAND THE ENVIRONMENT IN WHICH THEY WILL WORK (2) THE TECHNICAL TRAINING AND EXPERIENCE NEEDED TO BE PRODUCTIVE AT JOB ENTRY LEVEL, AND (3) THE EDUCATIONAL FOUNDATION NECESSARY TO UNDERTAKE FURTHER STUDY. OTHER OBJECTIVES INCLUDE THE RE-TRAINING AND UPGRADING OF PEOPLE ALREADY EMPLOYED.

ENGINEERING TECHNOLOGY DEGREE OPTIONS ARE AVAILABLE IN CIVIL, ELECTRICAL, CHEMICAL, MECHANICAL, AND NUCLEAR FIELDS. TWO CERTIFICATE PROGRAMS RELATED TO CIVIL ENGINEERING ARE AVAILABLE WHICH ARE (1) DRAFTING AND DESIGN, AND (2) SURVEYING.

The Fire Science Technology program is designed to prepare students for initial entrance into employment or advancement with municipalities, industrial firms, or other employers requiring Fire Protection option trained personnel. Graduates may also be employed by insurance companies as sales personnel, fire insurance adjusters, or bureau raters who require Fire Service option trained personnel. Students who plan on transferring for advanced study to UT-Nashville or other colleges leading to a BS degree will want to take the Fire Science option. This program has been approved by the Tennessee Commission on Fire Fighting Personnel Standards and Education.

SUMMARY OF REQUIRED HOURS  

CORE REQUIREMENTS  
CHE 1110, 20  General Chemistry I, II ................................. 8  
CST 1010  Introduction to Data Processing ............................ 3
The Fire Science Option is designed for a student who plans to complete a Baccalaureate Degree (B.A. or B.S.). This program is designed to develop fundamental knowledge and skills in Fire Science. A Fire Science major planning to transfer to a senior institution should plan a program to meet specific requirements of the chosen institution.
## MEDICAL LABORATORY TECHNOLOGY

The Medical Laboratory Technology program provides students with the opportunity to study the medical laboratory sciences. The curriculum combines general education and science courses with clinical laboratory courses and clinical laboratory experience. The certified Medical Laboratory Technician is qualified to perform diagnostic tests in the medical laboratory.

MEDICAL RECORD TECHNOLOGY

The Medical Record Technology program emphasizes specialized skills in the management of medical records. The medical record technician helps to provide accuracy and efficiency in the management of the patient's records. In smaller health facilities, the medical record technician is in charge of the medical record room. Application of the didactic instruction is provided through clinical experience in local health facilities. The program is accredited by the AMA Committee on Allied Health Education and Accreditation, in collaboration with the American Medical Record Association.

### MINI/MICROCOMPUTER SERVICE TECHNOLOGY

The Mini/Microcomputer Service Technology program is a broad based, high technology curriculum designed to prepare graduates for multi-point entry into the rapidly growing mini-computer market.

The primary objectives of the program are (1) to offer a technical curriculum for the development of student competency in computer service technology; (2) to provide high level training in the principles and concepts of mini/microcomputer technology; (3) to develop advanced techniques in the service and maintenance of minicomputers and the associated peripheral devices within the computer system; and (4) to provide state-of-the-art computer equipment for hands-on training to support classroom and text material.

OPERATING ENGINEERING TECHNOLOGY

The primary objective of the Operating Engineering Technology Program is to train two-year technicians for employment in one of the four options offered: Grading and Paving Equipment Operator, Plant Equipment Operator, Heavy Duty Repairman, or Universal Equipment Operator.

Other program objectives include re-training and upgrading of employees working in one of these fields of operating engineering.

Students entering the Police Science and Criminology Education program will now be required to satisfactorily complete six core courses in Criminal Justice, (18 quarter hours) after which they must select either a law enforcement or corrections option. Both options will provide students with an additional fifteen quarter hours (4 courses) of specialized study.

RADIOLOGIC TECHNOLOGY

The Radiologic Technology program prepares an individual to accept staff responsibilities associated with X-ray technology. The program requires eight quarters to cover the 2400 hours of clinical experience required by the Joint Review Committee of the American Medical Association. Intersessions of two weeks are given between the summer and fall quarters. The radiologic technology courses are offered at Cumberland Medical Center, Crossville, TN. Graduates are eligible to take the Registry Examination which certifies them as Radiologic Technologists. The program is fully accredited by the American Medical Association.

RECREATION MANAGEMENT AND ADMINISTRATION TECHNOLOGY

The Recreation Management and Administration Technology program leadership curriculum has been designed to provide the postsecondary student with: (1) the basic background information required to understand the environment within which he/she will work, (2) the broad technical training and minimum experience necessary to be a productive employee in an entry-level job, and (3) the educational foundation needed to undertake further study within the field through in-service training, professional short courses, or—to a limited extent—enrollment in a four-year program.

The Recreation Management and Administration program employs a basic core of recreation courses. After taking the basic core courses, students are allowed to select an emphasis in one or more of the following career fields: Camp Administration, Park Administration, Marine Management, and Recreation Leadership.

SECRETARIAL SCIENCE

The two-year Secretarial Science program is designed to prepare professionals in many aspects of office work and administration. Proficiency is developed in the skills of typewriting, shorthand, dictation, transcription, office machines, office management, and word processing. The wide scope of courses offered in this program will provide opportunities for increased understanding of the many facets involved in the operation of business today. This curriculum is designed for a student planning to seek employment at the end of two years. Secretarial Science degree emphasis areas are available in the Executive Secretary, General Clerical, and Medical Secretary fields.

**TOTAL HOURS:** 54
The Library is a place where you can study alone... or with a friend... or just take a minute to look at something interesting.
COURSES OF STUDY
COURSES OF STUDY

In addition to the credit courses of study in each of the following disciplines, the College also offers from quarter to quarter various special courses of study not listed. These courses are offered through the Community Services Program, and all inquiries should be addressed to the Director of Community Services.

Certain courses have prerequisites. However, in limited instances, prerequisites may be waived by the instructor and the Dean of Instruction.

In general, a course in a given discipline may be replaced by a course in the same discipline having a higher catalog number.

ART

ART 1010—Art Appreciation .................................................. 3 Credits
Analysis of expressive form, stylistic distinction. Traditional and modern techniques of painting, sculpture, architecture, and printmaking. A lecture course, illustrated with slides.

ART 1110—Basic Studio I ..................................................... 3 Credits
A structured studio course for beginning art majors consists of fundamentals emphasizing basic and related problems in two dimensional design and composition as a foundation for advanced work. (Required of all art majors. May be taken in any sequence with Basic Studio II and III.)
2 hours lecture—4 hours studio

ART 1120—Basic Studio II ...................................................... 3 Credits
A continuation of Basic Studio I and the study of two dimensional design with emphasis on the theory of color and its application. (Required of all art majors. May be taken in any sequence with Basic Studio I and III.)
2 hours lecture—4 hours studio

ART 1130—Basic Studio III .................................................... 3 Credits
An extension of the study of fundamentals of design with basic and related problems in three dimensional structure. (Required of all art majors. May be taken in any sequence with Basic Studio I and II.)
2 hours lecture—4 hours studio

ART 1810—School Art .......................................................... 3 Credits
The child, his/her development, and needs in creative art experiences. Two and three dimensional lab experiences appropriate for later use with children. Designed for elementary education majors.

ART 2010—Art History Survey I .............................................. 3 Credits
A survey of architecture, painting, and sculpture from prehistoric times to the Renaissance.

ART 2020—Art History Survey II ............................................. 3 Credits
A survey of architecture, painting, and sculpture from the Renaissance to nineteenth century Impressionism.

ART 2030—Art History Survey III—Modern Art .......................... 3 Credits
A detailed survey of architecture, painting, and sculpture from the late nineteenth century to the present.

ART 2210—Communication Design ........................................... 3 Credits
An introduction to the methods and materials of visual communication. (Prerequisite: ART 1110 and ART 1120)

ART 2410—Ceramics I ............................................................ 3 Credits
Lecture and studio experience in ceramic techniques; clay mixing, hand building, wheel throwing, glazing, firing. May be started any quarter.
2 hours lecture—4 hours studio
**ART 2420—Ceramics II** ................................................................. 3 Credits  
Refinement of fundamental skills and techniques. Individualized consultation with instructor.  
2 hours lecture—4 hours studio

**ART 2430—Ceramics III** ................................................................. 3 Credits  
Creative experimentation with contemporary sculptural form, clays, and glazes.  
2 hours lecture—4 hours studio

**ART 2510—Painting I** ................................................................. 3 Credits  
An introduction to the techniques, materials, and tools used in oil painting.  
2 hours lecture—4 hours studio

**ART 2520—Painting II** ................................................................. 3 Credits  
A continuation of ART 2510 with an emphasis on individual experimentation.  
2 hours lecture—4 hours studio

**ART 2530—Painting III** ................................................................. 3 Credits  
An introduction to the technique, materials, and tools used in acrylic and polymer painting.  
2 hours lecture—4 hours studio

**ART 2540—Watercolor** ................................................................. 3 Credits  
An introduction to the techniques, materials and tools used in watercolor painting.  
2 hours lecture—4 hours studio

**ART 2610—Weaving I** ................................................................. 3 Credits  
Exploration of techniques in loom and non-loom experiences. Plain weave, tapestry, warping (dressing) of frame looms, four harness looms and the drafting of weaves will be given in conjunction with a history of textiles and the art of weaving.

**ART 2620—Weaving II** ................................................................. 3 Credits  
Art from fibers and fabrics. An extension of skills in Weaving I to include macramé, wrapping, rugmaking, collage, quilting and mixed media.

**ART 2710—Introduction to Printmaking** ........................................ 3 Credits  
Technical instruction in printmaking processes; intaglio, relief, and planographic processes.  
2 hours lecture—4 hours studio

**ART 2720—Advanced Printmaking** .............................................. 3 Credits  
Continuation of Introduction to Printmaking with emphasis on individual experimentation.  
2 hours lecture—4 hours studio

**ART 2810—Basic Photography** .................................................. 3 Credits  
An introduction to photography as a medium of art expression. Elements of visual design and basic camera skills. Elementary aspects of film development and print enlargement.  
2 hours lecture—4 hours lab

**ART 2820—Photography II** ....................................................... 3 Credits  
Continuation of ART 2810.  
2 hours lecture—4 hours studio

---

**BANKING**

**BNK 1100—Principles of Bank Operations** ..........................(3 AIB Credits) 4 Credits  
This course presents the fundamentals of bank functions in a descriptive fashion so that the beginning banker may acquire a broad and operational perspective. It reflects the radical changes in banking policy and practice which have occurred in recent years. Topics covered are banks and the monetary system, negotiable instruments, the
relationship of the commercial bank to its depositors, types of bank accounts, the
deposit function, the payments functions, bank loans and investments, other banking
services (trust, international, and safe deposit), bank accounting and marketing,
external and internal controls, and the public service obligations of banks.

**BNK 1120—Money and Banking** ...........................................(3 AIB Credits) 4 Credits
This course presents the basic economic principles most closely related to the subject
of money and banking in a context of topics of interest to present and prospective bank
management. The book stresses the practical application of the economics of money
and banking to the individual bank. Some of the subjects covered include structure of
the commercial banking system, the nature and functions of money, banks and the
money supply; cash assets and liquidity management, bank investments, loans,
earnings and capital, the Federal Reserve System and its policies and operations,
Treasury Department operations, and the changing international monetary system.
(Formerly BUS 2050.)

**BNK 1130—Bank Investments** ...........................................(3 AIB Credits) 4 Credits
This course covers the sources and uses of bank funds and the place of investment in
the overall scheme of bank operations. Especially important are the relationship of
investments to business and the unique functions, advantages, and purpose served by
a wide range of securities. Investment terminology is covered in detail.

**BNK 1140—Savings and Time Deposits** ..............................(3 AIB Credits) 4 Credits
This course reflects recognition of the fact that a knowledge of the historical
development of savings institutions and an awareness of the basic economic function
of the savings process are necessary to an understanding of the current operations and
policies of these institutions. It begins with a review of the economics of the savings
process in order to clarify important differences between financial savings by
individuals or organizations and real savings that appear as capital formation.
Different types of financial savings are reviewed in order to describe the system of
financial flow from income to capital investment. Also covered are interest rates, types
of savings accounts, and the management of savings institutions (asset management,
opérations and control, supervision, liquidity, and marketing).

**BNK 1150—Trust Functions and Services** ...........................(3 AIB Credits) 4 Credits
This course presents a complete picture of the services rendered by institutions
engaged in trust business. Providing an introduction to the services and duties
involved in trust operations, the course is intended for all bankers, not only those who
are engaged in trust business. It endeavors to keep clear the distinction between
business and legal aspects of trust functions. Topics covered are the history of trust
services and institutions, trust powers and government supervision, trust department
services, property, wills, settlement of estates, personal and insurance trusts, personal
agencies, guardianship, employee benefits trusts, corporate trusts and agencies,
investment of trust funds, and management of property and mortgages.

**BNK 1160—Bank Management** ...........................................(3 AIB Credits) 4 Credits
This course presents new trends which have emerged in the philosophy and practice of
management. The study and application of the principles outlined provide new and
experienced bankers with a working knowledge of bank management. It should be
noted that the course is not one of personnel management, but rather of business
management. It touches on objectives, planning, structure, control, and the inter-
relationship of various bank departments. Since case study is becoming well
established as an effective management learning technique, the text also uses
illustrative cases.

**BNK 2100—Federal Reserve System** .................................(3 AIB Credits) 4 Credits
This course examines the operations and policies of the Federal Reserve System
during critical periods over the last 60 years. The approach taken is topical rather than
chronological, thereby enabling students to compare and contrast Federal Reserve
policies dealing with similar problems at different periods in time. Attention is given to
international monetary affairs, especially the changing role of gold, economic developments and goals which affect the stability of the American economy, and Federal Reserve efforts to adapt and influence the changing economic environment.

**BNK 2150—Installment Credit**

This modular course emphasizes the pragmatic "how-to" details of Installment Credit. Topics covered are principles of credit evaluation, open-end credit, marketing bank services, collection policies and procedures, legal aspects, financial statement analysis, direct and indirect installment lending, leasing and other special situations, installment credit department management, insurance, and rate structure and yields.

**BNK 2120—Analyzing Financial Statements**

This course is organized into two main sections: Characteristics of Financial Statements and Financial Statement Analysis. The first section serves as a useful review of basic accounting principles for those students who have studied accounting. For those who have not, this section provides the minimum accounting background necessary for profitable study of financial statement analysis. (It should be emphasized, however, that Analyzing Financial Statements is an advanced course and difficult for students with little background in accounting.) The second section of the course covers goals, methods, and tools of analysis; analysis of profit and loss, accounts receivable, inventories, and balance sheets; the relationship of balance sheet accounts to sales; and projected statements and cash budgets.

**BNK 2130—Credit Administration**

This course, directed toward the executive level, concerns itself with factors influencing and determining loan policy. It is not a "how" and "whether to" guide to granting credit, but discusses methods of credit investigation and analysis, credit techniques, specific credit problems, and regular as well as unusual types of loans—working capital loans, secured loans, term loans, real estate loans, installment loans, agricultural loans, loans to other financial institutions, and loan participations. Emphasis is also given to credit department organization and procedures, analysis of financial statements, and the methods of dealing with borrowers in financial difficulty.

**BNK 2160—International Banking**

International Banking is an overview introduction to a vast field for those working in international departments as well as for those involved in the domestic activities of their banks. The essential objective of the course is to present the basic framework and fundamentals of international banking: how money is transferred from one country to another, how trade is financed, what the international agencies are and how they supplement the work of commercial banks, international lending, and how money is changed from one currency to another.

**BNK 2170—Management of Commercial Bank Funds**

This course deals with those necessary principles from which the student can derive an adequate philosophy of funds management. It covers a broad range of bank situations and sizes. It opens with a discussion of the overall banking environment, then zeroes in on individual bank environment and discusses various facets of bank operations and their relationships with the funds management function. Considerable emphasis is placed on the proper organizational format to achieve this potential.

**BNK 2190—Law and Banking**

An introduction to basic American law, this course presents the rules of law which underlie banking. Topics are those usually covered in the first year curriculum of most American law schools. They include jurisprudence, the court system and civil procedure, contracts, quasi-contracts, property, torts, crimes, and agency. The nature of partnerships and corporations is also treated. The text concentrates on the Uniform Commercial Code in its coverage of sale of personal property, commercial paper, bank deposits and collections, documents of title, and secured transactions.
ROANE STATE COMMUNITY COLLEGE

BIOLOGY

To receive credit for a biology course, the lecture section must be accompanied by a laboratory session during the same quarter.

BIO 1110—General Biology I ................................................. 4 Credits
An introduction to biology at the cellular and subcellular levels.
3 hours lecture—2 hours laboratory

NOTE: Students with the equivalent of at least 2 years of high school biology or satisfactory ACT scores may elect BIO 2610, 20, 30 (see course descriptions) instead of BIO 1110, 20, 30.

BIO 1120—General Biology II ..................................................... 4 Credits
An introduction to the structure and function of multicellular organisms.
3 hours lecture—2 hours laboratory

BIO 1130—General Biology III ................................................. 4 Credits
An introduction to the principles of heredity and to environmental biology.
3 hours lecture—2 hours laboratory

BIO 2100—Field Biology .......................................................... 3 Credits
Identification of local plants and animals and a consideration of the ecological principles governing them. This course will generally be offered during Winter-Spring break on Thief Neck Island Environmental Study Area as a week-long camp.
A special fee will be assessed to cover food costs and other camping expenses.

BIO 2210—Plant Kingdom I ....................................................... 4 Credits
Lower plants; emphasis on evolutionary relationships, morphology and development. (Prerequisite: BIO 1130 or consent of instructor.)
3 hours lecture—3 hours laboratory

BIO 2220—Plant Kingdom II ...................................................... 4 Credits
Higher plants; emphasis on evolutionary relationship, morphology and development. A study of the seed plants with an emphasis on anatomy and physiology. (Prerequisite: BIO 1110-1120-1130 or consent of instructor.)
3 hours lecture—3 hours laboratory

BIO 2310—Anatomy and Physiology I .......................................... 4 Credits
A study of basic biological chemistry, cellular structure and function (including cellular respiration, protein synthesis, and cell division), and control systems of the body. The laboratory will provide experiments to illustrate principles covered in lecture as well as detailed anatomy and physiology of the integumentary and skeletal system.
3 hours lecture—3 hours laboratory

BIO 2320—Anatomy and Physiology II ......................................... 4 Credits
A study of the anatomy and physiology of the nervous system, muscular system, circulatory and immune systems, and the respiratory system. The laboratory will provide anatomical investigation of and physiological experimentation with these systems.
3 hours lecture—3 hours laboratory

BIO 2330—Anatomy and Physiology III ....................................... 4 Credits
A study of the anatomy and physiology of the excretory, digestive, endocrine, reproductive and special sense systems. The laboratory will provide anatomical investigation of and physiological experimentation with these systems.
3 hours lecture—3 hours laboratory

BIO 2350—Pathophysiology ....................................................... 3 Credits
An introduction to the disease processes and mechanisms of the human body and to the dysfunction of the body's systems. (Prerequisite: BIO 2310-20-30)
3 hours lecture
**BIO 2410—Invertebrate Zoology** ........................................ 4 Credits
A survey of the invertebrate animals, their biological structure, and comparison among members of the groups. (Prerequisite: BIO 1130 or consent of instructor.)
3 hours lecture—3 hours laboratory

**BIO 2420—Comparative Vertebrate Anatomy** .............................. 4 Credits
A survey of the vertebrate animals emphasizing their development and the comparative anatomy of organ systems. (Prerequisite: BIO 1130 or consent of instructor.)
3 hours lecture—3 hours laboratory

**BIO 2510—Microbiology** ..................................................... 4 Credits
An introductory course in microbiology dealing with bacteria, fungi, yeast, and viruses to include discussions of cell structure, identification, taxonomy, metabolism, genetics, resistance, infection, disease, immunity, microbiology of food products and industrial microbiology. (Prerequisite: BIO 1130 or 2330 or consent of instructor.)
3 hours lecture—3 hours laboratory

**BIO 2520—Diagnostic Microbiology** ....................................... 4 Credits
A study of the disease producing microorganisms including bacteria, rickettsia, chlamydia and fungi. The laboratory will deal with techniques for isolation, cultivation and identification of pathogenic microorganisms. (Prerequisite: BIO 2510 or consent of instructor.)
3 hours lecture—3 hours laboratory

**BIO 2610—Genetics** .......................................................... 4 Credits
A study of heredity including classical and modern principles and laboratory experiments involving several experimental organisms. (Prerequisite: BIO 1110, 20, 30, or consent of instructor, CHE 1030 or CHE 1130, and MAT 1130 are recommended.)
3 hours lecture—3 hours laboratory

**BIO 2620—Cell Biology** ...................................................... 4 Credits
A study of cellular structure and function. (Prerequisite: BIO 1110, 1120, 1130, CHE 1010, 20, 30)
3 hours lecture—3 hours laboratory

**BIO 2630—Ecology** ............................................................ 4 Credits
Relations between organisms and their environment. Includes human environmental problems. Laboratories consist of sampling techniques and field trips. (Prerequisite: BIO 1130)
3 hours lecture—3 hours laboratory

**BIO 2700—Independent Scientific Investigation** ...................... 3 Credits
Independent laboratory/library research in biology by qualified students under the supervision of a faculty member. Especially designed to develop interest in and to apply techniques of scientific research. Up to nine credit hours may be earned. (Prerequisite: BIO 1130 and consent of the faculty members.)

**BUSINESS AND COMMERCE**

**BUS 1010—Introduction to Business** ................................... 3 Credits
Orientation course designed to give an overall view of business as a framework for further detailed study into accounting, data processing, finance, real estate, management, retailing and marketing. Included are vocational/career opportunities, business terminology, and an appreciation of the methods and procedures used in business to arrive at decisions.

**BUS 1110—Business Communications** .................................. 3 Credits
A study of the essentials of English in business communication. The basic fundamentals in grammar and punctuation are applied to business letter writing and business report writing. Emphasis is given on composing and dictating business letters into dictation/transcription equipment. Job application and interviewing techniques are covered along with techniques for more effective listening.
BUS 1810—Business Mathematics ................................. 3 Credits
The fundamentals of mathematics as applied to business. Emphasis on problems involving discounts, simple and compound interest, insurance and payroll.

BUS 1820—Finance Mathematics ................................. 3 Credits
Math applied to business operations such as preparing payroll, discounting notes and drafts, distributing profits and dividends, trading on the stock and bond markets, figuring consumer credit, and computing federal income taxes and social security benefits.

BUS 1850—Personal Finance ................................. 3 Credits
A course designed to aid the student in practical money management. Topics include: charting financial objectives; budgeting; consumer borrowing, renting, and buying; investing; employee benefits and taxation. Designed for special career education curricula.

BUS 2010—Real Estate I .................................. 3 Credits
A fundamental real estate course covering the basic laws and principles of Tennessee Real Estate, giving understanding, background, and terminology necessary for advanced study in specialized courses. Will be of assistance to those preparing for the real estate affiliate broker’s and broker’s license examinations.

BUS 2020—Real Estate II .................................. 3 Credits
A study of Tennessee Real Estate Law, including rights incident to property ownerships and management, agency, contracts, and applications to real estate transfer, conveyances, probate proceedings, trust deeds, and foreclosure, as well as recent legislation governing real estate transactions. Applies toward educational requirement of a broker’s examination. (Prerequisite: BUS 2010)

BUS 2030—Real Estate III .................................. 3 Credits
Institutional and governmental funds for financing real estate transactions. (Prerequisite: BUS 2010)

BUS 2040—Real Estate Appraisal ................................. 3 Credits
Theories, functions, and purposes of appraisal to include the economic approach, the replacement approach and comparative values for all types of real estate.

BUS 2210—Principles of Accounting I ................................. 3 Credits
Covers the basic principles and procedures from the management viewpoint. Determination of net income and valuation of assets and the basic problems connected therewith are given careful attention.

BUS 2220—Principles of Accounting II ................................. 3 Credits
Continues with notes and interest determination; plant depreciation; voucher systems; taxes on payroll, property and income; and the theory of internal control. (Prerequisite: BUS 2210)

BUS 2230—Principles of Accounting III ................................. 3 Credits
Covers partnership organizations and operation, cost accounting, corporation capital accounts, earnings and dividends, bonds, funds statement and statement analysis. (Prerequisite: BUS 2220)

BUS 2250—Cost Accounting ................................. 3 Credits
Principles of manufacturing and distribution cost accounting. Material, labor, and overhead costs in job order and process cost accounting; analysis of cost distribution and related problems. Business procedures and their relation to business situations and needs of management. (Prerequisite: BUS 2220)

BUS 2270—Small Business Accounting ................................. 3 Credits
An introductory course in accounting which covers the basic principles and procedures of accounting with an emphasis on the managerial viewpoint. This course includes a review of the basic accounting cycle and financial statements, emphasizing use rather than preparation. Students must secure departmental approval to take this course.
BUS 2280—Small Business Accounting ................................. 3 Credits
A continuation of Small Business Accounting I with an emphasis on control and accounting for decision making. (Prerequisite: BUS 2270 and departmental approval)

BUS 2310—Income Tax Accounting—Personal ........................ 3 Credits
Federal income tax laws with emphasis on the preparation of returns for individuals. (Prerequisite: BUS 2210 or permission of instructor)

BUS 2320—Income Tax Accounting—Business ......................... 3 Credits
Federal income tax laws with emphasis on the preparation of returns for partnerships and corporations. (Prerequisite: BUS 2310)

BUS 2410—Business Machines—Computational .......................... 3 Credits
Operation of adding and calculating machines. Practical application in solving math problems involving business situations.

BUS 2420—Business Machines—Duplication ............................... 3 Credits
Operation of the spirit, stencil, and offset duplicating machines. Training on automatic typewriter. Study of other methods of duplication and business machines. (Prerequisite: SSC 1010 or equivalent)

BUS 2510—Legal Environment for Business .............................. 3 Credits
Emphasis is placed on classification of laws, historical background of our systems of laws, duties, buying services, insurance, consumer protection, negotiable instruments, and business organization. The student will gain experience in recognizing and isolating issues of legal importance of precise language in business and legal transactions.

BUS 2520—Business Law .................................................. 3 Credits
Designed to acquaint the student with the privileges and responsibilities of the individual under business law. Topics studied will include the uniform commercial code, contracts, sales, agency, partnerships, corporations, and negotiable instruments.

BUS 2710—Intermediate Accounting I ................................. 3 Credits
Extensive analysis of the principal elements of accounting systems and statements. (Prerequisite: BUS 2210, 20, 30)

BUS 2720—Intermediate Accounting II .................................. 3 Credits
An intensive study of the balance sheet including valuation of assets, disclosure of liabilities, proper account classification, balance sheet and related income and expense items; and preparation of financial statements including tax regulations, management needs, and credit purposes. (Prerequisite: BUS 2710)

BUS 2730—Intermediate Accounting III .................................. 3 Credits
Continuation of BUS 2720. (Prerequisite: BUS 2720)

BUS 2810—Salesmanship ................................................... 3 Credits
A specific course emphasizing the relationship of product and market, industrial and consumer retailing, methods of market analysis, salesmanship and sales methods.

BUS 2820—Retailing .......................................................... 3 Credits
A study of the principles and practices of retailing including planning, policies, and procedures of distribution.

BUS 2830—Marketing ......................................................... 3 Credits
A general but critical survey of the field of marketing, covering international industries and commerce, distribution of resources, factors of distribution and transportation.

BUS 2900—Small Business Management ................................. 3 Credits
An introductory course designed to provide an overview of the business environment and requirements for successfully operating a small business. Topics covered will include forms of business, credit management, utilizing professionals, information management, etc. Students must secure departmental approval to take this course.

</tr>
</thead>
<tbody>
<tr>
<td>CHE 1030</td>
<td>Basic Chemistry III</td>
<td>4</td>
</tr>
</tbody>
</table>

A continuation with emphasis on functional groups, biochemistry, drugs, and biologically active compounds.

3 hours lecture—3 hours laboratory

**NOTE:** CHE 1010, 20, and 30 are intended for students in the humanities, the social sciences, home economics, nursing, and many programs in the agricultural sciences. These courses must be taken in sequence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 1110</td>
<td>General Chemistry I</td>
<td>4</td>
</tr>
</tbody>
</table>

A study of fundamental principles of chemistry, such as mathematical calculations of chemical relationships, atomic structure, periodic relationships, molecular structure, bonding, and the chemistry of oxygen, hydrogen, and water. (Prerequisite: 2 years of high school algebra or one college level math course.)

3 hours lecture—3 hours laboratory

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHE 1120</td>
<td>General Chemistry II</td>
<td>4</td>
</tr>
</tbody>
</table>

Kinetic Molecular Theory, physical states of matter, solution chemistry, and electrolytes. (Prerequisite: CHE 1110)

3 hours lecture—3 hours laboratory
CHE 1130—General Chemistry III ........................................... 4 Credits
Oxidation-reduction, electrochemistry, molecular and ionic equilibria, nuclear chemistry, and brief survey of organic chemistry. (Prerequisite: CHE 1120)
3 hours lecture—3 hours laboratory

CHE 1200—Chemistry for Dietetic Technology .......................... 4 Credits
The fundamentals of inorganic, organic and bio-chemistry, including physiological principles and applications.
3 hours lecture—3 hours laboratory

CHE 2210—Quantitative Analysis ........................................... 4 Credits
The study of the basic theories of quantitative analysis with stress on the theories of neutralization, precipitation, volumetric, and gravimetric analysis. (Prerequisite: CHE 1130)
3 hours lecture—3 hours laboratory

CHE 2310—Organic Chemistry I ............................................. 4 Credits
A study of the properties, preparations, nomenclature, and reactions of the aliphatic compounds. Concepts such as mechanisms of reactions and the relationship between structure and properties are developed. (Prerequisite: CHE 1130)
3 hours lecture—3 hours laboratory

CHE 2320—Organic Chemistry II ............................................ 4 Credits
A study of the properties, preparations, nomenclature, reactions, and spectroscopic characteristics of some aromatic compounds and various other compounds classified according to functional group. (Prerequisite: CHE 2310)
3 hours lecture—3 hours laboratory

CHE 2330—Organic Chemistry III ........................................... 4 Credits
A continuation of CHE 2320 and including an introduction to proteins, amino acids, carbohydrates and fats. (Prerequisite: CHE 2320)
3 hours lecture—3 hours laboratory

CHE 2700—2750—Independent Scientific Investigation ............... 3 Credits
Independent laboratory/library research in chemistry by qualified students under the supervision of a faculty member. Especially designed to develop interest in and to apply techniques of scientific research. Up to nine credit hours may be earned. (Prerequisite: CHE 1130 and consent of the faculty member.)

CHEMICAL TECHNOLOGY

CHT 2010—Unit Operations I .................................................. 3 Credits
Presentation of and experiments in the basic ideas of Chemical Engineering. Intended to familiarize the student with chemical process equipment and its uses and applications.
6 hours lecture—laboratory

CHT 2020—Unit Operations II ............................................... 3 Credits
6 hours lecture—laboratory

CHT 2030—Unit Operations III ............................................... 3 Credits
Continuation of Unit Operations II. Combined Heat and Mass Transfer Operations.
6 hours lecture—laboratory

CHT 2110—Matter and Energy Balances ................................. 2 Credits
Problem solving course in the application and utilization of the basic laws of conservation of matter and energy as they are used in chemical engineering.
2 hours lecture—laboratory
### CHT 2210—Quantitative Analysis I 
4 Credits  
The study of the basic theories of quantitative analysis with stress on the theories of neutralization, precipitation, volumetric, and gravimetric analysis. (Prerequisite: CHE 1030.)

4 hours lecture—laboratory

### CHT 2220—Quantitative Analysis II 
2 Credits  
A continuation of Quantitative Analysis I with emphasis on instrumental methods of analysis.

2 hours lecture—laboratory

### CHT 2410—Heat, Mass, and Momentum Transfer 
2 Credits  
Each student will select a problem in heat mass and/or momentum transfer, determine a solution and present a written and oral report to the instructor.

### CIVIL ENGINEERING TECHNOLOGY

#### CET 1000—Introduction to Surveying 
2 Credits  
This course reviews the duties of a surveyor, his/her obligation to the community and society and introduces the student to the tools of the profession.

1 hour lecture—3 hours laboratory

#### CET 2010—Construction Planning 
3 Credits  
Introduction to the equipment used in civil engineering construction and the principles of construction planning.

#### CET 2050—Civil Drafting I 
3 Credits  
Course will introduce the student to drafting practices pertinent to the field of Civil Engineering. Work will include topographic drawings, land layout, utility plans and profiles. (Prerequisite: ERG 1020)

1 hour lecture—6 hours laboratory

#### CET 2060—Civil Drafting II 
3 Credits  
Course will continue topic covered in Civil Drafting I with additional emphasis on structural design drawing in steel, wood, and concrete. Shop drawings as required in steel and reinforced concrete will be covered. (Prerequisite: CET 2050)

1 hour lecture—6 hours laboratory

#### CET 2110—Surveying I 
4 Credits  
Introduction to surveying, chaining and pacing, direct and profile leveling, measurements of angles, transit-tape-traversing, traverse analysis, calculation of areas, adjustment of instruments. (Prerequisite: MAT 1050 or MAT 1010 or 1020)

3 hours lecture—3 hours laboratory

#### CET 2120—Surveying II 
4 Credits  
Basic complex circular curves, stadia surveying, topographic surveying analysis and preparation of topographic maps. Field work parallels classroom instruction. (Prerequisite: CET 2110)

3 hours lecture—3 hours laboratory

#### CET 2210—Soil Mechanics 
3 Credits  
Physical properties of soils as applied to civil engineering; index properties, permeability, moisture-density, consolidation and shear strength. (Prerequisite: ERG 2210)

#### CET 2220—Hydraulics 
3 Credits  
Principles of fluid flow and development of practical hydraulics resulting from study of fluid statics, flow of real fluid in pipes, multiple pipe lines, liquid flow in open channels, and fluid measurement techniques. (Prerequisite: ERG 1050 or ERG 1110)

#### CET 2250—Structural Analysis 
3 Credits  
Analysis of statically determinate structures; shear and moment diagrams; influence lines; introduction to matrix algebra; introduction to statically indeterminate methods of analysis. (Prerequisite: ERG 1050 or ERG 1110) (Corequisite: ERG 2210)
CET 2310—Concrete Technology .................................................. 3 Credits
Introduction to the properties of portland cement concrete; methods of designing concrete mixtures and the mixing, testing, and quality control during construction.

CET 2410—Traffic and Transportation Technology .......................... 3 Credits
Introduction to the techniques of traffic and transportation surveys. The application of survey data to the planning, design and operation of modern transportation systems. (Prerequisite: CET 2110)

CET 2510—Bituminous Technology ............................................. 3 Credits
Introduction to the properties of bituminous materials, primarily asphalt cement used in highway construction; testing of asphalt materials and the quality control of asphalt concrete mixtures.

CET 2610—Reinforced Concrete Design ....................................... 3 Credits
Design, investigation and detailing of reinforced concrete structural members. (Prerequisite: CET 2250)

CET 2620—Advanced Reinforced Concrete Design ............................. 3 Credits
Continuation of CET 2610. (Prerequisite: CET 2610)

CET 2710—Structural Steel Design ............................................. 3 Credits
Design, investigation and detailing of basic steel members. (Prerequisite: CET 2250)

CET 2720—Advanced Structural Steel Design .................................. 3 Credits
Continuation of CET 2710. (Prerequisite: CET 2710)

CET 2810—Route Surveying and Highway Design ............................. 3 Credits
Principles of route surveying; simple, compound and transition curves; grades and vertical curves; earthwork and haul quantities. (Prerequisite: CET 2120)

COAL MINING TECHNOLOGY

CMT 1020—Coal Geology ......................................................... 3 Credits
Instruction is provided in the geologic characteristics of coal, as well as in erosion, sedimentation, and groundwater as significant in the extraction of coal.

CMT 1110—Mine Operations and the Law I .................................. 3 Credits
The student is introduced to the various phases of coal mining and instructed in how these relate to the Federal Mine Health and Safety Act of 1969 and state laws.

CMT 1120—Mine Operations and the Law II .................................. 3 Credits
A continuation of Mine Operations and the Law I.

CMT 1210—Mining Business and Records ...................................... 3 Credits
The student learns to use and interpret the Bureau of Mines Dictionary of Mining, safety films, wage agreements, and forms and reports required by government agencies.

CMT 1310—Soil Sampling and Testing .......................................... 3 Credits
ASTM methods and techniques in soil sampling and testing will be taught in field, laboratory, and classroom experiences.

CMT 1510—Reclamation Techniques and Land Use Planning .................. 3 Credits
A review and evaluation of current surface mine reclamation techniques and land use planning concepts are provided.

CMT 1610—Energy and Society .................................................. 3 Credits
An investigation is undertaken of alternative energy resources for the future, with discussions of likely impact upon American society.

CMT 1710—Surface Mine Revegetation ......................................... 3 Credits
The student is taught basic concepts of plant physiology, in addition to learning about plant, soil, water, and fertilizer needs on surface mined soils.
CMT 1810—Mine Rescue ........................................ 3 Credits
Instruction is given in the procedures and equipment which are utilized in mine rescue operations.

CMT 1910—Mining Hydraulics ................................. 3 Credits
Principles of fluid power, systems, and application to modern mining equipment are presented.

CMT 1920—Mine Electricity and Hazards .................... 3 Credits
The student will be taught the specific details for assembly and operation of mine electrical circuits and equipment in accordance with mandated standards.

CMT 2000—Mine Surveying .................................... 3 Credits
The student is taught fundamentals of surveying as they apply to mine operations.

CMT 2010—Mine Section Layout ................................ 3 Credits
The student is taught to use the level, transit, plan table and other equipment as they apply to the development of a mine section layout.

CMT 2110—Water Quality Control ............................. 3 Credits
Instruction in federal and state water standards are given, as well as training in the practical use of laboratory and field test equipment.

CMT 2210—Mining Internship .................................. 9 Credits
Students will be employed in the mining industry in order to receive on-the-job training. Students will make periodic reports of their summer experience to other students and faculty advisor.

CMT 2310—Coal Analysis and Preparation Plant Technology .......................... 3 Credits
Instruction (with laboratory training) is given in the approved methods of coal analysis and detailed instructions are provided in the operation of a coal cleaning and preparation plant in accordance with Bureau of Mine Safety Standards.

CMT 2410—Mine Safety Management ........................... 3 Credits
Instruction in the principles of mine safety management in accordance with the course developed by the Bureau of Mines. Cost and production factors related to safety are included.

CMT 2420—Mining Methods and Equipment Technology .............. 3 Credits
Instruction and first hand experience are provided in the operation of the major types of equipment used in coal mining.

CMT 2430—Gas Detection ....................................... 3 Credits
Instruction is given in the use of equipment for monitoring toxic gases. Legal requirements also are considered.

CMT 2510—Remote Sensing ..................................... 3 Credits
The student is taught the use of aerial photogrammetry as an aid to mining and reclamation.

CMT 2710—Noise Measurement and Control ...................... 3 Credits
Federal standards in noise measurement and methods of supervision are presented. Field experience with noise monitoring equipment is included.

CMT 2720—Fundamentals of Surface Mine Engineering ............ 3 Credits
Instruction is given in overburden removal, drilling, blasting, contour grading, and landscaping. Field trips are included.

CMT 2810—Mine Blasting and Explosives ........................ 3 Credits
Instruction is given in the specific details of the care and use of explosives in accordance with mandated standards.

CMT 2820—Mine Ventilation .................................... 3 Credits
Instruction is provided concerning installation and operation of mine ventilation equipment in accordance with mandated standards.
CMT 2900—Special Training for Potential Miners ..........................9 Credits
The student is taught basic concepts in the following subjects: miners' rights, self rescue, resp-devices, entering and leaving the mine, work environment, mine map and escapeways, roof or ground control, ventilation, health, clean-up, rock dusting, hazard recognition, electrical hazards, first aid, mine gases, explosives and safe working procedures.

CMT 2910—Mine Structure: Roof Control I ...............................3 Credits
Basic principles of mine structures are investigated with emphasis given to the support of haulage equipment and roof control.

CMT 2920—Mine Structure: Roof Control II ...............................3 Credits
A continuation of Mine Structures: Roof Control I.

COMPUTER SCIENCE TECHNOLOGY

CST 1010—Introduction to Data Processing ...............................3 Credits
An orientation to the field of electronic data processing. The history of data processing—familiarization with the broad concepts and applications related to business and industry. Unit record and digital computer concepts and techniques, including number systems, and data flow patterns.

CST 1020—Introduction to Programming .................................3 Credits
A basic course in programming techniques. Introducing the student to BASIC-PLUS computer language. Utilizing lab work to gain experience in programming applications. (Corequisite: CST 1010 or consent of instructor.)

CST 2010—Computers and Society ........................................3 Credits
History of computing and computer system; capabilities of computer; applications in artificial intelligence, humanities, social sciences, sciences and engineering; computer assisted instruction, future advances in computing. (Prerequisite: CST 1020)

CST 2100—Computer Applications in Accounting ........................3 Credits
A course designed to acquaint the student with some of the more common computer applications in the field of accounting. Topics include payroll accounting, depreciation, cash receipts and disbursements and many others. This course should not be taken until completion of all the prerequisites listed below. (Prerequisites: BUS 2210, BUS 2220, and CST 1020)

CST 2210—FORTRAN Programming ........................................3 Credits
Computer programming in scientific oriented FORTRAN (formula translation) programming language; emphasis on mathematical problem solving process.

CST 2220—COBOL Programming .............................................3 Credits
COBOL (Common Business Oriented Language) in commercial oriented language to enable the student to gain programming proficiency through lectures and labs with "hands on" computer experience.

CST 2240—RPG Computer Programming ....................................3 Credits
RPG (Report Program Generator) is a problem-oriented language for maintaining and manipulating files, generating reports, and using table lookup. This course will provide exercises, problems and case studies directed at various applications in a business system.

CST 2250—APL Computer Programming ....................................3 Credits
Introduction to APL (A Programming Language) programming language. The APL is a refinement and enhancement of mathematics. Emphasis is placed on the use of APL as an ideal language for developing and formulating algorithms. (Prerequisite: MAT 2610 and Corequisite: MAT 2650)

CST 2310—Introduction to Systems Analysis ............................3 Credits
This course is designed to teach the basic fundamentals of systems analysis with emphasis on systems study and design, flow charting, file descriptions, procedure analysis, and documentation. (Prerequisite: CST 1020)
CST 2410—Systems Analysis .............................................. 3 Credits
This course is designed to teach the fundamentals of management by system. The life cycle of a management system is presented in terms of (1) study and design; (2) implementation; and (3) operation, evaluation, and modification. Major emphasis is in the area of analysis and design. (Prerequisite: CST 2310)

CST 2520—Advanced Computer Programming .......................... 3 Credits
Problem formulation and advanced programming in BASIC-PLUS, FORTRAN and COBOL. (Prerequisite: CST 1020, CST 2210, CST 2220)

CST 2610—Management Information Systems .......................... 3 Credits
This course is designed to provide the student with the concepts, characteristics, and operation of management information systems. (Prerequisite: CST 2420)

CST 2700—Management of EDP Function .................................. 3 Credits
This course is designed to teach the concepts of managing the data processing function in an organization. The normal managerial functions are discussed as related to the data processing area. (Prerequisite: CST 2610 and PSY 2610)

CST 2810—Computer Organization and Programming ..................... 3 Credits
Macro assembler programming. Elementary Computer Architecture. (Prerequisite: CST 2210)

CST 2910—Cooperative Seminar ........................................ 4 Credits
This course offers a college programmed study, designed to give the student practical experience in the area of his/her major by placing him/her in a cooperative work study program with local organizations. The student is required to attend a one period seminar per week. (Summer Quarter only.)

COOPERATIVE EDUCATION

COE 1010—Cooperative Education I .................................. 3-5 Credits

COE 1020—Cooperative Education II .................................. 3-5 Credits

COE 1030—Cooperative Education III .................................. 3-5 Credits

COE 1040—Cooperative Education IV .................................. 3-5 Credits
A sequence of experiential training. Student must be approved by the Co-op Coordinator and an employer for full-time and/or part-time employment in industry, business, education or governmental agency to give practical training in the student’s major field of study. A minimum of 30 hours of actual work experience per quarter will be necessary to receive credit. More credit may be given at the discretion of coordinator depending upon the number of hours worked and the significance of the work experience.

CORRECTIONS

COR 1010—Introduction to Corrections .................................. 3 Credits
This course includes the history of criminal corrections in the United States; analysis of the crime problem; identification of the correctional client; correctional methods used in the United States; and emphasizes correctional goals in the criminal justice system. (Formerly PST 2310)

COR 1110—Juvenile Delinquency ........................................ 3 Credits
A study of new attempts geared toward the rebellious youthful offenders in the areas of treatment, experimentation, innovative programs, and theories of causation.

COR 1120—Emerging Rights of Prisoners .................................. 3 Credits
An attempt to systematically identify and analyze the practical implications of recent court decisions affecting civil rights and due process of prisoners.
COR 2010—Correctional Administration and Supervision .......................... 3 Credits
A study of the organizational structure, training techniques, cultural developments, and administrative concepts of incarceration. Special emphasis will be placed upon supervision, responsibility, authority, and accountability in the operation of penal institutions.

COR 2020—Cultural Dimensions of Law ............................................. 3 Credits
A study in the history and development of laws and methods dealing with primitive societies, social control, and its resulting effects on the evolution of societies to the current state.

COR 2030—Treatment in Corrections .................................................. 3 Credits
A study of various methods used in counseling to include principles and techniques for both group and individual therapy. A variety of therapies will be discussed, including behavior modification, guided group interaction, transactional analysis, and reality therapy.

COR 2200—Practicum in Corrections ................................................... 6 Credits
The placement of a student in a correctional institution or detention facility to observe and participate in its operation. Participation will include activity in all functions required to operate a correctional institution. Attention will be given to the implementation of state-of-the-art techniques in traditional incarceration problem areas.

DEVELOPMENTAL STUDIES

Roane State Community College offers specialized programs to students in need of intensive preparation for college level academic work. Students are directed into this individualized work on the basis of an evaluation of high school work, placement test scores, recommendation of faculty advisors or personal assessment.

The basic courses are numbered 0100 to 0990 and should not be taken for college transfer credit. Up to six hours of such credit may be used as elective credit toward the Associate Degree. DVS credit CANNOT be earned after a student has successfully completed a higher level course in the discipline.

These courses are not sequential and may be repeated when necessary.

DVS 0310—Spelling Improvement I .................................................... 3 Credit
An individualized, personalized course designed to help the student who has problems with spelling.

DVS 0320—Spelling Improvement II ................................................... 3 Credit
DVS 0330—Spelling Improvement III ................................................. 3 Credit
These courses are a continuation of Spelling Improvement I. The number of hours taken is determined by the degree of mastery achieved in Spelling Improvement I.

DVS 0510—Basic Communications I ................................................... 3 Credits
This course is selected by students who need to upgrade such basic skills as sentence writing and paragraph development or who need to upgrade mechanics of grammar and usage. A student may enroll in this course while simultaneously enrolled in Composition I.

DVS 0520—Basic Communications II .................................................. 3 Credits
DVS 0530—Basic Communications III ................................................. 3 Credits
These courses are a continuation of Basic Communications I. The number of hours taken is determined by the degree of mastery achieved in Basic Communications I.

DVS 0610—Basic Science/Chemistry I ................................................. 3 Credits
A course designed for the student who does not have background necessary for college level science courses in chemistry.
DVS 0620—Basic Science/Chemistry II ................................. 3 Credits
This course is a continuation of Basic Science I. The number of hours taken is
determined by the degree of mastery achieved in Basic Science I.

DVS 0710—Basic Mathematics I ....................................... 3 Credits
A course designed to upgrade skills necessary for college level mathematics. Course
work may include one or more of the following: fundamentals of basic mathematics,
algebra, business mathematics, and mathematical theory for teacher education.

DVS 0720—Basic Mathematics II ....................................... 3 Credits.
A continuation of Basic Mathematics I.

DVS 0730—Basic Mathematics III ...................................... 3 Credits.
A continuation of Basic Mathematics II.

DIETETIC TECHNOLOGY

DFT 1010—Fundamentals of Food Service ............................. 3 Credits
An overview of the food service industry, planned to acquaint the student with the
organization, observation, and job potential of different types of food services.
Lectures, guest speakers and field trips to hospital, nursing home, child care center,
restaurants, school lunch facility, and food industries.

DFT 1020—Food Principles ............................................... 3 Credits
Principles of food selection, preparation and service. Two lectures and one laboratory
per week.

DFT 1030—Sanitation and Safety ........................................ 3 Credits
The control of bacteria in the food service industry; good housekeeping practices,
sanitary food handling, and personal cleanliness. Practical problems concerned with
protection of health and prevention of food spoilage and contamination. Importance of
safety and accident prevention.

DFT 1810—Nutrition Care Field Experience I ......................... 1 Credit
A minimum of 30 hours of supervised field experience in a health care facility.
Required for Dietetic Technician students (only) to take concurrently with DFT 2210.

DFT 1820—Nutrition Care Field Experience II ......................... 1 Credit
A minimum of 30 hours of supervised field experience in a health care facility.
Required for Dietetic Technician students (only) to take concurrently with DFT 2220.

DFT 2110—Food Purchasing and Cost Control ........................ 3 Credits
The study of purchasing procedures and methods of controlling food costs in relation
to budgeting and purchasing. Methods used in institutional food service.

DFT 2210—Principles of Nutrition ...................................... 3 Credits
The study of nutritional needs throughout the life cycle, the nutrients, and their
functions in the body.

DFT 2220—Therapeutic Nutrition ....................................... 3 Credits
A study of the modifications of the normal diet for special and abnormal conditions
resulting from illness, surgery, or other medical problems. Prerequisite: DFT 2210.

DFT 2310—Food Systems Administration ............................. 3 Credits
Functions of management applied to food service operations with emphasis on
organization and administration.

DFT 2410—Institutional Menu Planning ............................... 3 Credits
The planning of menus for various types of commercial, industrial, school and
institutional food services; merchandising techniques, variety in menu planning, and
food preferences. Prerequisite: DFT 2210.

DFT 2510—Quantity Cookery ........................................... 3 Credits
A study of food service in institutions. Practical experience in preparation and service
of food in large quantities. Prerequisite: DFT 1020 or permission of instructor. Two
lectures, three laboratory hours per week.
DFT 2610—Food and the Consumer ........................................3 Credits
Economic considerations as related to marketing, food consumption patterns, acceptability, and effects of legislation on the consumer.

DFT 2810—Food Service Field Experience III ............................4 Credits
A minimum of 120 hours of supervised observation and practical experience in selected food services. Required for Dietetic Technician students (only) to take concurrently with DFT 2410.

DFT 2820—Food Service Field Experience IV ...............................6 Credits
A minimum of 180 hours of supervised observation and practical experience in selected food services. Required for Dietetic Technician students (only) to take concurrently with DFT 2410.

DFT 2830—Food Service Field Experience IV ...............................5 Credits
A minimum of 150 hours of supervised observation and practical experience in selected food services. Required for Dietetic Technician students (only) to take concurrently with DFT 2310.

ECONOMICS

ECO 2010—Principles of Economics I .....................................3 Credits

ECO 2020—Principles of Economics II ......................................3 Credits
A continuation of economic principles with the special emphasis on microeconomics. An introduction to individual demand. Production planning and the related effect upon market structures, resource allocation, and income distribution; e.g., wages, rent, interest and profits. (Prerequisite: ECO 2010)

ECO 2030—Principles of Economics III .....................................3 Credits

EDUCATION

EDU 1010—Orientation to the Education of the Exceptional Child ......3 Credits
This course examines the educational and sociological basis for current educational practices. Site visits and supervised observation acquaint the student with services, settings, teacher and paraprofessional roles.

EDU 1110—Introduction to Early Childhood Education ...................3 Credits
This course deals with the expanding field of early childhood education and care. Differentiation of teaching and supportive roles in early childhood programs is examined. Diverse program sites are visited. Course requirements of readings and child observations highlight characteristics of the young child and of the early childhood educator.
EDU 2010—Introduction to Education ................................. 3 Credits
A short survey of the field of education in which the history of American education, present philosophies of education, major problems of education, present practices and the school as a social institution are considered.

EDU 2110—Driver and Traffic Safety Education ........................ 3 Credits
Critical analysis of traffic accidents and causation, attitude factors, essential knowledge of automobile operation and function, and traffic laws and regulations. Includes laboratory experiences to develop skills in driving and operating the automobile, as well as evaluating conditions for safety of the persons involved.

EDU 2310—Audio-Visual Aids ........................................... 3 Credits
This course is designed to develop skill in the use of the mimeograph, ditto, tape recorder, motion picture projector, slide projector, and other audio-visual equipment. Experience in the preparation of visual aids used in the public school system is given.

EDU 2410—Human Growth and Development .......................... 3 Credits
Course examines human development with emphasis on growth, socialization and general characteristics of developmental stages from infancy through adolescence. The school, home and peer influences are studied. Laboratory observations are required for early childhood education majors.

EDU 2710—Reading in the Elementary School .......................... 3 Credits
A beginning course designed to give pre-service teachers an understanding of the content and methods necessary for the operation of a successful developmental reading program in the elementary school. Attention is given to the innovative approaches for teaching reading, factors influencing reading ability, and to a survey of reading skills.

EDU 2720—Teaching of Basic Reading and Writing Skills to Older Non-Readers .................................................. 3 Credits
Primarily a supervised practicum in which students learn to conduct tutorial sequences using the Laubach and other basic skills methods with adult illiterates. Covers characteristics and problems of the illiterate and implications for instruction. Introduces tutors to writing simple stories for beginning adult readers, using a controlled vocabulary. Instruction includes lecture, discussion, and role playing. Credit is awarded only when all requirements for the course are completed.

EDU 2730—Diagnostic Teaching of Reading ............................. 3 Credits
This course is designed primarily to provide the student with those diagnostic skills and prescriptive materials that will enable him/her to meet the needs of those pupils who have difficulties in learning to read in the regular classroom situation. (Prerequisite: EDU 2710 or teaching experience.)

EDU 2810—Child Development from Infancy Through Age Eight .......... 3 Credits
This comprehensive study of the child from infancy through eight years examines genetic, biological, social, motor, cognitive aspects of development with implications for early childhood education and related fields. (Prerequisite: EDU 2410)

EDU 2820—Creative Activities and Experiences for Young Children .................. 3 Credits
This course is a study of a creative curriculum for young children with emphasis on the teacher’s role in aesthetic experiences in art, music, movement and rhythms. (Prerequisites: ART 1810, EDU 1110 or EDU 2810)

EDU 2910—Prospective Teacher Cooperative Practicum I .................. 3 Credits
EDU 2920—Prospective Teacher Cooperative Practicum II .................. 3 Credits
This program is designed to provide the student and local school systems with a cooperative classroom experience. The college student will investigate the duties, responsibilities, and requirements of the teacher’s aid profession. Each assigned classroom teacher will be involved with the evaluation of the student, as well as the College Instructor and Administrator of the school. (Prerequisite: EDU 2910)
### Early Childhood Education

(Prerequisite: EDU 2410 or EDU 2810)

**EDU 2930—Field Experiences in Early Childhood Education**  
3 Credits  
Student is assigned a field placement in nursery, day care, kindergarten or primary grades. Observations, supervised case studies and problems of teachers, methods, materials and school organization are focuses of this course. (Prerequisite: EDU 2910-20) (Early Childhood Education and Special Education majors prerequisite: EDU 2410 or EDU 2810)

### ELECTRICAL AND ELECTRONICS TECHNOLOGY

**EET 1010—Electric Circuits I**  
3 Credits  
A study of the fundamental principles of circuit analysis, including Ohm's law, Kirchoff's law, Thévenin and Norton's theorems, node and mesh equation analysis and power relations. The response of resistive, capacitive and inductive circuits to both AC and DC sources using phasor notation is also considered.

**EET 1020—Electric Circuits II**  
3 Credits  
A continuation of EET 1010, Electric Circuits I.

**EET 1015—Electric Circuits Lab I**  
1 Credit  
(Laboratory to be taken concurrently with EET 1010.)  
3 hours laboratory

**EET 1025—Electric Circuits Lab II**  
1 Credit  
(Laboratory to be taken concurrently with EET 1020.)  
3 hours laboratory

**EET 1110—Electric Circuit Fundamentals**  
3 Credits  
A basic course designed for students with little or no electrical background. Familiarizes the student with the fundamentals of electricity (both AC and DC), electric circuits, and electric devices. This course is for special students or students in departments other than engineering.

**EET 1210—Materials and Construction Practices**  
2 Credits  
A laboratory course to familiarize the student with electronic hardware, hand tools and shop practices. Includes layout design of chassis and printed-circuit fabrication processes. (Prerequisite: EET 1320)  
1 hour lecture—3 hours laboratory

**EET 1310—Electronics I**  
3 Credits  
A study of electronic device characteristics, basic circuits and biasing techniques. Solid state devices are emphasized. (Prerequisite: EET 1010)

**EET 1320—Electronics II**  
3 Credits  
Small signal amplifiers, tuned amplifiers, class A, B, C power amplifiers and basic feedback circuits. (Prerequisite: EET 1310)

**EET 1330—Electronics III**  
3 Credits  
A study of communication electronic circuits used in reception and transmission of modulated signals. (Prerequisite: EET 1320)

**EET 1315—Electronics Lab I**  
1 Credit  
(Laboratory to be taken concurrently with EET 1310)  
3 hours laboratory

**EET 1325—Electronics Lab II**  
1 Credit  
(Laboratory to be taken concurrently with EET 1320.)  
3 hours laboratory
EET 1335—Electronics Lab III ..............................................1 Credit
(Laboratory to be taken concurrently with EET 1330.)
3 hours laboratory

EET 1340—FCC License Preparation ........................................3 Credits
Preparatory course for those desiring to obtain their first or second class radio-
telephone operators license or third class permit from the Federal Communications
Commission. Technical questions similar to those on actual FCC examinations are
studied, as well as general and specific information on communications law and FCC
rules and regulations. Designed for those who already have a working knowledge of
electric circuits. (Prerequisite: EET 1110 or consent of instructor.)

EET 1410—Electronics Drafting I ..............................................2 Credits
Basic drafting practices, use of instruments, theory of projections, and freehand
sketching. Methods and principles of graphically presenting electronic information.
Covers the principles of circuit layout and introduces the student to electronic symbols
employed in electronic circuit schematics.
1 hour lecture—3 hours laboratory

EET 1420—Electronics Drafting II ..............................................2 Credits
Continuation of EET 1410 (Prerequisite: EET 1410)
1 hour lecture—3 hours laboratory

EET 1610—Electrical Systems Design I ........................................3 Credits
This course is a study of the design of electrical service systems for residential,
commercial and industrial applications. The student will learn to design electrical
systems in accordance with local and national electrical codes. Topics included will
be an introduction to electrical codes, types of conductors and cables, safety
grounding, overcurrent protection, branch circuits, estimate of loads, and equipment
selection. The student will be given practical problems in the layout and design of
electrical service systems for residential, commercial and industrial locations.
(Prerequisite: EET 1020)

EET 1620—Electrical System Design II ........................................3 Credits
A continuation of Electrical Systems Design I with emphasis on advanced design
problems. (Prerequisite: EET 1610)

EET 1630—Elements of Electrical Generation, Transmission and
Distribution .................................................................3 Credits
A study of the components of electrical power generation, transmission and genera-
tion, including transmission law theory and load flow studies. (Prerequisite: EET 1020)

EET 1635—Elements of Electrical Generation, Transmission, and
Distribution Laboratory ..................................................3 Credits
Experimental verification of principles introduced in EET 1630.
3 hours laboratory

EET 1640—Electrical Wiring ..................................................4 Credits
Basic principles and practice of modern electrical wiring for residential, commercial
and farm installations. Including installation of service entrance and ground, wiring of
specific outlets and common switch legs, wiring of heavy appliances, modernization of
installation, grounding theory and practice. Requirements of National Electrical Code
are emphasized through course.
3 hours lecture—3 hour laboratory

EET 2210—Electronics Project ..............................................1 Credit
The student selects an electronics project: designs, fabricates and tests the finished
project. (Prerequisite: EET 1210)
3 hours laboratory

EET 2250—Special Topics in Electronics .................................3 Credits
Subject areas in electronics selected by instructor, consistent with present needs of
industry. (Prerequisite: EET 1320)

ENGINEERING

ERG 1010—Engineering Graphics I ..................................................3 Credits
Basic drafting practices, the use of instruments, theory of projections, free hand
sketches, the graphic language, and representation of the shape and size of three
dimensional objects.
2 hours lecture—4 hours laboratory to be arranged

ERG 1020—Engineering Graphics II ..............................................3 Credits
Continuation of Graphics I with experience in working drawings and projections other
than orthographic. Special drawing techniques, assemblies, and details will be
emphasized together with a special project. (Prerequisite: ERG 1010 or consent of
instructor.)
2 hours lecture—4 hours laboratory to be arranged

ERG 1030—Engineering Graphics III ............................................3 Credits
A continuation of Graphics with special emphasis on the drafting practices pertinent to
civil engineering, electronics, piping or other type of drafting of most interest to the
student. The instructions will be centered around special problem assignments.
(Prerequisite: ERG 1010)

ERG 1050—Elementary Mechanics ..................................................3 Credits
Statics of particles and rigid bodies resultant of force systems, vector algebra,
equilibrium, friction, centers of gravity, centroids, and moments of inertia. (To be taken
by special certificate students only.) (Prerequisite: MAT 1050 or MAT 1010 and MAT
1020)

ERG 1100—Introduction to Engineering ...........................................3 Credits
An introduction to the different disciplines in the engineering fields, how they apply to
the solving of mankind's problems and the different levels of entry into these fields. This
course should help the student decide whether or not to enter engineering as a life's
work. Typical problems are solved and data presentations are considered.

ERG 1110—Applied Mechanics I ......................................................3 Credits
Statics of particles and rigid bodies resultant of force systems, static equilibrium,
friction, and moments. (Engineering Technology and certificate students only.)

ERG 1120—Applied Mechanics II ....................................................3 Credits
Dynamics of particles and rigid bodies, kinematics, kinetics, Newton's laws, and
impulse-momentum. (Prerequisite: ERG 1110)

ERG 1210—Blue Print Reading and Sketching .................................4 Credits
An interpretation of building plans and blueprints. Instructional material includes
special problems. (Same as FST 2020)

ERG 1300—Applied Thermodynamics ..............................................3 Credits
An introduction to the concepts of thermodynamics and its applicability to engineer­
ing. Work, heat, thermodynamic laws, etc. (Engineering technology students only)
(Prerequisite: ERG 1110)

ERG 2010—Engineering Mechanics I ..............................................3 Credits
Statics of particles and rigid bodies resultant of force systems, static equilibrium,
friction, and moments. (Prerequisite: MAT 2610 and PHY 2110) (Transfer students only)

ERG 2020—Engineering Mechanics II .............................................3 Credits
Dynamics of particles and rigid bodies, kinematics, kinetics, Newton's laws, and
impulse-momentum. (Prerequisite: ERG 2010) (Transfer students only)

ERG 2110—Thermodynamics ..........................................................3 Credits
Work and kinetic energy; temperature; heat; first law of thermodynamics. (Prerequisite:
MAT 2610)

ERG 2210—Strength of Materials ....................................................3 Credits
Stress; strain; Hook's Law; extension, torsion, and bending of bars; plastic action.
(Prerequisite: ERG 1050 or ERG 1110)

**ENGLISH**

**ENG 1010—Composition I**  
Composition: establishing purpose, organization, paragraph structure, style, grammar and mechanics; reading: for meaning and ways of expressing meaning.

**ENG 1020—Composition II**  
Composition: patterns and techniques of development, documentation (preparation of a documented paper); reading: essays and short fiction. (Prerequisite: ENG 1010)

**ENG 1030—Composition III**  
Composition: writing based on fiction, drama, and poetry; reading: fiction, drama, and poetry. (Prerequisite: ENG 1020)

**NOTE:** Composition I, II, and III are prerequisite to Sophomore English. Sophomore English requirements may be met with any two of the five Sophomore Literature courses offered—World Literature I, II, III, or American Literature I or II.

**ENG 2110—World Literature I**  
Greek and Roman mythology, drama, epic, history, and philosophy; The Bible; Germanic myth and saga; Beowulf; Dante; Medieval romance; Chaucer; Cervantes. (Prerequisite: ENG 1030)

**ENG 2120—World Literature II**  
Survey of world literature from the Renaissance through the Romantic period. Emphasis on Shakespeare, Molière, Voltaire, Swift, Goethe, and the Romantic Poets. (Prerequisite: ENG 1030)

**ENG 2130—World Literature III**  
Realism in fiction. Modern poetry and drama. Emphasis on Dostoevsky, Tolstoy, Ibsen, Yeats, Shaw, Sartre, and Solzhenitsyn. (Prerequisite: ENG 1030)

**ENG 2140—American Literature I**  
Colonial through 1860. Emphasis on Poe, Hawthorne, Melville, Emerson, Thoreau, and Whitman. (Prerequisite: ENG 1030)

**ENG 2160—American Literature II**  
From 1860 through modern. Emphasis on Dickinson, James, Clemens, Frost, Hemingway and Faulkner. (Prerequisite: ENG 1030)

**ENG 2310—Children's Literature**  
Characteristics and methods of teaching children's literature.

**ENG 2810—Creative Writing**  
Theory and practice of the creation of fiction, drama, and poetry by the analysis of models and student manuscripts.

**ENG 2820—Technical Writing**  
An intensive study in the principles of exposition and practice in writing letters, technical reports, outlines, abstracts, and a research paper related to the student's field of specialization.
FIRE SCIENCE TECHNOLOGY

FST 1010—Introduction to Fire Science ........................................3 Credits
A course to acquaint the students with the broad field of Fire Science. Emphasis on some of the problems of the Fire Service with potential or possible solutions.

FST 1030—Industrial Hazards ..................................................3 Credits
A course emphasizing the causes of fires in various types of industries. Explores new techniques and chemicals used in industrial fires.

FST 1040—Fundamentals of Fire Prevention ..............................3 Credits
Principles and application of fire prevention related to the community and industrial plants. The development and maintenance of fire prevention programs, educational programs and fire prevention research. Specific applications of related disciplines to fire prevention problems.

FST 1050—Personal Fire and Life Safety ........................................3 Credits
Review of personal fire and life safety problems as they affect the individual at home, work, and social activities. Means of preventing fires and safeguarding devices covered, related to the various disciplines.

FST 1110—Construction Codes and Fire Protection Standards ..........3 Credits
A study of fire codes and standards. The course includes a study of modern protection equipment and building construction materials.

FST 1120—Environmental Technology .........................................3 Credits
This course analyzes the impact of human activities upon systems in nature. Special attention is given to conservation resources management, principles, and current controversies in areas such as forestry, recreation, soils, water, and wildlife. (Same as GGY 1040)

FST 2010—Fire Fighting Strategy ...............................................3 Credits
A course illustrating the physical and chemical aspects of fire suppression technology. The student will pursue a detailed study of the chemistry of fire, along with modern methods of fire suppression, tactical decisions and post fire analysis.

FST 2020—Blueprint Reading and Sketching ...............................4 Credits
An interpretation of building plans and blueprints. Instructional material includes special problems. (Same as ERG 1210)

3 hours lecture—3 hours laboratory

FST 2040—Arson Detection and Investigation .............................3 Credits
Determination of cause of accidental and incendiary fire, fire losses and loss of records, points of origin, location and preservation of evidence, and scientific aids to investigation. Courtroom procedure in presenting evidence. Motives and methods of fire setting and investigative methods are covered.

FST 2060—Fire Protection Law ..................................................3 Credits
A study of law in relation to fire protection. Torts, terms, and contracts studied by case method. Liability of fire protection personnel when making inspections, recommendations, fighting fires, and other tasks. Pertinent laws, ordinances, and codes and the responsibility and powers of the individual or organization concerning enforcement.

FST 2080—Methods of Fire Instruction ........................................3 Credits
The principles of learning and teaching as applied to municipal and industrial fire and safety tasks. The analysis of training needs, course development, lesson plans, and teaching techniques. Study of audio-visual equipment and materials.

FST 2110—Inspection Principles and Practices ............................4 Credits
The course includes the development and philosophy of fire inspection. Emphasis is on inspection techniques and the development of technical inspection reports. (Prerequisite: FST 1110)

3 hours lecture—3 hours laboratory
ROANE STATE COMMUNITY COLLEGE

FST 2120—Principles of Hydraulics ........................................... 3 Credits
Surveys the basic laws of hydraulics. Includes a study of the fundamentals of pressures and measurements. Reviews related math and pertinent theorems and formulas.

FST 2210—Hazardous Materials ........................................... 3 Credits
Study of chemical characteristics and reactions related to storage, transportation, handling hazardous materials, i.e., flammable liquids, combustible solids, oxidizing and corrosive materials and radioactive compounds. Emphasis on emergency situations and fire fighting and control.

FST 2220—Water Distribution ........................................... 3 Credits
A study in applying the principles of hydraulics to fire fighting problems. Attention is also given to water supply problems. (Prerequisite: FST 2120)

FST 2230—Water Suppression Systems ........................................... 3 Credits
Study of the required standard for water supply; automatic sprinklers and special extinguishing systems; automatic signaling and detection systems; rating organizations and underwriting agencies.

FST 2510—Fire Protection Equipment and Systems ........................................... 3 Credits
A study of the operation and maintenance of fire apparatus and pumps. Attention is focused on the required standards for water supply as it is related to automatic sprinklers and special extinguishing systems. Includes an analysis of various automatic signaling and detection systems.

FST 2610—Fire Department Administration ........................................... 3 Credits
A detailed study of the Fire Department Organization. Includes fire company organization; the company officer (duties, responsibilities, leadership, supervision); company personnel administration; company communications; company maintenance and training; records and reports; and problem solving.

FST 2620—Seminar ........................................... 3 Credits
A course designed to consolidate the various learning experiences in fire fighting. Emphasis is placed on special problems.

FST 2700—Practicum ........................................... 2 Credits
Practical experience is provided for each student through cooperative agreements with local fire stations. Emphasis is placed on the day-to-day activities of firemen.

FRENCH

FRE 1010—Beginning French I ........................................... 3 Credits
(No prerequisite)

FRE 1020—Beginning French II ........................................... 3 Credits
(Prerequisite: FRE 1010)

FRE 1030—Beginning French III ........................................... 3 Credits
Elementary grammar, pronunciation, and conversation through use of films, videotapes, cassette tapes, filmstrips, and computer programs. (Laboratory required.) (Prerequisite: FRE 1020)

FRE 2010—Intermediate French I ........................................... 3 Credits
(Prerequisite: FRE 1030)

FRE 2020—Intermediate French II ........................................... 3 Credits
(Prerequisite: FRE 2010)

FRE 2030—Intermediate French III ........................................... 3 Credits
Advanced grammar and conversation through use of films, videotapes, cassette tapes, filmstrips, computer programs and library readings. (Laboratory required.) (Prerequisite: FRE 2020)
ROANE STATE COMMUNITY COLLEGE

GEOGRAPHY

GGY 1010—Physical Geography I ...........................................3 Credits
(Atmospheric Environment)
A study of the processes and principles which govern atmospheric activity and world climatic patterns. Subjects of interest include storms (tornadoes, hurricanes, thunderstorms), air pollution, weather modification, and climatic change.

GGY 1020—Physical Geography II ...........................................3 Credits
(Earth Physical Systems)
An investigation of the natural environment as a system comprised of landforms, soils, vegetation, and animals, each conditioned by climate. Topics of interest include volcanoes and earthquakes, stream erosion and mountain building, continental drifting and animal distributions, and soil formation and vegetation development. (No prerequisite)

GGY 1030—Introduction to Human Geography .............................3 Credits
An introduction to the basic concepts in human geography, including population, political, cultural, urban, and economic geography. Attention is given to analysis of current world problems and issues.

GGY 1040—Environmental Technology: Conservation of Resources .................................................................3 Credits
This course analyzes the impact of human activities upon systems in nature. Special attention is given to conservation resources management, principles, and current controversies in areas such as forestry, recreations, soils, water, and wildlife. Cross referenced Fire Science Technology (FST) 1120.

GGY 2110—World Regional Geography I .....................................3 Credits
A geographic survey of North America, with particular emphasis upon current regional problems.

GGY 2120—World Regional Geography II ....................................3 Credits
A geographic survey of South America and Europe which seeks to broaden perspectives regarding the world and its peoples.

GGY 2130—World Regional Geography III ....................................3 Credits
A geographic survey of the Middle East, Africa, Asia, and Australia which seeks to broaden perspectives regarding the world and its peoples.

GGY 2210—Introduction to Economic Geography ..........................3 Credits
A survey of agricultural, mining, manufacturing, transportation and service activities as they affect man's economic life.

GEOLOGY

The geology sequence GEO 1610, 1620, 1630 offers students another branch of science with which to fulfill curriculum requirements.

The GEO 1610, 20, 30 sequence will provide the necessary background in geology in the Mining Technology Program.

GEO 1610—Physical Geology I ..............................................4 Credits
The study of materials and structure of the earth. Topics include identification of common rocks and minerals; the earth's interior as revealed by geophysical methods; processes and results of deformation, plate tectonics.
3 hours lecture—3 hours laboratory

GEO 1620—Physical Geology II ..............................................4 Credits
The study of geologic processes in landform development. Topics include: ground water; wind and water erosion; deposition; glaciation; regional geomorphic features. Current problems in economic and environmental geology are discussed. (Prerequisite: GEO 1610)
3 hours lecture—3 hours laboratory
GEO 1630—Historical Geology ................................................. 4 Credits
The study of the earth's history, physical and biological, as interpreted from the rock and fossil records. Topics include: stratigraphy; paleontology; evolution of the North American continent; origin of the earth. (Prerequisite: GEO 1610)
3 hours lecture—3 hours laboratory

GERMAN

GRN 1010—Beginning German I .............................................. 3 Credits
Introduction to the fundamentals of German grammar. Emphasis on vocabulary building and the German case system. (Course presupposes no prior German on the part of the student.)

GRN 1020—Beginning German II ............................................. 3 Credits
Continues to build on skills developed in German 1010. Emphasis on the German verb and tense system. (Prerequisite: GRN 1010 or the consent of the instructor.)

GRN 1030—Beginning German III ............................................. 3 Credits
Completes survey of basic German grammar. The passive voice and the subjunctive. Elementary readings in German. (Prerequisite: GRN 1020 or the consent of the instructor.)

GRN 2010—Intermediate German I ........................................... 3 Credits
GRN 2020—Intermediate German II ......................................... 3 Credits
GRN 2030—Intermediate German III ......................................... 3 Credits
Reading intermediate texts, grammar review, and oral practice. (Prerequisite: GRN 1030 or equivalent.) (Laboratory required.)

HEALTH

HEA 2210—Personal Health .................................................. 3 Credits
A consideration of principles from the natural, biological, social, and behavioral sciences as they may be applied to healthful living. Emphasis on knowledge, attitudes, and practices related to self-direction of health behavior.

HEA 2310—Safety and First Aid ............................................. 3 Credits
Designed to provide knowledge and skills which will enable students to meet the needs of most emergency situations. Personal safety and accident prevention information are also incorporated into the course. Upon satisfactory completion of the course, students will receive the American Red Cross Standard First Aid Certificate.

HEA 2410—Community Health ............................................... 3 Credits
A course designed to give an understanding of basic principles of community health education. Emphasis will be on developing health habits essential to wholesome living.

HISTORY

HIS 1010—Survey of Western Civilization I ................................ 3 Credits
Analysis of western civilization from classical antiquity to the Reformation with emphasis on the political, social, economic, and religious themes on which western culture is based.

HIS 1020—Survey of Western Civilization II ................................ 3 Credits
Western civilization from the mid 16th century, beginning with the Wars of Religion, to 1860.

HIS 1030—Survey of Western Civilization III ................................ 3 Credits
Western civilization from 1860 to the present.
### HIS 2110—Survey of American History I ................................. 3 Credits
European origins of American civilization, severance of European ties, national growth, democratic expansion, and sectional patterns to 1840. (Prerequisite: ENG 1010 or consent of history instructor) (Suggested Corequisite: REA 1010, History Emphasis)

### HIS 2120—Survey of American History II ................................. 3 Credits
National and sectional developments: causes and results Manifest Destiny, War Between the States, rise of industrialism, rise of imperialism, c 1840-1900. (Prerequisite: ENG 1010 or consent of history instructor) (Suggested Corequisite: REA 1010 or 1020, History Emphasis)

### HIS 2130—Survey of American History III ................................. 3 Credits
Emergence of United States as a world power, the growth of federal power and democratic expansion, 1900-present. (Prerequisite: ENG 1010 or consent of history instructor) (Suggested Corequisite: REA 1010, or 1020, History Emphasis)

### HORTICULTURE

#### HOR 2310—Ornamental Trees, Shrubs, And Vines .......................... 3 Credits
The identification, culture, adaptation and landscape design values of ornamental trees, shrubs, and vines.

2 hours lecture—2 hours laboratory

#### HOR 2410—Residential Landscaping ........................................ 3 Credits
Principles of organizing and planning residential grounds utilizing ornamental plants, outdoor structures, and other landscape materials. Includes the preparation of landscape planes and the figuring of cost-estimates.

2 hours lecture—2 hours laboratory

#### HOR 2420—Landscape Maintenance .......................................... 3 Credits
Principles and techniques of establishing and maintaining healthy trees, shrubs and lawns; planting methods including site selection and preparation; pruning techniques; important insects and diseases of ornamental plants; landscape maintenance tools and equipment.

2 hours lecture—2 hours laboratory

### HUMANITIES

#### HUM 2800-2899—Humanities Seminar .................................... 3 Credits
This course is designed for those students who are interested in pursuing an in-depth study of some particular humanities problem.

### INSURANCE

#### INT 1010—Principles of Insurance ........................................ 3 Credits
Economic, social and historical background of insurance. Types, scope and organization of insurance companies. Basic forms of property and liability life insurance and annuities.

#### INT 1110—Basic Life and Health Insurance ............................... 3 Credits
Basic study of instruments used in personal, group, and social insurance. Analysis of risks of economic loss and policyholder protection through utilization of various policy types, riders, contracts and state regulations.
### INT 1120—Basic Property Insurance 3 Credits
Coversages, policy provisions and concepts common to the standard fire policy and related forms allied fire lines and inland marine coverages. Burglary, theft, robbery, casualty-property, homeowners policies, business interest, underwriting and regulations. Experience modification in Workman's Compensation and other contemporary rate making methods.

### INT 1130—Basic Casualty Insurance 3 Credits
Detailed analysis of casualty hazard services, development, meaning, and legal characteristics. Contracts of automobile types, inland and ocean marine and other general personal liability contract forms.

### INT 2110—Advanced Life and Health Insurance 3 Credits
Surveys Estate and Tax plannings, trusts, wills and business uses of life and health insurance, social insurance, public assistance and personal risks. Types of individual and group insurance plans and their applicability in employee benefit plans.

### INT 2120—Advanced Property Insurance 3 Credits
Underwriting Agency Company relationships, loss appointment to include fire rating analysis, CPC coverage, manufacturer's output PIP, rating principles and multiple location-composite HPR.

### INT 2130—Advanced Casualty Insurance 3 Credits
Emphasis on pricing differentials through use of experience, schedule, composite, and retrospective rating.

### JOURNALISM

#### JRN 1110—Introduction to Mass Communications 3 Credits
A survey course of contemporary mass communications media and agencies: newspapers, magazines, radio, television, film, advertising, public relations, the recording industry, press associations and specialized publications. Emphasis is on the content of the mass media and the effects the media have on society and individual citizens.

#### JRN 1510—Journalism Practicum I 1 Credit
#### JRN 1520—Journalism Practicum II 1 Credit
#### JRN 1530—Journalism Practicum III 1 Credit
Laboratory courses offering practical experience for students working on the student newspaper, yearbook, other campus publications and off-campus publications. Each course carries one hour credit, and students may earn up to six credits by enrolling for one course each quarter.

#### JRN 2210—Writing for Mass Media 3 Credits
A general course in writing for major types of mass communications media, with emphasis on news reporting. (Prerequisite: JRN 1110 and typing proficiency, or permission of instructor.)

#### JRN 2220—Reporting 4 Credits
Methods of gathering and reporting facts for mass media. Emphasis is on news and news features. Three hours class plus practical assignments which might include work for the campus newspaper. (Prerequisite: JRN 2210 or permission of instructor.)

#### JRN 2230—Editing for Mass Media 3 Credits
Copy reading methods and practice in editing copy for print and broadcast media, with emphasis on different types of copy and refinement of writing skills. Assignments might include practical work for the campus newspaper. (Prerequisite: JRN 2220 or permission of instructor.)

</tr>
</thead>
<tbody>
<tr>
<td>MAT 1010</td>
<td>Technical Math I</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Algebraic expressions and operations, factoring, fractions, solving one-variable equations, linear and quadratic functions, graphing of functions. Primarily for technology students. Not to be taken in addition to MAT 1050. (Prerequisite: 1 year of high school algebra and geometry or consent of instructor.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1020</td>
<td>Technical Math II</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>A continuation of MAT 1010, emphasizing systems of equations, exponents and radicals, solving quadratic and radical equations, numerical trigonometry, logarithms, applications. Not to be taken in addition to MAT 1050. (Prerequisite: MAT 1010 or consent of instructor.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1050</td>
<td>Algebra and Trigonometry I</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Algebraic expressions and operations, factoring, fractions, solving equations and systems of equations, functions, graphing of functions, numerical trigonometry, logarithms, applications. Not to be taken in addition to MAT 1010 and MAT 1020. (Prerequisite: 1 year high school algebra and geometry or consent of instructor.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1060</td>
<td>History of Mathematics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>A study of the development of mathematics and its relation to civilization.</td>
<td></td>
</tr>
<tr>
<td>MAT 1070</td>
<td>Geometry</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>A study of the most used theorems in plane and solid Euclidean geometry.</td>
<td></td>
</tr>
<tr>
<td>MAT 1110</td>
<td>Introduction to Analysis I</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Sets, real numbers, algebraic expressions and operations, equations, inequalities, relations, functions, graphs. (Prerequisite: 2 years high school algebra or 1 year high school algebra and 1 year high school geometry.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1120</td>
<td>Introduction to Analysis II</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Average rates, differentiation, integration, applications. (Prerequisite: MAT 1110.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1130</td>
<td>Introduction to Analysis III</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Systems of linear equations and inequalities, trigonometric functions, simple and compound interest, exponential and logarithmic functions. (Prerequisite: MAT 1120)</td>
<td></td>
</tr>
<tr>
<td>MAT 1210</td>
<td>Trigonometry</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Analysis of functions of angles with their relations, logarithms, and solution of right and general triangles. A calculus sequence student who is lacking in trigonometry background is strongly advised to take this trigonometry course either before or concurrent with MAT 2620. (Prerequisite: 2 years of high school algebra and the consent of instructor.)</td>
<td></td>
</tr>
<tr>
<td>MAT 1310</td>
<td>Symbolic Logic</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Logical symbolism, truth tables, propositional calculus, properties of formed systems. (Same as PHL 1310).</td>
<td></td>
</tr>
<tr>
<td>MAT 1500</td>
<td>Pre-Calculus</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Designed primarily for students planning to enter calculus, but needing more mathematical background. Topics include sets, real numbers, functions, coordinate</td>
<td></td>
</tr>
</tbody>
</table>
geometry, inequalities, exponential and logarithmic functions, trigonometric functions, systems of equations, and the binomial theorem. (Prerequisite: 2 years high school algebra or MAT 1050 or MAT 1010, MAT 1020.)

MAT 2310—Concepts of Mathematics I .......................... 3 Credits
Sets, language and rules for operation, history of early number systems, relations and functions, the system of whole numbers. Designed for elementary and secondary education majors. It is desirable, but not required, that the student have had high school algebra and/or geometry.

MAT 2320—Concepts of Mathematics II .......................... 3 Credits
Algorithms for whole numbers, systems of integers and rational numbers, decimals, percentages, number theory, irrational numbers, some basic algebra. A continuation of MAT 2310, designed for elementary and secondary education majors. (Prerequisite: MAT 2310)

MAT 2330—Concepts of Mathematics III ......................... 3 Credits
Interest problems, plane and solid geometry, the metric system, basic statistics, and basic symbolic logic. A continuation of MAT 2320, designed for elementary and secondary education majors. (Prerequisite: MAT 2320)

MAT 2510—Elementary Statistics ................................. 3 Credits
An introduction to elementary methods and techniques. Topics covered include sampling, frequency distributions, elementary probability, binomial distributions, normal distributions, null hypothesis, significance of data. A statistical project of an elementary nature including collecting, presenting and interpreting data is required. Primarily for computer technology and accounting technology majors. (Prerequisite: A college level algebra course or consent of the instructor.)

MAT 2520—Elementary Statistics II .............................. 3 Credits
A continuation of hypothesis testing begun in Elementary Statistics I. Topics covered will be confidence intervals, linear regression and correlation, analysis of variance and non-parametric statistics. In addition, the student will be expected to write a computer program for each of the hypothesis tests covered. Prerequisites: MAT 2510, CST 1020 or CST 2210, or equivalent.

MAT 2550—Probability and Statistics ............................ 3 Credits
Elementary theory of probability; frequency and density functions; expected values and variances. Emphasis is on probability distributions and fundamental concepts of statistical inference. Should be taken by students who intend to continue with statistical applications in a later course. Primarily for majors in mathematics, science, and business administration transfer programs. (Prerequisite: MAT 1130 or 2610.)

MAT 2610—Calculus and Analytic Geometry I .................... 5 Credits
Rate of change, limits, continuity, differentiation, applications of the derivative, introduction to integration. (Prerequisite: 2 years high school algebra, 1 year high school geometry, 1 year high school advanced math or MAT 1500 or consent of instructor.)

MAT 2620—Calculus and Analytic Geometry II ............................ 5 Credits
Application of the definite integral, transcendental functions, integration, determinants and linear equations. (Prerequisite: MAT 2610)

MAT 2630—Calculus and Analytic Geometry III ............................ 5 Credits
Plane Analytic Geometry, hyperbolic functions, polar coordinates, vectors and parametric equations. (Prerequisite: MAT 2620)

MAT 2640—Calculus and Analytic Geometry IV ............................ 5 Credits
Solid Geometry and vectors, partial differentiation, multiple integrals and infinite series. (Prerequisite: MAT 2630)
MAT 2650—Linear Algebra ........................................ 3 Credits
Euclidean n-space, linear independence, basis, inner product, cross product, norm, systems of linear equations, matrices and elementary matrix operations, characteristic equation and eigenvalues, introduction to linear functions and vector spaces. (Prerequisite: MAT 2620)

MAT 2700-2709—Independent Study ............................ 3 Credits
Independent study in mathematics by qualified students under the supervision of a faculty member. Especially designed to introduce student to techniques of mathematical research. Up to nine credit hours may be earned. (Prerequisite: MAT 2620 and consent of the faculty member.)

MAT 2710—Differential Equations ................................. 5 Credits
A study of the solution of ordinary differential equations, first order equations, linear equations of any order, series solutions and applications. (Prerequisite: MAT 2620)

MECHANICAL TECHNOLOGY

MET 1010—Manufacturing Processes I ............................ 3 Credits
This course is designed to provide a background of knowledge covering the various manufacturing materials and the fundamental types of manufacturing methods as employed in cold working processes. Through lecture, demonstration, and practical applications the student is given the opportunity to become familiar with the various types of machine tools, tooling, measuring, and inspection procedures. Automation is introduced and information is presented to acquaint the student with the modern practices of numerical control for machine tools and the uses of transfer and special machines.

2 hours lecture—3 hours laboratory

MET 1020—Manufacturing Processes II ............................ 3 Credits
This course is designed to provide a background of knowledge covering the various manufacturing materials and the fundamental types of manufacturing methods as employed in hot working processes. Through lecture, demonstration, and discussion the student becomes familiar with the various types of welding processes and their applications, with special machining operations such as ultrasonic, electrical discharge, electroarc, and chemical milling, and with bonding practices and the use of adhesives in modern manufacturing. Some emphasis is also given to metallurgical practices and procedures. Practical experience is gained by the student in performing simple arc and oxyacetylene welding operations, in producing simple molds, cores, and castings, and in basic heat treating, inspection, and testing, using both destructive and nondestructive methods. (Prerequisite: MET 1010)

2 hours lecture—3 hours laboratory

MET 1110—Materials of Industry .................................. 3 Credits
Modern industry utilizes a variety of engineering materials with which the student in mechanical technology must be familiar. A study is made of the five general classifications of materials and their application to industrial uses. Special emphasis is given to new materials which have been developed through technological advances.

MET 1210—Industrial Organizations and Institutions .................. 3 Credits
A description and analysis of roles of labor and management in the economy. Approximately one-half of the classroom time is devoted to labor-management relations, including the evolution and growth of the American labor movement and the development and structure of American business management. A study is made of the legal framework within which labor-management relations are conducted and the responsibilities of each in a democratic system of government. The second half of the course pertains to labor economics as applied to the forces affecting labor supply and demand, problems of unemployment reduction and control, and wage determination.
on the national, plant, and individual levels. Emphasis centers upon current practical aspects of our industrial society with historical references intended only as background material to interpret trends and serve as points of departure.

**MET 1310—Hydraulics and Pneumatics** ........................... 3 Credits
A study of the basic components of hydraulic and pneumatic systems and how they are combined to build up various circuits. The emphasis is on the use of hydraulics and pneumatics for power transmission and for control purposes. Both areas are treated as basic sciences with emphasis on mathematical analysis and the scientific method. It is recommended that individual term problems requiring a significant amount of handbook design be required for this course.

2 hours lecture—3 hours laboratory

**MET 1510—Air Conditioning and Refrigeration I** ....................... 3 Credits

**MET 1520—Air Conditioning and Refrigeration II** ...................... 3 Credits
A two course sequence. Design and layout of heating and air conditioning systems, (hot water, steam, warm air, radiant, electrical and solar), basic principles in determining heat gain and heat losses in structures, selection and use of equipment for year-round conditioning.

**MET 2010—Piping Drafting** ........................................ 3 Credits
Fundamental principles of designing pipe systems, including development of diagrams, arrangements and schemes with information concerning standards and specifications of the components in typical systems. (Prerequisite: ERG 1010)

1 hour lecture—6 hours laboratory

**MET 2110—Machine Design** ............ ...... ........................ 3 Credits
A course in which the design principles of manufacturing elements are taken up and calculations are made in determining the size and shape of various machine parts. It includes factors which influence the selection of materials to be used in designing such elements as beams, bearings, clutches, brakes, shafts, bushings, screens, rivets, gears, belts, and fly wheels. Attention is given to various types of loading conditions, stresses, deformations, fits, finishes, and other factors which must be considered in the design of machine elements. (Prerequisite: ERG 2210)

**MET 2210—Basic Tool Design** .............. ........... ..... .......... 4 Credits
Lectures, classroom discussion, and actual drawing practice are combined to help the student gain knowledge and experience necessary to design tools commonly used in modern manufacturing. The work consists of designing and laying out cutting tools, gauges, simple jigs, fixtures, and dies. Mass production methods are discussed so that the student may apply the information gained in the practical work of tool designing. (Prerequisites: ERG 1010, MET 1010)

1 hour lecture—9 hours laboratory

**MET 2310—Design Problems** .................. ........... ........ 4 Credits
Opportunities in advanced drafting room practices are offered in this course. The student applies his/her knowledge of mathematics, science, and drawing to practical problems while he/she is designing complete machines or component parts of machines. He/she analyzes the problem, gathers data, sketches ideas on paper, does all necessary mathematical calculations, makes working drawings, and finally checks his/her work. Throughout the course he/she is encouraged to use his/her judgment and work on his/her own initiative. (Prerequisites: ERG 1010, MET 1010)

1 hour lecture—9 hours laboratory

**MET 2410—Methods and Operations Analysis** .................... 4 Credits
Understanding of the techniques used in determining the best way of doing a specific piece of work is developed through the systematic study of methods, materials, tools, and equipment for the purpose of finding the most economical way of doing the work, standardizing the methods and procedures to be used, and determining the time required by an average worker to perform the various tasks. Laboratory activities
include the analysis of the fundamental physical motions, the construction of various charts, the practice of dividing operations into elementary and time study observations. Additional experience is gained in recognizing and giving value to foreign elements, allowances, and performance rating, and in calculating average cycle time, minimum observations, and standard times.

3 hours lecture—3 hours laboratory

**MET 2510—Statistics and Quality Control ........................................3 Credits**
An elementary approach to the statistical techniques used in the control of the quality requirements of manufactured articles. The course is primarily intended for those who have had no previous experience. The entire course is woven around a core which consists of the application of formulas and control charts. The main objectives covered include sampling inspection techniques, use of inspection tools and instruments, construction and interpretation of control charts for variables, defects, and fraction defective. Concentrated effort is put on the relationship of theoretical concepts to practical manufacturing operations and processes so that assignable causes and weaknesses in a process can be readily isolated and recognized.

2 hours lecture—3 hours laboratory

**MET 2610—Plant Layout and Materials Handling ..............................4 Credits**
Emphasis is placed upon the relationship between good plant layout and efficient materials handling. Evaluation of the site and planning of the factory building are done with consideration of transportation, shipping and receiving, power, heat, light, and air conditioning. Selection and arrangement of production machinery, product and process layout schemes, techniques of making layouts, and balance and flexibility of operations are discussed. Study is also made of the basic packaging and materials protection methods along with consideration of the specific types of equipment used in the movement of incoming, in-process, storage, and waste materials.

3 hours lecture—3 hours laboratory

**MET 2710—Process Planning ......................................................4 Credits**
A comprehensive study of the fundamental principles, practices, and methods of process planning. The responsibilities and range of activities normally associated with process planning are surveyed; also the relationship of process planning to other manufacturing functions in the course is made meaningful by reference to concrete examples, interpretation of charts, operation analysis, and routing forms. Student participation is provided through selected case problems having single or multiple solutions. Additional classroom activities include the actual process planning of selected jobs in terms of description and sequence of operations, set-up time estimating, feed and speed calculations, process and machinery selection.

3 hours lecture—3 hours laboratory

**MET 2810—Production Problems ...............................................4 Credits**
A detailed study is made of various production activities and the problems associated with them. Problems and cases are solved through the use of available data in texts and engineering handbooks. Discussion of each topic begins with a consideration of the nature of the problem and continues with a presentation of the detailed approach to be employed in its solution. Some problems deal with the analysis of the elements of production scheduling. Others deal with methods of determining production costs in terms of labor, material, and burden. Balancing work stations on production lines by graphic, as well as mathematical means to achieve constant flow and calculating machine capacities to establish completion dates, represent a major portion of the laboratory work.

1 hour lecture—9 hours laboratory

**MET 2910—Industrial Safety ......................................................3 Credits**
A course to acquaint the student with safety in industry including the basic philosophy of safety programs and administrations, policies and procedures of accident preventions, and compliance with requirements of OSHA.
MEDICAL LABORATORY TECHNOLOGY

MLT 1010—Introduction to Medical Laboratory Technology ........... 3 Credits
Introduction to the objectives and goals of Medical Laboratory Technology. Orientation to the health care team, and to the organization and operation of the clinical laboratory. Introduction to medical terminology, medical ethics, and laboratory records. (Prerequisite: Permission from Program Director)

MLT 1020—Orientation to Laboratory Techniques ................. 4 Credits
A continuation of Introduction to Medical Laboratory Technology. Emphasis is placed on urinalysis, blood collection techniques, and manual cell counts.

3 hours lecture—3 hours laboratory

MLT 2010—Clinical Education I ................................. 13 Credits
Clinical experience in a hospital laboratory covering the following areas: Blood bank, Chemistry, Hematology, Microbiology, Parasitology, Serology, and Urinalysis. (Prerequisite: MLT 2120, 2210, 2510, 2610, BIO 2520)
39 hours clinical laboratory

MLT 2020—Clinical Education II ................................. 13 Credits
Continuation of Clinical Education I. (Prerequisite: MLT 2010)
39 hours clinical laboratory

MLT 2110—Medical Biochemistry I ............................... 5 Credits
Methods for the quantitative analysis of body fluids for chemical constituents of diagnostic importance. This course includes the study of the metabolism of carbohydrates, nitrogen, iron, hormones, vitamin, enzymes, electrolytes, and their variation in diseases. Emphasis is also placed on quality control and instrumentation. (Prerequisite: CHE 1130)
3 hours lecture—6 hours laboratory

MLT 2120—Medical Biochemistry II ............................. 5 Credits
A continuation of Medical Biochemistry I. (Prerequisite: MLT 2110)
3 hours lecture—6 hours laboratory

MLT 2210—Hematology ........................................... 4 Credits
The study of principles and techniques of hematology. This includes the formation and maturation of blood cells, function of blood cells, coagulation studies, and cerebrospinal fluid studies. Emphasis is also placed on the disease states of blood. The laboratory will cover basic techniques including blood cell and platelet counts, hemoglobin, hematocrit, blood cell morphology, and coagulation. (Prerequisite: MLT 1020)
3 hours lecture—3 hours laboratory

MLT 2310—Immunology ........................................... 3 Credits
Basic principles of antigen and antibody reactions with emphasis on basic serologic methods for the detection of infectious disease and various immune states. (Prerequisite: MLT 1020)
2 hours lecture—3 hours laboratory

MLT 2510—Parasitology ........................................... 3 Credits
A study of disease producing parasites which invade the human body. Emphasis is placed on the isolation and morphologic identification of parasites. (Prerequisite: MLT 1010)
2 hours lecture—3 hours laboratory

MLT 2610—Immunohematology ................................. 4 Credits
The study of blood group antigens with emphasis placed on the A-B-O and RH group systems. The course will also include component preparation, donor selection, transfusion reactions, and immunoglobulin work-up on newborns and mothers. The laboratory will deal with A-B-O and RH typing, compatibility testing, and antibody screening. (Prerequisite: MLT 2310)
3 hours lecture—3 hours laboratory
MLT 2710—Seminar I .......................................................1 Credit
Presentation of current topics in the clinical laboratory by students and outside speakers. (Corequisite: MLT 2010)

MLT 2720—Seminar II ......................................................1 Credit
A continuation of Seminar I. (Corequisite MLT 2020)

MEDICAL RECORDS

MRT 1010—Medical Records I ........................................3 Credits
Introduction to the history of medicine, the hospital and medical records. Lecture and classroom laboratory experience which will enable the student to be familiar with the purposes, content, and uses of the medical record. Laboratory practice in the analysis and assembly of medical records. (Prerequisite: Permission from Program Director.) (Corequisite: MRT 1210) (BIO 2310 is a Prerequisite or Corequisite)
2 hours lecture—3 hours laboratory

MRT 1020—Medical Records II ........................................3 Credits
Orientation to the methods of numbering, systems of filing, microfilming and the retention of medical records. Lecture and classroom laboratory practice in the methods of compiling hospital statistics, both manually and by computer. Laboratory practice in gathering statistics and working with formulas to compile actual reports and computer abstracting. (Prerequisite: MRT 1010) (Corequisite: MRT 1220) (BIO 2320 is a Prerequisite or Corequisite)
2 hours lecture—3 hours laboratory

MRT 1030—Medical Records III ......................................3 Credits
Introduction to the disease and operation classification and the indexes maintained in the medical record department. Instruction in SNDO as a nomenclature and laboratory practice in the coding and indexing by ICD-A. Legal aspects of medical records are introduced. Special attention is given to consents, authorizations, release of information and handling medical records in court. (Prerequisite: MRT 1020) (Corequisite: MRT 1230) (BIO 2330 is a Prerequisite or Corequisite)
2 hours lecture—3 hours laboratory

MRT 1210—Medical Terminology I .................................3 Credits
Introduction to the principles of medical terminology and the use of word elements as building blocks for medical terminology. (Corequisite: MRT 1010)

MRT 1220—Medical Terminology II ................................3 Credits
Further study of medical terminology with emphasis on terminology as it relates to the systems of the body. (Corequisite: MRT 1020) (Prerequisite: MRT 1210)

MRT 1230—Medical Transcription ....................................3 Credits
Additional study in medical terminology in conjunction with medical transcription. Lecture and actual practice in transcription will be coordinated. Practice transcription will include X-ray reports, medical history, physicals and summaries plus operative reports. Emphasis will also be given to the management of the steno pool, incentive pay plans, training methods, etc. (Corequisite: MRT 1030) (Prerequisite: MRT 1220)
2 hours lecture—3 hours laboratory

MRT 2310—Directed Practice I ..........................................3 Credits
Actual practice under the direction of a Medical Record Practitioner in a local hospital department. Orientation to the admitting office and medical record department. Practice in the admitting and discharge procedure plus filing methods. (Prerequisite: MRT 1030) (Corequisite: MRT 2410)
9 hours clinical experience
MRT 2320—Directed Practice II ................................. 3 Credits
Hospital practice in coding and indexing and in statistical compilation and reports.
Actual practice in the release of information. (Prerequisite: MRT 2310) (Corequisite: MRT 2420)
9 hours clinical experience

MRT 2330—Directed Practice III ................................. 3 Credits
Hospital practice in medical transcription and other secretarial skills. Attendance at various medical meetings, minute taking and contact with the medical staff. (Prerequisite: MRT 2320) (Corequisite: MRT 2430)
9 hours clinical experience

MRT 2410—Advanced Medical Records ........................... 3 Credits
Special attention is made to the requirements of accrediting agencies plus new trends in medical records. Emphasis is placed on new government laws and regulations. Special instruction in audit and Utilization Review. (Corequisite: MRT 2310)
9 hours clinical experience

MRT 2420—Office Supervision for the Medical Record Supervisor ......................................................... 3 Credits
Introduction to the field of organization and management plus personnel management. Instruction in office arrangement and design and equipment selection. Laboratory experience in organization charts, procedure manuals, budgets, and equipment purchasing. (Corequisite: MRT 2320)

MRT 2430—Medical Records Seminar ........................... 3 Credits
This quarter will be devoted to individual research projects to the group for evaluation. (Corequisite: 2330)

MILITARY SCIENCE (ROTC)

MS 1110—Fundamentals of Military Leadership and Management ......................................................... 3 Credits
A study of the development of American military institutions, policies, experiences and traditions in peace and war from colonial times to the present. Historical examples of effective and ineffective leadership and application of the principles of war. Practical exercises in leadership development.

MS 2110—Applied Military Leadership and Management I ................................. 3 Credits
Concentrated study of leadership. Factors which affect human behavior. Leadership functions, principles, and traits. Development of leadership qualities through practical exercises. Military teaching principles and development of teaching skills. (Prerequisite: MS 1110)

MS 2120—Applied Military Leadership and Management II ................................. 3 Credits
The contemporary world scene and its impact on the military. Planning, preparation and presentation of briefings and continued development of leadership skills through practical exercise. Discussion of the ROTC Advanced Course. (Prerequisite: MS 2110)

NOTE: Additional information concerning the Army Reserve Officer's Training Corps (ROTC) program may be obtained from the Counseling Center, the office of Academic Advisement, or the ROTC instructor.

MINI/MICROCOMPUTER SERVICE TECHNOLOGY

MCT 1100—Introduction to Minicomputers ........................................ 3 Credits
Introduces the student to the basic organization and operation of a digital computer. Includes an introduction to computer logic hardware and software, movement of data within a computer, identification of major hardware components and their interaction, concepts of programming, as well as the basic structure and applications of computer systems.
MCT 1210—Machine/Assembly Language Programming .................. 3 Credits
An introduction to computer instruction repertoire. Student develops understanding of machine language instructions and programming through hands-on use of the computer for program execution. An analysis of assembly language programming and analysis of one and two pass assemblers is included. (Prerequisite: MCT 1100)

MCT 1810—Pulse and Switching Circuits .................. 3 Credits
A course in the analysis and design of circuits which generate and shape digital wave-forms. Included in this study are passive waveshaping circuits, delay lines, solid state switching characteristics, logic circuits, and multivibrators. (Prerequisite: EET 1310)

MCT 1815—Pulse and Switching Circuits Lab .................. 1 Credit
The student completes laboratory exercises designed to emphasize lecture material through the design, construction, and evaluation of pulse circuits. (Lab to be taken concurrently with MCT 1810)

3 hours laboratory

MCT 2000—Computer Service Internship .................. 6 Credits
Student works with computer service technician to gain practical, on-the-job experience in computer servicing and maintenance. Periodic reports will be made to advisor from both student and service technician. (Students must have conference with MCT advisor before registering for the course.)

MCT 2210—Operating Systems .................. 3 Credits
A study of the interrelationships of hardware and software at the system level, and the functional operation and utilization of compilers, operating systems, and user-type programs. Emphasis is placed on the ability to discern between hardware and software faults and the use of operating systems and customer software to debug hardware sourced faults in systems. (Prerequisite: MCT 1100 or consent of instructor)

MCT 2310—Digital Circuits I .................. 3 Credits
Principles of digital logic theory and circuits. Presents such topics as number systems and codes, Boolean algebra, reduction techniques, and basic logic gates. Emphasis is placed on the ability to analyze the performance of a logic circuit and to carry a digital design problem from logic requirement to final logic device diagram. (Same as EET 2310)

MCT 2315—Digital Circuits I Lab .................. 1 Credit
Use of digital devices to implement and verify logic circuits performance as presented in lecture. (Lab to be taken concurrently with MCT 2310) (Same as EET 2315)

3 hours laboratory

MCT 2350—Computer Architecture .................. 3 Credits
An in-depth study of the design and organization of the computer processor with emphasis on minicomputers. Areas of study include arithmetic and logic unit, timing and control, memory elements, bus characteristics and I/O operation and control. (Prerequisite: MCT 1210, MCT 2310 or EET 2310)

MCT 2355—Computer Architecture Lab .................. 1 Credit
Lab sessions emphasize and enforce lecture topics as well as initiating the development of troubleshooting techniques. (Lab to be taken concurrently with MCT 2350)

3 hours laboratory

MCT 2410—Peripherals I .................. 3 Credits
A study of the architecture and functional operation of computer peripherals of the card stock, paper, and visual media, such as card and paper tape readers and punches, console writers, TTY's, and display terminals. Emphasis will be on the processor/peripheral control dialogue and data transfer. (Prerequisite: MCT 2350)
MCT 2415—Peripherals I Lab .........................................................1 Credit
Lab sessions provide practice in electromechanical alignment and troubleshooting techniques. (Lab to be taken concurrently with MCT 2410)
  3 hours laboratory

MCT 2420—Peripherals II ...........................................................3 Credits
A study of the architecture and functional operation of mass storage and direct memory access devices including magnetic drums, disk, and tape units. The function of I/O programming and control will be emphasized. (Prerequisite: MCT 2350)

MCT 2425—Peripherals II Lab .......................................................1 Credit
Provides practical experience in the maintenance and troubleshooting of peripheral devices under analysis. (Lab to be taken concurrently with MCT 2420)
  3 hours laboratory

MCT 2420—Peripherals II ...........................................................3 Credits
A study of the architecture and functional operation of mass storage and direct memory access devices including magnetic drums, disk, and tape units. The function of I/O programming and control will be emphasized. (Prerequisite: MCT 2350)

MCT 2425—Peripherals II Lab .......................................................1 Credit
Provides practical experience in the maintenance and troubleshooting of peripheral devices under analysis. (Lab to be taken concurrently with MCT 2420)
  3 hours laboratory

MCT 2610—Computer Systems Maintenance/Troubleshooting ..........4 Credits
A final course of study in computer hardware and software. Emphasis is on the determination of either hardware or software failures with extensive lab time utilizing equipment with simulated or actual failures along with concentration on the use of diagnostic programs to identify and isolate a faulty device or sub-system, as well as preventive maintenance at the systems and component level. (Prerequisites: MCT 2410, MCT 2420, MCT 2350, MCT 2210)
  3 hours lecture—3 hours laboratory

MCT 2700—Integrated Circuits ..................................................3 Credits
Provides the student with an understanding of the operation and practical applications of linear and digital integrated circuits. Efficient hardware implementation and evaluation techniques are developed through analysis of manufacturer's specifications and design criteria. (Prerequisite: MCT 1810)

MCT 2705—Integrated Circuits Lab .............................................1 Credit
Classroom subject areas are continued into the lab for practical, hands-on design and analysis experience. (Lab to be taken concurrently with MCT 2700)
  3 hours laboratory

MCT 2810—Data Communication and Interface Design ....................4 Credits
An examination of the basic concepts of computer interfacing and A/D and D/A conversion techniques. Primary areas of study include the characteristics and operation of bus structures and the design requirements for hardware interfaces to the bus. Block diagrams and flowcharts are used for the understanding and troubleshooting of various interfaces. The accompanying lab is project oriented. (Prerequisites: MCT 2700, MCT 2350)
  3 hours lecture—3 hours laboratory

MCT 2900—Advanced Topics ....................................................4 Credits
This course examines computer types and configurations of an advanced nature such as microprocessors, microprogramming, and multiple processor systems. (Prerequisite: consent of instructor)
  3 hours lecture—3 hours laboratory

MUSIC
THEORY AND LITERATURE
MUS 1010—Music Appreciation ..................................................3 Credits
Open to all students who desire a better understanding of music. In this one-quarter course music of the popular culture as well as traditional art music will be explored through class lecture as well as weekly listening assignments.
MUS 1020—Fundamentals of Music ........................................ 3 Credits
A beginning study of music, its terminology, and elements such as notes, scales, intervals, keys, triads, meter and smaller forms. Designed to acquaint the student with notation, the keyboard, sight singing, and ear training. Offered for non-music majors or for remedial study for music majors.

MUS 1110—Theory ....................................................... 3 Credits
MUS 1120—Theory ....................................................... 3 Credits
Harmonic analysis of common practice music, standard vocabulary of harmony, form, and counterpoint. Should be taken in sequence.

MUS 1111—Theory Practicum ......................................... 1 Credit
MUS 1121—Theory Practicum ......................................... 1 Credit
Eartraining, sight singing, dictation, and rhythmic reading. Should be taken concurrently with 1110, 20.

MUS 1112—Keyboard Practicum ........................................ 1 Credit
MUS 1122—Keyboard Practicum ........................................ 1 Credit
Keyboard application of harmony. Should be taken concurrently with 1110, 20.

MUS 2010—Introduction to Music Literature I ...................... 2 Credits
Designed to give the student a thorough grounding in music of Western civilization from antiquity through the Renaissance. Students learn through class lecture, listening assignments, concert attendance and performance of representative literature.

MUS 2020—Introduction to Music Literature II ..................... 2 Credits
A continuation of MUS 2010, beginning with the Baroque era and continuing through the Classic era.

MUS 2030—Introduction to Music Literature III .................... 2 Credits
A continuation of MUS 2020, dealing with the music of the nineteenth and twentieth centuries.

MUS 2110—Advanced Theory .......................................... 3 Credits
MUS 2120—Advanced Theory .......................................... 3 Credits
MUS 2130—Advanced Theory .......................................... 3 Credits
Analysis of chromatic harmony, 20th harmonies, and other organizational procedures since the common practice period. Should be taken in sequence.

MUS 2111—Advanced Theory Practicum ............................... 1 Credit
MUS 2121—Advanced Theory Practicum ............................... 1 Credit
MUS 2131—Advanced Theory Practicum ............................... 1 Credit
Should be taken concurrently with 2110, 20, 30.

MUS 2112—Advanced Keyboard Practicum ............................ 1 Credit
MUS 2122—Advanced Keyboard Practicum ............................ 1 Credit
MUS 2132—Advanced Keyboard Practicum ............................ 1 Credit

APPLIED MUSIC: ENSEMBLES

Non-music majors are invited to participate in as many of the music courses as possible, particularly chorus and band. Membership for all ensembles is by permission of the director. Members are expected to attend all rehearsals and performances. Failure to do so will result in dismissal from the ensemble and a failing mark for the quarter.
MUS 1050—Chorus ..................................................1 Credit
Meets three hours per week. The official choral organization of the College. Performs
standard repertoire and selections suitable for use with school and church choirs.

MUS 1060—Madrigal Singers .....................................1 Credit
Participation in the group in all phases, including rehearsals and appearances.
Reading of early English Madrigals and traditional American music. Admittance by
audition. Meets three hours per week.

MUS 1070—Small Instrumental Ensembles ......................1 Credit
String, brass, and woodwind ensembles will rehearse three hours per week and
perform twice during a quarter. Classical literature for standard instrumentations will
be emphasized. Rehearsal times arranged according to students' schedules. Assignment
of groups to be determined by instructor.

MUS 1080—Concert Band ..........................................1 Credit
Performs traditional and contemporary wind ensemble literature. Open to all qualified
students. Meets three hours per week.

MUS 1090—Jazz Band ...............................................1 Credit
Membership by audition only. Performs arrangements for jazz, "big band," and studio
band in contemporary and jazz-rock styles. Improvisation is encouraged, but not
required. Performances regularly scheduled off-campus, as well as for student body.

APPLIED MUSIC: CLASS INSTRUCTION
Class piano or class voice is offered for secondary, applied or non-music majors.

MUS 1510—Class Lessons in Voice I ..............................1 Credit

MUS 1520—Class Lessons in Voice II .............................1 Credit

MUS 1530—Class Lessons in Voice III ............................1 Credit
Group instruction in basic techniques of breath control, tone production, diction,
phrasing and interpretation using simple song repertoire, with suggested songs
suitable for solos. A study of the vocal instrument and stage presence will be included.
Classes meet twice weekly. Daily practice required. Not for the student whose major is
voice.

MUS 1610—Class Piano I ..........................................1 Credit

MUS 1620—Class Piano II .........................................1 Credit

MUS 1630—Class Piano III .......................................1 Credit
Group instruction in basic keyboard technique for students with no prior training in
piano. Electronic pianos will be used. Classes meet twice weekly. Daily practice
required.

APPLIED MUSIC: INDIVIDUAL INSTRUCTION
Private lessons in voice, organ, piano, or other instruments may be taken each quarter
for one or two quarter hours credit. Any student may take private lessons, but only
students performing at the college level will receive academic credit. Scheduling
preferences will be given to full-time music majors. Students receive 25 minutes of
private instruction per week per quarter hour of credit. Any student may take applied
music instruction in a minor area. Such courses will be designated by an "M" following
the course number.

Requirements include appearance in solo classes and performance before a faculty
jury at the close of each quarter. A recital is required for music majors in their applied
major field during their second year of study. All students taking applied music are
required to attend all solo classes and other selected performances. The music
department reserves the right to request qualified students to participate in recitals and
other musical programs for the benefit of the College and the community. A minimum of
ten hours practice per week is required.
MUS 1211-21-31—Individual Instruction in Brass Instruments ............ 1 Credit
MUS 2211-21-31—Individual Instruction in Brass Instruments ............ 1 Credit
(One lesson per week)
MUS 1212-22-32—Individual Instruction in Brass Instruments ............ 2 Credits
MUS 2212-22-32—Individual Instruction in Brass Instruments ............ 2 Credits
(Two lessons per week)
MUS 1311-21-31—Individual Instruction in Woodwinds ..................... 1 Credit
MUS 2311-21-31—Individual Instruction in Woodwinds ..................... 1 Credit
(One lesson per week)
MUS 1312-22-32—Individual Instruction in Woodwinds ..................... 2 Credits
MUS 2312-22-32—Individual Instruction in Woodwinds ..................... 2 Credits
(Two lessons per week)
MUS 1411-21-31—Individual Instruction in Strings ....................... 1 Credit
MUS 2411-21-31—Individual Instruction in Strings ....................... 1 Credit
(One lesson per week)
MUS 1412-22-32—Individual Instruction in Strings ....................... 2 Credits
MUS 2412-22-32—Individual Instruction in Strings ....................... 2 Credits
(Two lessons per week)
MUS 1511-21-31—Individual Instruction in Organ .......................... 1 Credit
MUS 2511-21-31—Individual Instruction in Organ .......................... 1 Credit
(One lesson per week)
MUS 1512-22-32—Individual Instruction in Organ .......................... 2 Credits
MUS 2512-22-32—Individual Instruction in Organ .......................... 2 Credits
(Two lessons per week)
MUS 1711-21-31—Individual Instruction in Piano .......................... 1 Credit
MUS 2711-21-31—Individual Instruction in Piano .......................... 1 Credit
(One lesson per week)
MUS 1712-22-32—Individual Instruction in Piano .......................... 2 Credits
MUS 2712-22-32—Individual Instruction in Piano .......................... 2 Credits
(Two lessons per week)
MUS 1911-21-31—Individual Instruction in Voice .......................... 1 Credit
MUS 2911-21-31—Individual Instruction in Voice .......................... 1 Credit
(One lesson per week)
MUS 1912-22-32—Individual Instruction in Voice .......................... 2 Credits
MUS 2912-22-32—Individual Instruction in Voice .......................... 2 Credits
(Two lessons per week)

NOTE: The student may receive credit for one full year's Individual Instruction on each level: one thousand level courses and two thousand level courses.

NATURAL SCIENCE

These natural science courses are designed to provide the student a brief exposure to various disciplines in the natural sciences. They assume little or no background in either mathematics or science, and are therefore suitable for the non-scientist. The courses have no prerequisites and may be taken individually or in any sequence. Each course meets for three hours lecture and two hours laboratory per week.
These courses may be used to satisfy the natural science requirement in the Associate of Arts or Associate of Science degree programs in art, music, business, and education. They may also be taken for general elective credit in most curricula; as such, they can also be used to aid the student in choosing a field of study or in preparing himself/herself for additional science courses. However, these courses will not satisfy any part of the science requirements in chemistry, mathematics, physics, pre-engineering, pre-dentistry, pre-pharmacy, pre-medicine, pre-nursing, physical therapy, respiratory therapy, or medical technology.

**NSC 1010—Physics for the Layman** .......................... 4 Credits
An introductory survey of selected topics in physics, treated on a descriptive level with a minimum of mathematics. The course concentrates on fundamental concepts and principles rather than technical applications. Topics will include the following: classical laws of motion; universal gravitation; theory of relativity; sound, music, and acoustics; light and optics; energy forms and transformations; electromagnetism; atomic and nuclear physics. The laboratory is designed to illustrate and reinforce the lecture discussions and to emphasize the role of experiment in science. (No credit is given to any student who has successfully completed PHY 2010 or PHY 2110.)

3 hours lecture—2 hours laboratory

**NSC 1120—Environmental Science** .......................... 4 Credits
A course which takes an ecological approach in analyzing the impact of human activities upon natural systems. Attention is given to scientific resource management principles in such areas as forestry, wildlife, soils, and water. Field observation and monitoring exercises are included in the laboratory sessions.

3 hours lecture—2 hours laboratory

**NSC 1230—Survey of Earth Science** .......................... 4 Credits
An introductory course designed to provide an exposure to the basic principles of physical and historical geology. Subjects considered include the nature of the earth’s crust, geological processes, the geologic time scale, and paleontology. (No credit is given to any student who has successfully completed GGY 1020 or any geology course.)

3 hours lecture—2 hours laboratory

**NSC 1310—Chemistry for the Changing Times** .......................... 4 Credits
An introduction to chemistry and the role it plays in our society and lifestyle. Topics will include chemistry and society; composition and characteristics of materials such as food, water, drugs, plastics, detergents, vitamins and poisons; pollution and pollution control; nuclear energy. (No credit is given to any student who has successfully completed CHE 1010 or CHE 1110.)

3 hours lecture—2 hours laboratory

**NSC 1410—Survey of Astronomy** .......................... 4 Credits
A descriptive survey of the major areas of astronomy. Topics include the following: the earth-moon system; the sun and the solar system; recent discoveries concerning the planets; the nature of stars, galaxies; ancient and current theories of the universe. Laboratory experiences will include a naked eye and telescopic viewing of the heavens.

3 hours lecture—2 hours laboratory

**NSC 1520—Atmospheric Science** .......................... 4 Credits
Emphasis is directed toward an understanding of meteorologic processes which produce various features of world climate, such as thunderstorms, rainfall, hail, and wind. Laboratory exercises are designed to familiarize the student with the collection and handling of climatic data, and to provide practice in analyzing weather maps. (No credit is given to any student who has successfully completed GGY 1010.)

3 hours lecture—2 hours laboratory
NSC 1670—Special Topics in the Sciences ..........................4 Credits
Courses dealing with special areas of natural science which may be offered on occasion. Possible topics include the history of science, oceanography, soil science, plant science, and life science. Appropriate field and laboratory exercises will comprise the laboratory sessions.
3 hours lecture—2 hours laboratory

NUCLEAR TECHNOLOGY

NUC 1010—Introduction to Nuclear Technology ..........................3 Credits
A survey of nuclear science at the introductory level. Topics include nuclear physics, reactors, nuclear hazards and safety.

NUC 2010—Nuclear Physics ..........................3 Credits
Nuclear structure and stability; radioactive decay; nuclear reactions; fission and fusion; reaction cross-section; nuclear energy.

NUC 2110—Radiation Biology ..........................3 Credits
Biological effects of radiation; permissible levels of exposure; radiation in the environment; food chains; radiation units and dosimetry. (Prerequisite: NUC 2010)

NUC 2120—Radiation Protection ..........................3 Credits
Radiation detection and monitoring; attenuation and shielding; handling of radioactive materials; reactor safety. (Prerequisite: NUC 2010)

NUC 2310—Reactor Analysis and Design ..........................3 Credits
Fission chain reactions; neutron diffusion; reactor dynamics; control systems; basic reactor types and designs. (Prerequisite: NUC 2010)

NUC 2510—Nuclear Laboratory ..........................3 Credits
Instruction and practice in safe handling techniques; calibration and use of health physics instruments; nuclear detection systems, radioactive decay analysis; radioisotope production and use; shielding. (Prerequisite: NUC 2010) Six hours laboratory per week.

NUC 2710—Radioisotopes ..........................3 Credits
Production and properties of isotopes, scientific and industrial applications. (Prerequisite: NUC 2010)

OPERATING ENGINEERING TECHNOLOGY

OET 1010—General Introduction to Operating Engineering and History of the Labor Movement ..........................2 Credits
Emphasis is placed on history of the labor union movement.

OET 1020—Introduction to General Construction Power Sources .......2 Credits
To provide the trainee with basic knowledge relevant to 2-stroke cycles and 4-stroke cycle internal combustion engines; operation of gasoline and diesel engines; a basic understanding of the combustion process and the hardware involved in providing clean air for combustion needs; and familiarize the student with the problems involved in eliminating waste heat from the engines, and the methods required to overcome these problems.

OET 1030—Basic Engineer Power Trains and Undercarriages .......2 Credits
Provides a basic knowledge of mechanical power transmission and the rolling and carrying components of heavy construction equipment, and gives the trainee some understanding of the component parts, capabilities and limitations.
OET 1040—Introduction to Basic Electricity, Hydraulics and Pneumatics ................................................................. 3 Credits
To provide the trainee with a basic knowledge of electricity and the knowledge to perform checks and preventive maintenance on electrical motors and basic circuits. Also provides a general knowledge of the principles of hydraulics to include definitions, advantages, relationship of pressure and force, and its everyday applications.

OET 1110—Apprenticeship Field Experiences I ........................................... 4 Credits

OET 1120—Apprenticeship Field Experiences II ........................................... 4 Credits

OET 1130—Apprenticeship Field Experiences III ........................................... 8 Credits
Field Course (On the job training, continuous learning, practicum). The program will consist of about 500, 500, 1,000 hours respectively of fairly consistent employment with one or more general contractors. The work program must meet the standards of the IUOE. The students will be under the supervision of a journeyman, or higher, employed by the contractor, a member of the joint committee, IUOE and a college representative.

OET 1210—Introduction to Fuels, Oil, and Lubricants ................................. 2 Credits
To provide the trainee with an understanding of the type of fuels, oils, and lubricants used in the heavy construction industry, how and when they are used, and how to achieve best results from their use.

OET 1220—General Introduction to Welding, Rigging, Soils and Compaction ................................................................. 2 Credits
A general knowledge of the principles, capabilities, and application of oxyacetylene, electric arc, and heliarc welding, and also the application of rigging.

OET 1230—Function of Grades and Grade Stakes ........................................... 2 Credits
To teach the trainee the basic reason for moving earth, the basic nomenclature of roads, airfields, dams, levies, drainage projects, railroads, and the types, purposes, and use of grade stakks.

OET 1240—Introduction to Construction Equipment ........................................... 2 Credits
To acquaint the trainee with the types of construction equipment and with the utilization, capabilities, and limitations of each type.

OET 2010—Earth-moving Equipment ................................................................. 2 Credits
To provide the trainee with detailed information on earth-moving and hauling equipment. To teach the controls, operation and operator maintenance of all types of earth-moving equipment.

OET 2020—Grades and Plans for Operating Engineers ........................................... 2 Credits
To provide the trainee detailed information on the engineer function and the operating engineers activities on construction projects.

OET 2030—Mining and Tunneling Equipment ................................................. 2 Credits
To provide the trainee detailed information on mining and tunneling equipment and its operation.

OET 2110—Electrical Systems and Electronics ................................................. 2 Credits
To provide the trainee detailed information on the operation and uses of electrical systems used on and around heavy construction equipment.

OET 2120—Material Processing and Application ............................................. 4 Credits
To provide the trainee detailed information on all types of construction material, how it is processed, and procedures used in application of construction material.

OET 2130—General Construction Equipment, Structure of Components, Seals, and Sealants ............................................. 4 Credits
To provide the trainee detailed information on the operation, operator maintenance, and uses of general construction equipment. To teach the controls, operation, and operator maintenance of general construction equipment used on construction sites. To provide the trainee detailed information on the structure of components of heavy construction equipment, and seals and sealants.
OET 2210—Paving Equipment ................................................. 2 Credits
To provide the trainee detailed information on all types of paving equipment. To teach the controls, operation, and operator maintenance on all types of paving equipment.

OET 2220—Revolving Shovel and Crane Equipment ...................... 2 Credits
To provide the trainee detailed information on revolving type construction equipment. To give specific details on nomenclature and description, uses, servicing, preventive maintenance, minor repairs, uprighting and recovery, moving, shipping, storage, special tool requirements, minor adjustments to components, vehicle codes, accessories and safety. To teach the operation of revolving shovel and crane type equipment.

OET 2230—Repair and Rebuilding of Internal Combustion Engines .................................................. 2 Credits
To provide the trainee detailed information on the repair and rebuilding of engines used in heavy construction equipment and in support equipment.

OET 2240—Crushing, Screening, and Washing Plants ................... 4 Credits
To provide the trainee detailed information on crushing, screening, and washing plants. To teach the controls, operation, and operator maintenance of aggregate crushing, screening, and washing plants.

OET 2310—Tools, Parts, and Housekeeping ............................. 2 Credits
To provide the trainee detailed information on tools and shop equipment used in the repair of heavy equipment, on orders and reports required on the inventory control of parts and tools, on cleaning and inspecting parts, and on housekeeping and safety around repair shops.

OET 2320—Concrete Plants .................................................. 4 Credits
To provide the trainee detailed information on the controls and operation of concrete batch plants. To teach the controls, operation, and operator maintenance of concrete plants.

OET 2330—Material Hoisting and Handling Equipment ................ 2 Credits
To provide the trainee detailed information on operation and use of material hoisting and handling equipment. To give specific details on nomenclature and description, uses, servicing, PM, minor repairs, storage, shipping, special tool requirements, minor adjustments to components, accessories, and safety. To teach the operation of material hoisting and handling equipment.

OET 2410—Repair of Hydraulic Systems and Pneumatic Equipment .................................................. 4 Credits
To provide the trainee detailed information on the repair of hydraulic systems and pneumatic equipment used on heavy duty construction equipment and support equipment.

OET 2420—Heavy Duty Component Repair ................................ 4 Credits
To provide the trainee detailed information on the repair of all components of heavy construction equipment.

OET 2540—Apprenticeship Field Experiences IV ....................... 9 Credits
OET 2550—Apprenticeship Field Experiences V ....................... 9 Credits
Field Course (on the job training, continuous learning, practicum). The program will consist of about 2,000 hours each of fairly consistent employment with one or more general contractors. The work program must meet the standards of the IUOE. The students will be under the supervision of a journeyman, or higher, employed by the contractor, a member of the joint committee, IUOE, and a college representative.
PHILOSOPHY

PHL 1010—Introduction to Philosophy ................................ 3 Credits
A study of problems that confront humans as they deal with knowledge and the nature of the world and their interaction with it.

PHL 1110—Elementary Logic .....................................................3 Credits
Study of the principles of reasoning, deductive and inductive fundamentals, and the use of logic as a practical tool.

PHL 1210—Elementary Ethics ....................................................3 Credits
Critical analysis of the principal ethical theories and their application to the problems of life.

PHL 1310—Symbolic Logic .......................................................3 Credits
Logical symbolism, truth tables, propositional calculus, properties of formal systems.
(See MAT 1310)

PHL 2010—Introductions to Religions of the World .....................3 Credits
Introduction to the study of religion through selected historical traditions, East and West.

PHL 2020—Issues in Religious Studies ........................................3 Credits
Introduction to study of religion through selected religious problems and alternatives.

PHYSICAL EDUCATION

PED 1000, 1005—Adaptive Physical Education ..........................1 Credit
Modified physical activity designed for students with physical limitations. Students are enrolled in these courses on advice of their physician.

PED 1010—Physical Conditioning ..............................................1 Credit
This course is designed for those interested in improving or maintaining physical fitness.

PED 1050—Slimnastics ............................................................1 Credit
A course designed for those interested in losing inches and weight. Improvement of physical fitness will also be emphasized.

PED 1110—Archery .................................................................1 Credit
Introduces the student to archery through a brief study of its history with emphasis on the fundamentals of shooting the bow.

PED 1210—Badminton .............................................................1 Credit
Instruction and practice in the fundamentals of badminton.

PED 1310—Basketball .............................................................1 Credit
Practice of fundamentals as well as the various types of play.

PED 1320—Advanced Basketball ................................................1 Credit
A continuation of PED 1310. Emphasis on skill, strategy, and competition. (Prerequisite: PED 1310 or consent of instructor.)

PED 1410—Beginning Bowling ..................................................1 Credit
Presents the proper selection of equipment, correct method of approach and release of the bowling ball, and scoring. A fee for facility and equipment rental will be charged for this activity.

PED 1420—Intermediate Bowling ................................................1 Credit
Continuation of skills acquired in Beginning Bowling. More emphasis is placed on individual techniques and self-improvement. (Prerequisite: Bowling 1410 or consent of instructor.) A fee for facility and equipment rental will be charged for this activity.

PED 1510—Folk Dance .............................................................1 Credit
Instruction in dances from various countries, including square dances.
PED 1610—Beginning Golf ..............................................1 Credit
To acquaint the beginning player with correct swing, selection, and use of the various clubs and basic fundamentals.

PED 1620—Intermediate Golf ..........................................1 Credit
A continuation of PED 1610. Review basic fundamentals; develop advanced skills and strategies. (Prerequisite: PED 1610 or consent of instructor.)

PED 1710—Soccer .......................................................1 Credit
Instruction and practice in the fundamental skills of soccer.

PED 1800—Social Dance ..................................................1 Credit
Instruction, practice, and teaching in basic social dance steps.

PED 1810—Modern Dance ..............................................1 Credit
Basic movement and dance techniques; emphasis on communicative skills, creativity, and improvisation.

PED 1910—Beginning Weight Training ...............................1 Credit
An introduction to the proper techniques and practices of weight training.

PED 1920—Intermediate Weight Training ............................1 Credit
A continuation of PED 1910. Students will also develop and implement a personalized weight training program for their individual use. (Prerequisite: PED 1910 or consent of instructor.)

PED 2010—Beginning Ballet ............................................1 Credit
Correct body alignment for posture, coordination, and balance; stretching and limbering for muscle tone, for agility, and for strength. Exercises at the barre followed by center floor work. (Placement depends upon demonstrated dancing ability.)

PED 2020—Intermediate Ballet .........................................1 Credit
A continuation of PED 2010.

PED 2050—Marksmanship and Firearms Safety .....................1 Credit
This course seeks to educate both men and women in safe and efficient use of small bore rifles for pleasure. Safety will be stressed to provide protection for all students involved. The shooting practice will be with 22 caliber rifles. All students will become familiar with the various principles of marksmanship.

PED 2210—Softball .......................................................1 Credit
Instruction and practice in the fundamentals of catching, batting, and backing up other positions. Rules and strategies will also be studied.

PED 2310—Swimming ......................................................1 Credit
Training for beginners in swimming, emphasizing recreational swimming. A special fee as designated in class schedule will be charged for this course.

PED 2410—Beginning Tennis ............................................1 Credit
A brief study of the history of tennis with emphasis on the rules and basic strokes which could lead to accomplished tennis skills.

PED 2420—Intermediate Tennis .......................................1 Credit
Review of the basic fundamentals and rules, with emphasis on skill, strategy and competition. (Prerequisite: PED 2410 or consent of instructor.)

PED 2510—Stunts and Tumbling .......................................1 Credit
Practice of stunts, with a minimum achievement of intermediate skill expected. To acquaint the student with the proper techniques of tumbling, trampoline, and long horse vaulting.

PED 2520—Intermediate Stunts and Tumbling .......................1 Credit
A continuation of PED 2510. Students will develop advanced skills in tumbling and trampoline. (Prerequisite: PED 2510 or consent of instructor.)

PED 2610—Volleyball ....................................................1 Credit
Fundamentals, rules, and strategy of play.
PED 2710—Introduction to Physical Education .................... 3 Credits
A study of the historical background, general scope, principles, and objectives of physical education in its relationship to education as a whole.

PED 2720—Teaching Individual and Dual Sports .................... 3 Credits
A comprehensive study of individual and dual sports with emphasis on teaching organization, techniques, and methods. To include a practicum.

PED 2730—Sports Officiating ........................................ 2 Credits
Detailed techniques and methods of sports officiating involving rule interpretation and ethical character pertaining to interscholastic, intercollegiate, and intramural activities. (Sports include football, basketball, softball, baseball.)
3 hours lecture—laboratory

PED 2810—Teaching Physical Education in the Elementary Schools .................... 3 Credits
Study of theories and activities for physical education in the lower grades. Problems in supervision, program planning, instructional methods in both individual and group activities are emphasized.

PED 2820—Coaching of Baseball ..................................... 3 Credits
Theory and practice in the fundamentals as well as review of various systems of types of play.

PED 2850—Playground Leadership .................................... 3 Credits
Learning activities suitable for playgrounds and studying and applying the principles of organizing and directing a playground program.

PHYSICS
To receive credit for a physics course, the lecture section must be accompanied by a laboratory session during the same quarter.

NOTE: The physics sequences PHY 1110-20-30, PHY 2010-20-30 and PHY 2110-20-30 are normally offered only once a year, beginning in the fall quarter. Students planning to enroll in physics must therefore begin the sequence in the fall.

PHY 1110—Introductory Concepts in Physics I ....................... 4 Credits
The basic concepts of matter, energy, space, and time are developed. The fundamental relationships among these concepts are developed by logical analysis and experimental observation. These courses should be taken in sequence. PHY 1110 covers forces, motion of objects, mass, momentum, work, energy, and heat. PHY 1120 covers wave motion, sound, light, electricity, and magnetism. PHY 1130 covers modern physics including such topics as relativity, structure of matter, mass and energy equivalence, and nuclear physics.
3 hours lecture—3 hours laboratory

PHY 2010—General Physics I ........................................ 4 Credits
Fundamental laws of mechanics. (Prerequisite: MAT 1130 or MAT 1500 or consent of instructor.)
3 hours lecture
3 hours laboratory

PHY 2020—General Physics II ........................................ 4 Credits
Fundamental laws of heat, light, and sound. (Prerequisite: PHY 2010)
3 hours lecture—3 hours laboratory

PHY 2030—General Physics III ...................................... 4 Credits
Fundamental laws of electricity and magnetism in elements of modern physics. (Prerequisite: PHY 2020)
PHY 2110—Physics I ........................................... 4 Credits
PHY 2120—Physics II ........................................... 4 Credits
PHY 2130—Physics III .......................................... 4 Credits

PHY 2110 covers mechanics. PHY 2120 covers wave motion, electricity, and magnetism. PHY 2130 covers heat, optics, and modern physics. A sequence course. (Prerequisite: Calculus and Analytic Geometry I) (Corequisite: Calculus sequence)

3 hours lecture—3 hours laboratory

PHY 2210—Modern Physics ........................................ 4 Credits

Fundamental principles of modern physics are covered. Topics include relativity, structure of matter, quantum effects, and nuclear physics. (Corequisite: PHY 2130 or consent of instructor.)

3 hours lecture—3 hours laboratory

PHY 2700-2750—Independent Physics Investigation ...................... 3 Credits

Independent research and development in physics by qualified students under the supervision of a faculty member. Especially intended to develop interest and skill in the techniques of physics research and development. Up to nine hours credit may be earned. Transfers as elective credit only. (Consent of the faculty member is required.)

POLICE SCIENCE AND CRIMINOLOGY EDUCATION

PST 1010—Introduction to Law Enforcement .......................... 3 Credits

Philosophical and historical background; agencies and respective jurisdictions; police ethics, public relations, and career orientation.

PST 1110—Police Science I ........................................... 3 Credits

A study of legal concepts and procedures, including the laws of arrest and search warrant procedure, beginning with the issuance of legal process to ultimate court disposition, embracing informations, indictments, arraignments, preliminary hearings, bail, grand and petit juries, and the trial.

PST 1120—Police Science II .......................................... 3 Credits

A study of the qualities of an investigation; general criminal investigative methods, procedures and techniques, phases of investigation; testifying and preparation of evidence for court.

PST 2010—Police Administration and Organization .................... 3 Credits

A study of police organizations, their hierarchical structure, techniques of administration and management utilized in standard police organizations with emphasis on problems of supervision, responsibility, and control of police units.

PST 2130—Police Science III ........................................... 3 Credits

A continuation of Police Science II with emphasis on the elements, modus operandi, and various investigative aspects of the serious and more frequently occurring crimes, and methods of crime prevention through contact with the public.

PST 2140—Police Science IV ........................................... 3 Credits

An introduction to the theory and practice of basic scientific techniques utilized in the investigation and solving of crime. These procedures which will be presented by means of classroom lectures, demonstration sessions and practical laboratory periods, will emphasize the proper handling and examination of evidence, fingerprinting, photography, glass fractures, casts and molds, narcotics and narcotic preparations, and crime scene searches.

PST 2200—Seminar in Police Problems ............................... 6 Credits

A course designed to consolidate the various learning experiences in police science. Emphasis is placed on special problems.
POLITICAL SCIENCE

POL 1010—Fundamentals of American Government .................. 3 Credits
An introduction to the setting and foundations of American politics with emphasis on citizen attitudes and values, national and state constitutions, political parties, interest groups, public opinion, and voting.

POL 1020—United States National Government ..................... 3 Credits
United States national government with special emphasis upon the executive, legislative, judicial and administrative functions.

POL 1030—State and Local Government in the United States ......... 3 Credits
Forms of state and local government organizations. Interrelationships between state and local, state and federal, and local and federal governments.

POL 2010—Introduction to Political Science ............................ 3 Credits
A comprehensive introduction to the study of political science with emphasis on the theory, processes, and institutions of politics and governments in the modern world.

POL 2020—Tennessee Government and Politics ........................ 3 Credits
This course will examine the three branches of state government, the role of Tennessee within the federal system, city and county government, Tennessee "politics," the particular agencies and commissions that deal with law enforcement, fire science etc., and other subjects appropriate to student and course needs.

PSYCHOLOGY

PSY 1000—Effective Study (A Study Problems Group) ................. 1 Credit
A course designed to help students develop effective study skills and to eliminate barriers to a successful college experience.

PSY 1010—General Psychology I ........................................... 3 Credits
Introduction to the methods and findings of contemporary psychology. The following topics are covered: the history of psychology, the scientific method of observation; the principles of efficient learning; remembering and forgetting; language, thinking, and problem-solving; the senses; and perception.

PSY 1020—General Psychology II .......................................... 3 Credits
Basic principles of adjustment, personality development, and psychological measurement and evaluation are covered.

PSY 1030—General Psychology III ......................................... 3 Credits
Developmental and social psychology, motivation and emotion, and physiological psychology are the topics covered.

PSY 2110—Psychology of Law Enforcement ............................... 3 Credits
This course provides a dual purpose for law enforcement students: To acquaint students with traditional concepts and theories of human behavior, i.e. normal and abnormal personality development, and to introduce topics of special concern to the law enforcement agent: the role of the police officer, crisis intervention, domestic disturbances, job stress, and interpersonal effectiveness skills. (Prerequisite: PST 1010 or field experience in a law enforcement agency.)

PSY 2210—Educational Psychology ......................................... 3 Credits
The principles of growth and development are studied and related to student learning. Capacity for learning, methods of effective study, and the effect of the environment on the student are investigated and studied.

PSY 2310—Abnormal Psychology ............................................ 3 Credits
Topics covered include definitions and indices of abnormal behavior, general symptoms of specific neurotic and psychotic syndromes.
PSY 2410—Child Psychology ..............................................3 Credits
Psychological and physiological growth and development of the human organism, beginning with conception and continuing to adolescence.

PSY 2420—Adolescent Psychology ..............................................3 Credits
Psychological and physiological growth and development of the human organism from the age of twelve years through the middle or late twenties.

PSY 2430—Psychology and Everyday Life ..............................................3 Credits
This elective course requires no background in psychology. It treats practical useful areas of psychology not treated in-depth in other courses. Two topics which might be covered—among others—are how psychology promotes happy homes and how psychology can be effectively applied.

PSY 2450—Human Development Seminar ..............................................3 Credits
This course is designed to utilize the experience of students to achieve self-understanding, to study the effect of their relationships with others and to assist other members of the class to do the same. Values, interests, and attitudes will be explored in the small group setting.

PSY 2510—Social Psychology ..............................................3 Credits
A course to teach the relation of psychology to the social environment. Topics studied include prejudice, attitude change, interpersonal attraction, aggression.

PSY 2610—Psychological Aspects of Management ..............................................3 Credits
A study of the application of psychological principles to business and other areas involving management. Topics to be covered will include supervision, communications, human relation skills, scientific and humanistic management, and group dynamics.

PSY 2710-2730—Independent Investigation in Psychology ..............................................3 Credits
Independent library/experimental research in psychology by qualified students under the direction and supervision of a faculty member. Especially designed to develop an interest in and to apply techniques of contemporary scientific research. Up to nine credit hours may be earned. (Prerequisite: Psy 1010, 1020 and consent of the faculty member).

RADIOLOGIC TECHNOLOGY

RDT 1000—Clinical Education I ..............................................4 Credits
Practical application of skills taught in Radiologic Technology courses. Evaluation is based on quality and quantity of work, knowledge of techniques, learning ability, cooperation, initiative, dependability, professional conduct, and manual dexterity. In addition to the clinical experience of this course, two weeks of 40 hours clinical experience during the intersession are required. (Prerequisite: Admission to Radiologic Technology Program)

8 hours clinical experience

RDT 1010—Clinical Education II ..............................................4 Credits
Continuation of Clinical Education I. In addition to the clinical experience of this course, two weeks of 40 hours clinical experience during the intersession are required. (Prerequisite: RDT 1000)

8 hours clinical experience

RDT 1020—Clinical Education III ..............................................5 Credits
Continuation of Clinical Education II. (Prerequisite: RDT 1010)

20 hours clinical experience

RDT 1030—Clinical Education IV ..............................................4 Credits
Continuation of Clinical Education III. (Prerequisite: RDT 1020)

16 hours clinical experience
ROANE STATE COMMUNITY COLLEGE

RDT 1110—I n t r o d u c t i o n t o R a d i o l o g i c T e c h n o l o g y .................................. 3 C r e d i t s
Orientation to radiologic technology as a profession. Adaptation to the hospital, medical team, and radiology department is initiated. Major educational areas include: basic radiation protection, medical ethics, patient-technologist relationships, general patient care, mechanics, special patient care, and oxygen therapy. (Corequisite: RDT 1000)

1 hour lecture—3 hours laboratory—4 hours clinical experience

RDT 1210—R a d i o g r a p h i c P o s i t i o n i n g I .................................. 3 C r e d i t s
Basic principles of radiographic positioning. Especially radiographic anatomy and positioning of the chest, abdomen, hands, wrist, forearm, elbow, and humerus. Use is made of audio-visuals, radiographs, skeleton model, and laboratory experiences. (Prerequisite: RDT 1110)

1 hour lecture—3 hours laboratory—4 hours clinical experience

RDT 1220—R a d i o g r a p h i c P o s i t i o n i n g I .................................. 3 C r e d i t s
Continuation of Radiographic Positioning I. New areas are shoulder girdle, arthrology of upper extremities, foot and ankle, lower leg, knee, patella, femur, hips and pelvis. (Prerequisite: RDT 1210)

1 hour lecture—3 hours laboratory—4 hours clinical experience

RDT 1230—R a d i o g r a p h i c P o s i t i o n i n g I I I .................................. 3 C r e d i t s
Continuation of Radiographic Positioning II. New areas are cranium, sella turcica, petrous, pyramids, facial bones, zygomatic arches, optic foramina, mandible, TMJ, sinuses, mastoids, and ear structures. (Prerequisite: RDT 1220)

2 hours lecture—4 hours clinical experience

RDT 1310—R a d i o g r a p h i c P r i n c i p l e s I .................................. 4 C r e d i t s
This course studies X-ray film, mixing solutions, development process, rinsing process, fixing process, drying process, automatic processing, production and properties of X-rays, radiographic terms, and silver image formation. (Corequisite: RDT 1000)

3 hours lecture—3 hours laboratory

RDT 1320—R a d i o g r a p h i c P r i n c i p l e s I I .................................. 4 C r e d i t s
Performance of laboratory experiments on the function of focus-film distance, function of kilovoltages, and function of mill-ampereseconds. Photographic factors, absorption and penetration, anatomic conditions, and control of secondary radiation are studied. (Prerequisite: RDT 1310)

2 hours lecture—3 hours laboratory—4 hours clinical experience

RDT 1330—R a d i o g r a p h i c P r i n c i p l e s I I I .................................. 4 C r e d i t s
Study of density factors, geometric factors, and intensifying screens. Students are introduced to different types of technique charts and taught how to formulate a technique chart. (Prerequisite: RDT 1320)

3 hours lecture—4 hours clinical experience

RDT 1410—T e r m i n o l o g y .................................. 2 C r e d i t s
Introduction to the word building system through analysis of the elements of medical terms and combining forms. Spelling and oral activities are included. Emphasis is directed to medical terms pertaining to radiology. (Corequisite: RDT 1000)

RDT 1510—R a d i o g r a p h i c F i l m E v a l u a t i o n I .................................. 1 C r e d i t
Evaluation of films exposed by the students. Specific aspects emphasized are: clinical data, technique, collimation and shielding, positioning, anatomy and radiographic quality. (Prerequisite: RDT 1210)

RDT 1520—R a d i o g r a p h i c F i l m E v a l u a t i o n I I .................................. 1 C r e d i t
Continuation of Radiographic Film Evaluation I. (Prerequisite: RDT 1510)

RDT 1610—R a d i a t i o n P h y s i c s I .................................. 3 C r e d i t s
Emphasis is placed throughout the entire course on physics as applied to radiology. The student is introduced to units of measurement, mechanics, structure of matter, electrostatic and electrical circuits. (Prerequisite: RDT 1330)
RDT 2040—Clinical Education V ........................................ 9 Credits
Continuation of Clinical Education IV. In addition to the clinical experience of this course, two weeks of 40 hours clinical experience during the intersession are required. (Prerequisite: RDT 1030)
28 hours clinical experience

RDT 2050—Clinical Education VI ........................................ 10 Credits
Continuation of Clinical Education V. In addition to the clinical experience of this course, two weeks of 40 hours clinical experience during the intersession are required. (Prerequisite: RDT 2040)
32 hours clinical experience

RDT 2060—Clinical Education VII ...................................... 8 Credits
Continuation of Clinical Education VI. (Prerequisite: RDT 2050)
32 hours clinical experience

RDT 2070—Clinical Education VIII .................................... 9 Credits
Continuation of Clinical Education VII. (Prerequisite: RDT 2060)
36 hours clinical experience

RDT 2210—Radiographic Positioning IV .................................. 3 Credits
Continuation of Radiographic Positioning III. New areas are coccyx, sacrum, lumbar spine, thoracic and cervical spine, bony thorax and soft tissues of the chest. (Prerequisite: RDT 1230)
2 hours lecture—4 hours clinical

RDT 2610—Radiation Physics II ........................................ 3 Credits
Continuation of Radiation Physics I. New subject areas are electromagnetism, rectification, production and properties of X-ray, X-ray tubes, X-ray circuits and equipment. (Prerequisite: RDT 1610)

RDT 2620—Radiation Physics III ........................................ 3 Credits
This course deals primarily with radiation biology. The student is introduced to the effects of and response to irradiation. Radiation syndromes and radiation oncology are included. (Prerequisite: RDT 2610)

RDT 2710—Special Examinations and Equipment I ........................ 2 Credits
Introduction to specific types of recording media which include video tape, cine radiography, strip-film cameras, and rapid film changes. Introduction to special techniques such as duplication, subtraction, polaroid thermography ultrasound, xeroradiography, and electron radiography. (Prerequisite: RDT 1330)

RDT 2720—Special Examinations and Equipment II ....................... 2 Credits
Major and minor special procedures utilizing contrast media are discussed. All applicable anatomical systems are studied and supplementary procedures such as tomography, stereo radiography, and magnification. (Prerequisite: RDT 2710)

RDT 2810—Radiation Protection .......................................... 3 Credits
A study of the basic interaction of radiation with matter, biological effects of ionizing radiation, patient and personnel protection, MPO, and personnel monitoring. (Prerequisite: RDT 2210)

RDT 2910—Radiographic Pathology ....................................... 2 Credits
This course relates disease processes particularly to radiology. All anatomical systems of the body are included. (Prerequisite: RDT 2210)

RDT 2915—Radiologic Technology Seminar I ............................ 2 Credits
This course provides the student with an opportunity to obtain in-depth professional knowledge. Extensive use is made of student presentations and group discussion. (Prerequisite: RDT 2210)

RDT 2925—Radiologic Technology Seminar II ............................ 2 Credits
Continuation of Radiologic Technology Seminar I. (Prerequisite: RDT 2915)
READING

REA 0100—Basic Reading ........................................... 3 Credits
This course is designed to upgrade basic skills in reading, focusing on word attack skills with phonics and word structure. Comprehension of sentences and paragraphs building up to short articles is another area of emphasis.

REA 1010—Developmental Reading and Study Skills I ............ 3 Credits
This course is designed to assist the student in developing reading skills that are necessary for college success. The materials surveyed will be in the humanities, the social sciences, science, and mathematics. Study skills are presented in accordance with each student's needs, as determined through pretesting and individual conferences.

REA 1020—Developmental Reading and Study Skills II ............ 3 Credits
Continuation of Reading 1010.

REA 1030—College Reading ........................................ 3 Credits
This course is designed to aid the student who has done average work in college courses to extend critical reading abilities, vocabulary, study methods, and rate-building skills. Each student's reading efficiency is diagnosed and a program is designed to fit individual needs. The reading requirements are correlated with needs experienced by the student in literature courses.

REA 1040—Speed Reading ........................................... 3 Credits
This course is designed to improve the reading efficiency of the above average student. Though initial attention is given to reading speed, extension of vocabulary, comprehension and study skills is encouraged.

RECREATION

REC 1010—Introduction to Recreation ............................. 3 Credits
Introduces the basic fundamentals of the nature, scope, and significance of organized recreation services. It includes study of factors involved in the operation of basic recreation units, major program areas, organizational patterns, and the interrelationship of special agencies and institutions which serve the recreation needs of society.

REC 1020—Social Recreation ........................................ 3 Credits
Introduces methods and materials for planning, organizing, and conducting social activities for groups of various sizes and ages in a variety of social situations. Emphasis is on the mechanics of planning and presenting a repertoire of activities for social recreation events. Major activities will be discussed, played, and/or demonstrated.

REC 1030—Outdoor Education ....................................... 3 Credits
Includes study of the history, development, and trends of outdoor recreation, conservation, and organized camping. Emphasis is on laboratory work, field trips, and the development of outdoor skills.

REC 1110—Team Sports ............................................ 3 Credits
Offers a survey of the basic terminology, skills, and rules of selected team sports and their use in recreation. Emphasis is upon knowledge and understanding of the organization, administration, and promotion of sports rather than mastery of performance skills.

REC 1310—Arts and Crafts .......................................... 3 Credits
Demonstrates the methods and materials used in arts and crafts projects for a variety of recreational settings: school, camp, playground, recreation center, and club. Emphasis is on constructing, administering, promoting, and teaching crafts.
ROANE STATE COMMUNITY COLLEGE

REC 2010—Organization and Administration in Recreation ...........3 Credits
A study of essential elements and basic principles involved in the organizations, supervision, promotion, and evaluation of various types of recreation programs. Emphasis is on organized programs and services.

REC 2310—Water Sports .............................................3 Credits
Includes the basic terminology, skills, and techniques of selected water-related activities and their use in recreation programs.

REC 2410—Field Work .............................................3 Credits
A course designed to give the recreation student practical experience under supervision. The first experience should have the student working with an agency leader as a junior leader. Exposure to leadership responsibilities of planning, conducting, and evaluating an activity or program should result.

REC 2510—Introduction to Marine Management ......................3 Credits
Introduces the basic fundamentals of the nature, scope, and modern practices in business oriented marine operations. Includes visits to local marinas and related marine-based industries.

REC 2520—Small Craft Operations ....................................3 Credits
A study of basic principles and practices involved in small to medium-range boating. Includes an in-depth study into the kinds of equipment in use, mechanical fundamentals, management, and safety.

REC 2610—Camp Crafts ...............................................3 Credits
This course is designed to provide prospective leaders in camping and outdoor education with necessary camping skills. Each student will develop skills in firecraft, food selection and preparation, toolcraft, ropecraft, gear and shelter, map and compass, health and safety, nature and conservation, and leadership techniques. Emphasis is both on learning the skills and learning to teach them to others. Each student will participate in planning, executing and evaluating an overnight trip in which the acquired skills will be utilized. At the conclusion of the course, all students who have fulfilled the requirements will be awarded the Advanced Campcrafter Certificate by the American Camping Association.

REC 2710—Park Administration .......................................3 Credits
Includes the history, development, and trends in park administration. Introduces methods and materials for planning, organizing, and conducting park supervision and services. Includes field trips to local parks.

REC 2720—Facilities Planning and Maintenance ......................3 Credits
An in-depth study of essential elements and principles involved in physical plant planning and management. Includes special student projects.

REC 2810—Camping and Camp Leadership ..........................3 Credits
Emphasis is placed upon the camp counselor, the planning of programs, and demonstrations applicable to camp life.

REC 2870—Recreation Leadership ....................................3 Credits
Principles, materials, methods, and practice in planning and directing recreation.

RESPIRATORY THERAPY

RTT 1010—Introduction to Respiratory Therapy ..........................3 Credits
The historical development, functions, responsibilities, ethics and medical-legal aspects of Respiratory Therapy are studied with emphasis on professional expectations and attitudes. Introduction to medical terminology. (Prerequisite: Permission from Program Director)
RTT 1110—Oxygen Therapy ..................................................6 Credits
A foundation course in the administration of oxygen and other medical gases. Areas covered include manufacture, transportations, storage systems, safety regulations, standards of piping identification systems, pressure reducing valve, flowmeters, and techniques used in the administration of oxygen, carbon dioxide, and helium-oxygen mixture. Emphasis will be placed on equipment function. (Prerequisites: RTT 1010, CHE 1010, MAT 1010)

RTT 1210—Pathology and Physical Diagnosis ..........................3 Credits
Disease processes which affect the respiratory and cardiovascular systems are studied. Physical diagnosis, using the skills of inspection, palpation, percussion and auscultation will be taught as part of this course. A survey of pathogenic microbes and aseptic techniques will be included. (Prerequisite: BIO 2320, RTT 1010)

RTT 1310—Intermittent Positive Pressure Breathing and Aerosol Therapy 8 Credits
A continuation of RTT 1110 with additions of principles, techniques and equipment used in the administration of intermittent positive pressure breathing and aerosol therapy. Emphasis will be placed on administrative techniques and evaluation of therapeutic effects. (Corequisite: RTT 1410) (Prerequisite: RTT 1110)

RTT 1410—Respiratory Pharmacology .....................................2 Credits
This course will present a general description of pharmacological agents encountered in Respiratory Therapy including the effects on respiration of drugs such as anesthetic agents and narcotics. Special emphasis will be placed on dosages, methods of administration, actions and adverse effects of drugs administered by therapists. (Corequisite: RTT 1310)

RTT 1510—Airway Management and Cardiopulmonary Resuscitation ..8 Credits
Intensive coverage of theory and application of airway management and cardiopulmonary resuscitation techniques. Types of airway obstruction and airway maintenance procedures will be covered including suctioning and intubation. Emergency artificial ventilation techniques and external cardiac compression will also be included. (Prerequisite: RTT 1210, RTT 2610)

RTT 2610—Equipment and Sterilization .......................................7 Credits
This course is intended to provide detailed instruction in the mechanics of equipment used in Respiratory Therapy. The student will be taught to disassemble and reassemble equipment, identifying each part of its function. Preventative maintenance, bacteriological control and sterilization requirements will be included. (Corequisite or prerequisite: BIO 2510) (Prerequisite: RTT 1310)

RTT 2650—Mechanical Ventilation I ........................................4 Credits
Introduction to theory and concepts of respiratory care with emphasis on continuous ventilation. Topics in this course include indications, physiological considerations, ventilatory patterns, management techniques, weaning procedures, types of ventilatory support and functional characteristics of ventilators. (Prerequisite: RTT 1510, PHY 1110)

RTT 2660—Mechanical Ventilation II .......................................4 Credits
Continuation of Mechanical Ventilation I. (Prerequisite: RTT 2650)

RTT 2710—Pulmonary Function I .............................................4 Credits
This course will consist of in-depth exposure to pulmonary function evaluation procedures. The student will be taught principles and techniques of blood gas analysis, lung volume and diffusion capacity determinations. Much emphasis will be placed on performance of technical procedures, including arterial puncture, calculation of pulmonary function data and application of laboratory data to clinical situations. (Prerequisite or Corequisite: RTT 2650)

RTT 2720—Pulmonary Function II .............................................4 Credits
Continuation of Pulmonary Function I. (Prerequisite: RTT 2710)
ROANE STATE COMMUNITY COLLEGE

RTT 2810—Clinical Education I ........................................ 8 Credits
This course will provide the student with the opportunity for an intensive application of respiratory therapy to specific specialties such as emergency medicine, surgery, and pediatrics. The students will be confronted with types of responsibilities and decisions that will be required of them as Respiratory Therapists. (Prerequisite or Corequisite: RTT 2650, RTT 2710)

RTT 2820—Clinical Education II ........................................ 8 Credits
Continuation of Clinical Education I. (Prerequisite: RTT 2810)

SAVINGS ASSOCIATION

SAV 1010—Introduction to Savings Association ...................... 3 Credits
Survey course to introduce students to role of savings associations. Savings associations’ historical development, organization, competition, and future direction are presented, and students acquire solid foundation for more specialized courses of study.

SAV 1110—Savings Accounts ............................................. 3 Credits
Enables students to understand nature of savings accounts, types of savings account ownership, and problems unique to savings accounts.

SAV 1120—Savings Accounts Administration .......................... 3 Credits
This course extends the general presentation of savings accounts offered and emphasizes the administration and insurance of savings accounts.

SAV 2110—Savings Association Operations ............................ 3 Credits
An overview of internal operations of savings associations, this course surveys the work done throughout the institutions, outlines the responsibility of various departments and illustrates the interrelationships of all job assignments.

SECRETARIAL SCIENCE

SSC 1010—Typing I ......................................................... 3 Credits
Development of techniques in touch typewriting and the introduction of skills involved in composing at the typewriter, typing letters, typing simple tabulations, and typing manuscripts.

5 hours per week—lecture and laboratory

SSC 1020—Typing II ....................................................... 3 Credits
Continued development of typewriting techniques with emphasis on increasing speed and accuracy in typing business reports, correspondence, tabulations, and manuscripts. (Prerequisite: SSC 1010 or equivalent)

5 hours per week—lecture and laboratory

SSC 1030—Typing III ....................................................... 3 Credits
Continued emphasis on speed and accuracy building with more emphasis on timed production on various types of business materials. Training on various typewriters including various types of electric and automatic typewriters. (Prerequisite: SSC 1020 or equivalent)

5 hours per week—lecture and laboratory

SSC 1110—Shorthand I .................................................... 5 Credits
Theory of Symbol Shorthand; development of dictation and transcription abilities.

5 hours per week—lecture and laboratory

SSC 1120—Shorthand II ................................................... 5 Credits
Further application of principles of Symbol Shorthand to the development of ability to read, write, and transcribe shorthand outlines. Transcription on the typewriter is introduced with emphasis on transcribing skills. Mailable transcripts are introduced. (Prerequisite: SSC 1110 or equivalent)

5 hours per week—lecture and laboratory
**ROANE STATE COMMUNITY COLLEGE**

**SSC 1130—Shorthand III** ............................................. 5 Credits
Continued development of dictation and transcribing skills and increased emphasis on speed building and mailable transcripts. (Prerequisite: SSC 1120 or equivalent)
5 hours per week—lecture and laboratory

**SSC 1210—Machine Transcription** .................................. 3 Credits
Development of skill in transcribing dictation on dictation/transcription equipment with emphasis on grammar, punctuation, spelling, letter style and form, etc. Emphasis is placed on mailable copy in the business, medical, and legal fields. (Prerequisite: SSC 1010)

**SSC 2010—Typing IV** ............................................. 3 Credits
Continuation of speed and accuracy building with emphasis on mailability. Practical application on automatic typewriter and simulated in-basket production work. (Prerequisite: SSC 1030 or equivalent)
5 hours per week—lecture and laboratory

**SSC 2110—Shorthand Transcription** .................................. 5 Credits
Improvement of ability to take dictation and transcribe mailable copy with emphasis on the development of job competency. (Prerequisite: SSC 1130 or equivalent)
5 hours per week—lecture and laboratory

**SSC 2210—Office Practice** ........................................... 3 credits
A study of the principles and techniques of office procedures, including a knowledge of office materials, job interview techniques, job application processes, telephone procedures, and office duties. (Prerequisite: SSC 1010 or equivalent)

**SSC 2810—Records Management** .................................... 3 Credits
Basic principles of records storage and control with practice in alphabetic, numeric, geographic, and subject filing systems; overview of microfilming, tape processing and storage, systems design, record storage and retrieval.

**SOCIAL SCIENCE**

**SS 1110-1190—Social Science Seminar** ............................... 3 Credits
In-depth analysis of a particular topic, concern, or problem in the Social Sciences. Courses may be oriented toward any one of the Social Science disciplines (Geography; History; Political Science; Psychology; Sociology-Anthropology) or may be cross disciplinary in nature (combining several Social Sciences). Social Science elective credit only.

**SOCIOLOGY**

**SOC 2010—Introduction to Sociology** ................................ 3 Credits
A general survey of human social relationships.

**SOC 2020—Social Institutions** ........................................ 3 Credits
A sociological analysis of American society. Emphasis is placed on social power, mass society, as well as the nature and structure of major social institutions.

**SOC 2030—Social Problems** ........................................... 3 Credits
A study of a number of problems in American society including their origins, extent, nature, causal factors, and suggested solutions. Problem examples include such topics as urbanization, family disorganization, crime and criminal justice, population and environmental challenges.

**SOC 2110—Introduction to Cultural Anthropology** .................. 3 Credits
An introduction to the principles, concepts, methods, and scope of anthropology. Emphasis is placed on the nature of culture and society, cultural adaptation, and differences and similarities among the cultural components of social organization, economic organization, political organization, language, ideology, technology, and art.
SOC 2120—Introduction to Prehistory and Archaeology ..................3 Credits
An introductory survey of human origins and prehistoric cultures. Emphasis is placed on the general principles, theoretical orientations, and methods of archaeology.

SOC 2130—Introduction to Criminology ...............................3 Credits
An analysis of the nature and extent of crime. Emphasis is placed on criminal and delinquent behavior and theories of causation; the criminal personality and career orientation; and principles and theories of prevention, control, and treatment.

SOC 2140—Marriage and the Family ..................................3 Credits
An analytical and practical examination of the family as a unit of interacting individuals with emphasis on socialization, family pathology, social change, and the future of the family.

SOC 2150—Energy and Society ........................................3 Credits
See course description for Coal Mining Technology (CMT) 1610.

SPANISH

SPA 1010—Beginning Spanish I ........................................3 Credits
(No prerequisite)

SPA 1020—Beginning Spanish II ......................................3 Credits
(Prerequisite: SPA 1010)

SPA 1030—Beginning Spanish III ......................................3 Credits
Elementary grammar, pronunciation and conversation through use of films, videotapes, cassette tapes, filmstrips and computer programs. (Laboratory required.) (Prerequisite: SPA 1020)

SPA 2010—Intermediate Spanish I ....................................3 Credits
(Prerequisite: SPA 1030)

SPA 2020—Intermediate Spanish II ...................................3 Credits
(Prerequisite: SPA 2010)

SPA 2030—Intermediate Spanish III ..................................3 Credits
Advanced grammar and conversation through use of films, videotapes, cassette tapes, filmstrips, computer programs and library readings. (Laboratory required.) (Pre-requisite: SPA 2020)

SPEECH

SPE 2410—Basic Speech Communication ..............................3 Credits
Designed to introduce the student to the basic principles and techniques of public speaking. Emphasis in class is placed upon the selection of subjects and supporting materials, the organization of the speech, and the oral and physical aspects of delivery.

SPE 2430—Interpersonal Communication ............................3 Credits
Communication theory in its application to informal, face-to-face situations. Practical application of the impromptu speech relative to interpersonal communication.

SPE 2440—Business and Professional Speaking ......................3 Credits
Designed for students going into management, human relations, communications, personnel management and the sciences where the individual must work on a person-to-person basis. Included in the course are units on presenting informative reports, using visuals, interview and conference techniques, and manuscript speaking. (No prerequisite)
SPE 2450—Debate ................................................... 3 Credits
A study of the principles of argumentation and debate, including analysis, briefing, evidence, reasoning, and refutation; class debating on vital questions. (Prerequisite: SPE 2410)

SPE 2460—Speech Practicum I ........................................ 1 Credit
SPE 2470—Speech Practicum II ........................................ 1 Credit
SPE 2480—Speech Practicum III ....................................... 1 Credit
Field experience courses offering practical experience for students working in campus and off-campus forensic activities. Each course carries one hour credit, and students may earn up to six credits by enrolling for one course each quarter.

SPE 2710—Oral Interpretation ........................................ 3 Credits
This course is to introduce students to the analysis of literature for the purpose of presenting it orally to an audience. It will include a study of those basic speech skills necessary for such presentation.

SPE 2720—Fundamentals of Acting .................................... 3 Credits
Fundamentals of Acting will emphasize the mechanics (vocal and physical) of presenting a character on stage.

SPE 2730—Introduction to Theatre .................................... 3 Credits
A survey course in theatre covering the history and development of Western drama. This course will emphasize drama as production rather than as literature.

SPE 2740—Fundamentals of Theatrical Production ............... 3 Credits
This course is designed to introduce students to the practical considerations of play production. It emphasizes theory and practice in the various areas of design and stage construction, introduces the students to meaningful rehearsal techniques and offers them the opportunity to apply acquired classroom skills to actual stage experience.

SPE 2750—Theatre Practicum I ........................................ 1 Credit
SPE 2760—Theatre Practicum II ....................................... 1 Credit
SPE 2770—Theatre Practicum III ..................................... 1 Credit
Field experience courses offering practical experience for students working in campus and off-campus technically oriented theatre activities or performance oriented theatre activities. Each course carries one hour credit, and students may earn up to six credits by enrolling for one course each quarter.

TECHNOLOGY

TEC 1010—Man and Technology I .................................... 2-3 Credits
An introductory course which analyzes the problems that have developed in American society because of technological change. The scientific method as it applies to the world of work is considered. Primarily for special technology programs.

TEC 1020—Man and Technology II .................................... 2-3 Credits
A continuation of TEC 1010. Emphasis is placed on getting a job, job interview skills, job applications, good work habits, etc. Primarily for special technology programs.
Definition of Terms

Admission—Acceptance of a candidate for enrollment.

Admission to Advanced Standing—Granted on the basis of credits earned in another college or on the basis of demonstrated educational attainment beyond the minimum required for admission.

Advisor, Advisee—The advisor, or counselor, is the instructor assigned to help the student with his/her academic problems. The student is called the advisee.

Average, Grade Point—A measure of average scholastic success obtained by dividing the total number of grade points earned by the total number of hours of course work attempted.

Calendar—The division of the full calendar year. The quarter calendar is composed of three regular terms per year with about ten weeks per term of instruction excluding final examinations in a school year of about the same over-all length as under a semester system, running from September through early June, with the fourth quarter as a summer session.

Classification—Student status in respect to progress toward the completion of his/her curriculum based upon the number of hours or courses to his/her credit at the time of registration and scholarship achievement required for advancement to another class.

Course—Organized subject matter in which instruction is offered within a given period of time and for which credit toward graduation or certification is usually given.

Course Number—Identifies class level and distinguishes it from other courses in a given area of study.

Course Corequisite—When two or more classes are required simultaneously.

Course Prerequisite—A preliminary requirement that must be met before a certain course may be taken.

Credit Hours (Quarter Hour)—Defined by the number of hours per week in class and the number of weeks in the quarter. One quarter hour is usually assigned to a class that meets fifty minutes a week during a quarter or laboratory type instruction that meets two to four hours a week for a quarter or a combination of class and laboratory meetings depending upon the type of instruction and material covered. Therefore, a three-hour non-laboratory course would in general meet three hours each week during the quarter, and the credit earned would be THREE QUARTER HOURS. A total of 99 quarter hours is the minimum required for graduation.

Curriculum—The whole body of courses offered for study.

Dean's List—Common designation for the published list of students who have made an honor average for the term.

Degree (Earned)—Title bestowed as official recognition for the completion of a curriculum.

Degree, Associate—Granted upon completion of an education program of less than four years of college work, generally for the completion of the curriculum.

Degree Student—One who has fulfilled the admissions requirements and who is pursuing an Associate Degree program, referred to by some colleges as a regular student.

Department—An area which offers instruction in a particular branch of knowledge.

Developmental Studies—A program of studies in various areas designed to give the student background prerequisite to college level studies.

Dismissal (Academic)—Involuntary separation of a student from his/her college because he/she has not met the academic requirements.

Dismissal (Disciplinary)—Involuntary separation of a student from his/her college as a result of action taken because of misconduct.

Division—A group of related departments, such as the Humanities Division.
Elective—A subject or course which the student may choose as distinguished from courses which are required.

Financial Aid, Student—Assistance to students in the form of "gift" aid (scholarships and grants) and "self-help" aid (loans and part-time employment). It is usually based on financial need and is used for expenses related to attending college (fees, books, transportation, room and board, and miscellaneous).

Full-Time Student—One who is carrying at least seventy-five percent of the normal student hour load. Twelve quarter hours is commonly accepted as a minimum load for a full-time student.

Grant-in-Aid—A gift of money made without regard to academic excellence to a student who possesses certain talent sought or valued by an institution, such as "Athletic Grant-in-Aid," "Music Grant-in-Aid," etc., usually, although not always, made without regard to financial need.

Major—The student's primary field of interest. The field of concentration may fall within a single department of instruction or may overlap several departments. In the latter case, the major is described as a division major.

Minor—The student's field of secondary emphasis.

Part-Time Student—One who is carrying an academic schedule of less than 12 hours.

Probation—Probation status may be for academic or for disciplinary reasons. Academic probation is the result of unsatisfactory scholarship. It is not a penalty but a warning and an opportunity to improve. Academic probation usually involves a compulsory reduction of academic load and interviews for diagnosis of difficulties and for checking on recovery. Sometimes it brings a required restriction of extracurricular activities and general surveillance. Usually the student is required to make regular specified improvement in his/her record in order to avoid disqualification. Disciplinary probation is a middle status between good standing or dismissal. The student remains enrolled but under stated conditions according to the college policies. Disciplinary probation covers a stated trial period during which it is determined whether the student is returned to good standing, having met the stated requirements, or dismissed or suspended at the end of the period for failing to meet the stated requirements.

Quarter—A fourth of a school year. Three quarters constitute the academic year.

Reinstatement—The act of readmitting a student after he/she has been dismissed.

Section Number—Refers to the specific class of the course for which the student is enrolled.

Special Student—One who is not pursing an Associate Degree program. Special students either do not fulfill minimum requirements for entrance as degree students or have been permitted to audit a limited or special selection of degree credit courses without regard to degree requirements.

Suspension—Involuntary separation of the student from the College is implied by the term suspension. It may not be a permanent separation but neither is a definite time set when return is expected.

Transfer Student—A student who has withdrawn from one college and is admitted to another.

Transient Student—A student in good standing in any recognized college who is taking work in another college to transfer back to his/her college.

Withdrawal—A release from enrollment. A student notifies the appropriate authorities, thereby making it an Official Withdrawal. When the student merely stops attending classes without notifying the authorities, failing marks are recorded and charged against him/her. This is termed Unofficial Withdrawal.
